PUBLISHED BY CAMBRIDGE UNIVERSITY PRESS FOR
AND ON BEHALF OF THE ASSOCIATION OF SYMBOLIC LOGIC.

The BULLETIN, the JOURNAL and the REVIEW OF SYMBOLIC LOGIC are the official organs of the Association for Symbolic Logic, an international organization for furthering research in logic and the exchange of ideas among mathematicians, computer scientists, linguists, and others interested in this field. The BULLETIN encourages submissions of *Articles* and *Communications* in all areas of logic, including mathematical or philosophical logic, logic in computer science or linguistics, the history or philosophy of logic, and applications of logic to other fields. It also encourages the submissions of abstracts for doctoral level theses in logic. The BULLETIN also publishes reviews of publications in logic.

Thesis abstracts editor

Christian Rosendal rosendal@math.uic.edu

Articles present topics of broad interest in a way that is accessible to a large audience. They can be purely expository, survey, or historical articles or they may contain, in addition, new ideas or results or new approaches to old ones.

Communications should be announcements of important new results and ideas in any aspect of logic; they may be short papers in their final form or preliminary announcements (extended abstracts, position papers) of longer, full papers that will be published elsewhere. In any case, they should include, in addition to a description of the new results or ideas, enough history, background, and explanation to make the significance of the work apparent to a wide audience. *Communications* will be quickly refereed and published within six months of the submission of final version.

To submit *Articles* or *Communications* please follow the procedure described at <http://www.aslonline.org/journals-bulletin-guide.html>

To submit *Thesis Abstracts* please follow the procedure described at <http://aslonline.org/LogicThesisAbstracts.html>

Books for review in the BULLETIN should be sent to **ASL, Department of Mathematics, University of Connecticut, 341 Mansfield Road, U-1009, Storrs, CT 06269-1009, USA.**

TABLE OF CONTENTS

ARTICLES

Variants of Kreisel's conjecture on a new notion of provability by PAULO GUILHERME SANTOS AND REINHARD KAHLE	337
Projective duality and the rise of modern logic by GÜNTHER EDER	351
Logicality and model classes by JULIETTE KENNEDY AND JOUKO VÄÄNÄNEN	385
Notes on the stable regularity lemma by M. MALLIARIS AND S. SHELAH	415
Ackermann's function in iterative form: A proof assistant experiment by LAWRENCE C. PAULSON	426
Level theory, part 1: Axiomatizing the bare idea of a cumulative hierarchy of sets by TIM BUTTON	436
Level theory, part 2: Axiomatizing the bare idea of a potential hierarchy by TIM BUTTON	461
Sense and reference from a constructivist standpoint by MICHAEL DUMMETT	485
The sense/reference distinction in constructive semantics by PER MARTIN-LÖF	501

IN MEMORIAM

In Memoriam: Michael Morley, 1930–2020	514
In Memoriam: J. Michael Dunn, 1941–2021	519

THESIS ABSTRACTS

Marco Abbadini, <i>On the Axiomatisability of the Dual of Compact Ordered Spaces</i> , Università degli studi di Milano, Italy, 2021. Supervised by Vincenzo Marra	526
Jeffrey Bergfalk, <i>Dimensions of Ordinals: Set Theory, Homology Theory, and the First Omega Alephs</i> , Cornell University, Ithaca, NY, USA, 2018. Supervised by Justin Tatch Moore	526
Luca Carai, <i>New Directions in Duality Theory for Modal Logic</i> , New Mexico State University, USA, 2021. Supervised by Guram Bezhanishvili	527
Colin Jahel, <i>Some Progress on the Unique Ergodicity Problem</i> , Université Claude Bernard Lyon 1, Villeurbanne, France, 2021. Supervised by Lionel Nguyen Van Thé and Todor Tsankov	527
Liling Ko, <i>Towards Finding a Lattice that Characterizes the $> \omega^2$-Fickle Recursively Enumerable Turing Degrees</i> , University of Notre Dame, USA, 2021. Supervised by Peter Cholak	528

Lothar Sebastian Krapp, <i>Algebraic and Model Theoretic Properties of O-minimal Exponential Fields</i> , Universität Konstanz, Germany, 2019. Supervised by Salma Kuhlmann	529
Xue Li, <i>Automating the Repair of Faulty Logical Theories</i> , Artificial Intelligence Applications Institute, School of Informatics, University of Edinburgh, UK, 2021. Supervised by Alan Bundy	530
Andrew Parisi, <i>Second-Order Modal Logic</i> , University of Connecticut, USA, 2017. Supervised by Marcus Rossberg	530
Sewon Park, <i>Continuous Abstract Data Types for Verified Computation</i> , KAIST, South Korea, 2021. Supervised by Martin Ziegler	531
