
What's new in NUTRITION?

Nutrition Research Reviews

- A new annual publication
- Authoritative, global reviews of recent research developments
- Invited contributions from internationally recognized experts
- Encourages the exchange of fundamental ideas between workers whose principal interest and practical concerns may lie in very different nutritional fields
- Covers the whole subject range

See also the **British Journal of Nutrition** and **The Proceedings of the Nutrition Society**, the established journals of The Nutrition Society, giving you original research, proceedings of symposia, highlight and comment.

Subscriptions

Nutrition Research Reviews (0954-4224) is published annually in November. Volume 2 (1989) is available for £32. **The British Journal of Nutrition** (0007-1145) is published six times a year in January, March etc. The 1989 subscription is available for £167 and includes *Nutrition Research Reviews*. **The Proceedings of the Nutrition Society** (0029-6651) is published three times a year in January, July and September. The 1989 volume is available for £75.

Send your order to: Journals Publicity Department, FREEPOST, Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 1BR, England (No postage stamp needed if posted within UK) or, Cambridge University Press, 40 West 20th Street, New York, NY 10011, USA, or write for a sample copy.

You can't afford not to read them!

Contents

No. 1 (February 1989)

	PAGE
Effect of different oxygen concentrations in the gas phase on biochemical activities of goat mammary tissue in organ culture. J. ŠKARDA and E. URBANOVÁ	1
Metabolic adaptations in goat mammary tissue during long-term incomplete milking. C. J. WILDE, D. R. BLATCHFORD, C. H. KNIGHT and M. PEAKER	7
Increased secretion of insulin-like growth factor I into milk of cows treated with recombinantly derived bovine growth hormone. C. G. PROSSER, I. R. FLEET and A. N. CORPS	17
Cardiovascular responses and mammary substrate uptake in Jersey cows treated with pituitary-derived growth hormone during late lactation. F. M. FULLERTON, I. R. FLEET, R. B. HEAP, I. C. HART and T. B. MEPHAM	27
Lack of correlation between milk glucose concentrations and rates of milk production in the rat. M. R. GRIGOR, J. M. CARRINGTON, P. G. ARTHUR and P. E. HARTMANN	37
Effect of hydraulic milking on milking performance, teat condition and lipolysis. R. J. GRINDAL and T. K. GRIFFIN	45
Effect of a shielded liner on new mastitis infection. M. BINDE, H. P. MELBY, A. ASK, A. LUND and S. AA. VANGDAL	55
Subunit components of casein micelles from bovine, ovine, caprine and equine milks. T. ONO, H. KOHNO, S. ODAGIRI and T. TAKAGI	61
Precision conductometry in milk renneting. P. DEJMEK	69
A mathematical model for the description of chymosin action on casein micelles. U. MERIN, H. TALPAZ and S. FISHMAN	79
Solubilization of spray-dried lactalbumin by Alcalase. C. G. SMITH, P. A. MUNRO, D. E. OTTER and R. M. BRAUER	87
Whipping properties of cream in relation to milk composition. W. BANKS, J. L. CLAPPERTON, D. D. MUIR and A. K. GIRDLER	97
Uptake of glutamic acid by <i>Streptococcus salivarius</i> subsp. <i>thermophilus</i> CNRZ 302. P. BRACQUART, J.-Y. LE DEAUT and G. LINDEN	107
Purification and thermostability of β -galactosidase (lactase) from an autolytic strain of <i>Streptococcus salivarius</i> subsp. <i>thermophilus</i> . B.-S. CHANG and R. R. MAHONEY	117

Anaerobic digestion of deproteinated cheese whey in an Upflow Sludge Blanket reactor. E. W. SCHRÖDER and J. DE HAAST	129
Proteolysis of Cabrales cheese and other European blue vein cheese varieties. J. FERNANDEZ-SALGUERO, A. MARCOS, M. ALCALA and M. A. ESTEBAN	141
Ultrafiltration of reconstituted skim milk. M. H. ABD EL-SALAM and N. SHAHEIN	147
Proportion of phage-insensitive and phage-sensitive cells within pure strains of lactic streptococci, and the influence of calcium. J. TESFAIGZI and R. SÜSSMUTH	151
Effect of antibiotic resistance on the flavour profile of lactic acid bacteria. K. S. BABU, R. S. SINGH and H. CHANDER	155

No. 2 (May 1989)

Dr M. Elisabeth Sharpe	159
Release of cholesteryl esters by the mammary gland of the pre-partum cow. G. E. THOMPSON	161
Catecholamines, oxytocin and milk removal in dairy cows. J. W. BLUM, D. SCHAMS and R. BRUCKMAIER	167
Changes in the concentration of metabolites in milk from cows fed on diets supplemented with soyabean oil or fatty acids. A. FAULKNER and H. T. POLLOCK	179
Observations on the heat-induced salt balance changes in milk. I. Effect of heating time between 4 and 90 °C. Y. POULIOT, M. BOULET and P. PAQUIN	185
Observations on the heat-induced salt balance changes in milk. II. Reversibility on cooling. Y. POULIOT, M. BOULET and P. PAQUIN	193
A model heat-exchange apparatus for the investigation of fouling of stainless steel surfaces by milk. I. Deposit formation at 100 °C. C. L. FOSTER, M. BRITTEN and M. L. GREEN	201
Low resolution NMR spectroscopy: a tool to study protein denaturation. I. Application to diamagnetic whey proteins. P. LAMBELET, R. BERROCAL and F. DUCRET	211
Estimation of casein micelles' surface energy by means of contact angle measurements. M. BRITTEN, M. BOULET and P. PAQUIN	223
Binding of zinc to bovine and human milk proteins. H. SINGH, A. FLYNN and P. F. FOX	235
Zinc binding in bovine milk. H. SINGH, A. FLYNN and P. F. FOX	249
Fractional melting of hydrogenated milk fat. W. BANKS, J. L. CLAPPERTON and A. K. GIRDLER	265

