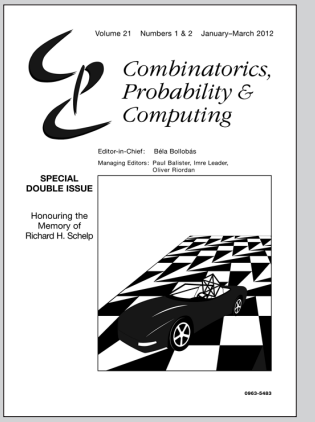
CAMBRIDGE JOURNALS

Combinatorics, Probability & Computing

Editor-in-Chief
Béla Bollobás, *DPMMS, Cambridge, UK; University of Memphis, USA*



Published bimonthly, *Combinatorics, Probability & Computing* is devoted to the three areas of combinatorics, probability theory and theoretical computer science. Topics covered include classical and algebraic graph theory, extremal set theory, matroid theory, probabilistic methods and random combinatorial structures; combinatorial probability and limit theorems for random combinatorial structures; the theory of algorithms (including complexity theory), randomised algorithms, probabilistic analysis of algorithms, computational learning theory and optimisation.

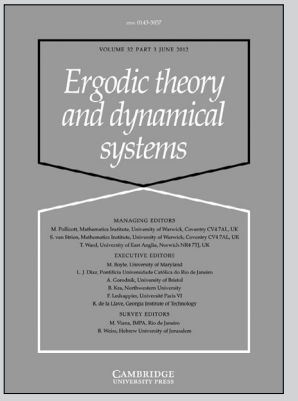
CAMBRIDGE JOURNALS

Ergodic Theory and Dynamical Systems

Managing Editors
Mark Pollicott, *University of Warwick, UK*
Thomas Ward, *University of East Anglia, UK*
Sebastian van Strien, *Imperial College, London, UK*



Ergodic Theory and Dynamical Systems focuses on a rich variety of research areas which, although diverse, employ as common themes global dynamical methods. The journal provides a focus for this important and flourishing area of mathematics and brings together many major contributions in the field. The journal acts as a forum for central problems of dynamical systems and of interactions of dynamical systems with areas such as differential geometry, number theory, operator algebras, celestial and statistical mechanics, and biology.

726 ISSN 0022-1120
Journal of Fluid Mechanics 10 July 2013

1 Recurrent flows: the clockwork behind turbulence
P. Cvitanović

5 Fluid transport by individual microswimmers
D. O. Pushkin, H. Shum & J. M. Yeomans

26 Motion of drops on inclined surfaces in the inertial regime
B. A. Puthenveettil, V. K. Senthilkumar & E. J. Hopfinger

62 Dynamic modelling of sea-surface roughness for large-eddy simulation of wind over ocean wavefield
D. Yang, C. Meneveau & L. Shen

100 Edge states for the turbulence transition in the asymptotic suction boundary layer
T. Kreilos, G. Veble, T. M. Schneider & B. Eckhardt

123 Planetary (Rossby) waves and inertia–gravity (Poincaré) waves in a barotropic ocean over a sphere
N. Paldor, Y. De-Leon & O. Shamir

137 Solitary waves in turbulent open-channel flow
W. Schneider

160 On the variety of particle accumulation structures under the effect of g-jitters
M. Lappa

196 Effect of wall heating on turbulent boundary layers with temperature-dependent viscosity
J. Lee, S. Y. Jung, H. J. Sung & T. A. Zaki

226 Dispersion and nonlinearity of multi-layer non-hydrostatic free-surface flow
Y. Bai & K. F. Cheung

261 Interfacial waves and the dynamics of backflow in falling liquid films
E. O. Doro & C. K. Aidun

S 285 Low-Reynolds-number swimming in a capillary tube
L. Zhu, E. Lauga & L. Brandt

312 Second-mode attenuation and cancellation by porous coatings in a high-speed boundary layer
G. A. Brès, M. Inkman, T. Colonius & A. V. Fedorov

338 Self-similar decay and mixing of a high-schmidt-number passive scalar in an oscillating boundary layer in the intermittently turbulent regime
C. Scalo, U. Piomelli & L. Boegman

371 Nonlinear stratified spindown over a slope
J. A. Benthuysen & L. N. Thomas

404 Effects of inertia and stratification in incompressible ideal fluids: pressure imbalances by rigid confinement
R. Camassa, S. Chen, G. Falqui, G. Ortenzi & M. Pedroni

439 The acoustic analogy in an annular duct with swirling mean flow
H. Posson & N. Peake

476 The influence of vibration on Marangoni waves in two-layer films
A. A. Nepomnyashchy & I. B. Simanovskii

497 Rheological characterization of cellular blood in shear
D. A. Reasor Jr, J. R. Clausen & C. K. Aidun

517 Large-time evolution of statistical moments of wind–wave fields
S. Y. Annenkov & V. I. Shrira

547 New exact relations for easy recovery of steady wave profiles from bottom pressure measurements
D. Clamond

S 559 Horizontal convection dynamics: insights from transient adjustment
R. W. Griffiths, G. O. Hughes & B. Gayen

596 Koopman-mode decomposition of the cylinder wake
S. Bagheri
