	PAGE
CORRECTIONS TO A PAPER	viii
PRESENTS TO THE LIBRARY	vi
SYLLABUS of Papers read during Session 1909-10	v
 ARCHIBALD, R. C.	
(1) Historical Note on Wallace's Line	64
Addition to „ „ „	179
(2) Discussion and History of Certain Geometrical Problems of Heraclitus and Apollonius	152
 BELL, ROBERT J. T.	
(1) The Locus of the Straight Lines which intersect Three Given Lines	60
(2) The Factors of $(a, b, c, f, g, h) (x, y, z)^2 - \lambda(x^2 + y^2 + z^2)$	62
 CARSLAW, Professor H. S.	
(1) The Bolyai-Lobatschewsky Non-Euclidean Geometry : an Elementary Interpretation of this Geometry, and some Results which follow from this Interpretation	95
(2) Gauss's Theorem on the Regular Polygons which can be constructed by Euclid's Methods	121
 CRAIG, JAMES I.	
Orthogonal Trajectories in Vectorial Coordinates	42
 EDWARDES, F. E.	
On the stationary eccentricity of a system of four-tangent conics	2

	PAGE
M'LEOD, CHARLES, and MILNE, W. P.	
Triangles Triply in Perspective - - - -	148
MUIRHEAD, R. F.	
(1) The Anharmonic Ratios of 4 points in a straight line -	14
(2) On Wilkinson's Method of treating the Nine-Points Circle, with Generalizations - - - -	129
NARANIENGAR, Prof. M. T.	
The locus of points at which two sides of a given triangle subtend equal or supplementary angles - -	73
OFFICE-BEARERS - - - - -	I
SANJANA, Prof. K. G.	
On Series for calculating Euler's Constant, and the Constant in Stirling's Theorem - - - -	48
SOMMERVILLE, D. M. Y.	
(1) A Problem in Voting - - - - -	23
(2) Classification of Geometries with Projective Metric -	25
(3) Elementary Considerations relating to the Absolute -	65
(4) Note on the Geometries in which Straight Lines are represented by Circles - - - - -	81
STOKES, G. D. C.	
On the Integration of the Canonic Equations and the Principle of Duality - - - - -	6