Compression and impact strength of gels, prepared from fractionated whey proteins, in relation to composition and microstructure. K. R. LANGLEY and M. L. GREEN	275
Accelerated ripening of Feta cheese, with heat-shocked cultures or microbial proteinases. A. VAFOPOULOU, E. ALICHANIDIS and G. ZERFIRIDIS	285
Effects of β -lactoglobulin and κ -casein genetic variants and concentrations on syneresis of gels from renneted heated milk. D. M. MCLEAN and J. SCHAAR	297
Review article. Ewes' milk cheese: technology, microbiology and chemistry. M. NUÑEZ, M. MEDINA and P. GAYA	303

No. 3 (Special Issue, 1989)

Preface	ii
Action of plasmin on bovine β -casein in a membrane reactor. S. VISSER, H. J. NOORMAN, C. J. SLANGEN and H. S. ROLLEMA	323
Tryptic phosphopeptides from whole casein. II. Physicochemical properties related to the solubilization of calcium. R. BERROCAL, S. CHANTON, M. A. JUILLERAT, B. PAVILLARD, J.-C. SCHERZ and R. JOST	335
Chemical characterization of bioactive peptides from <i>in vivo</i> digests of casein. H. MEISEL and H. FRISTER	343
Biologically active peptides of casein and lactotransferrin implicated in platelet function. A.-M. FIAT, S. LEVY-TOLEDANO, J. P. CAEN and P. JOLLÈS	351
Biologically active casein peptides implicated in immunomodulation. D. MIGLIORE-SAMOUR, F. FLOC'H and P. JOLLÈS	357
Opioid antagonist peptides derived from κ -casein. H. CHIBA, F. TANI and M. YOSHIKAWA	363
Isolation and partial purification of astringent compounds from ultra-high temperature sterilized milk. V. R. HARWALKAR, B. BOUTIN-MUMA, H. CHOLETTE, R. C. MCKELLAR, D. B. EMMONS and G. KLASSEN	367
The level of bitterness and solubility of hydrolysates produced by controlled proteolysis of casein. G. E. VEGARUD and T. LANGSRUD	375
Enzymic dephosphorylation of bovine casein to improve acid clotting properties and digestibility for infant formula. E. LI-CHAN and S. NAKAI	381
Rapid separation of bovine caseins by mass ion exchange chromatography. K. F. NG-KWAI-HANG and J. P. PÉLISSIER	391
Phosphorylation of casein components by Tyrosine-specific protein kinases. M. YOSHIKAWA, M. SHIMADA, T. MIYAMURA, T. TAKEYA and H. CHIBA	399
Study of calcium binding to phosphoserine residues of β -casein and its phosphopeptide (1-25) by ^{31}P NMR. J.-J. BAUMY, P. GUENOT, S. SINBANDHIT and G. BRULÉ	403

Composition and structure of micellar calcium phosphate. C. HOLT, M. J. J. M. VAN KEMENADE, L. S. NELSON JR., L. SAWYER, J. E. HARRIES, R. T. BAILEY and D. W. L. HUKINS	411
A ¹ H-NMR study of bovine casein micelles; influence of pH, temperature and calcium ions on micellar structure. H. S. ROLLEMA and J. A. BRINKHUIS	417
Hydrophobic interactions in human casein micelle formation: β -casein aggregation. C. W. SLATTERY, S. M. SOOD and P. CHANG	427
Dissociation and reassociation of enzyme-treated caseins under high pressure. K. OHMIYA, T. KAJINO, S. SHIMIZU and K. GEKKO	435
Small-angle X-ray scattering investigation of the micellar and submicellar forms of bovine casein. H. PESSEN, T. F. KUMOSINSKI and H. M. FARRELL, JR	443
A model for the assembly of bovine casein micelles from F2 and F3 subunits. T. ONO and T. OBATA	453
The structure of casein micelles between pH 5.5 and 6.7 as determined by light-scattering, electron microscopy and voluminosity experiments. H. J. VREEMAN, B. W. VAN MARKWIJK and P. BOTH	463
Surface and emulsifying properties of caseins. E. DICKINSON	471
Influence of glycosylation on the hydration properties of caseinates. M. LE MESTE, B. COLAS, G. BLOND and D. SIMATOS	479
Surface active properties at the air-water interface of β -casein and its fragments derived by plasmin proteolysis. M. WILSON, D. M. MULVIHILL, W. J. DONNELLY and B. P. GILL	487
Surface properties of the bovine casein components: relationships between structure and foaming properties. D. LORIENT, B. CLOSS and J. L. COURTHAUDON	495
Heat-induced changes in sodium caseinate. M. GUO, P. F. FOX, A. FLYNN and K. S. MAHAMMAD	503
Experiments on the heat-induced salt balance changes in cow's milk. Y. POULIOT, M. BOULET and P. PAQUIN	513
Milk stability in ethanolic solutions. A. PIERRE	521
Rheological properties of casein gels. T. VAN VLIET, S. P. F. M. ROEFS, P. ZOON and P. WALSTRA	529
Application of fractal concepts to the study of caseinate aggregation phenomena. D. S. HORNE	535
Poster Presentations	543
List of participants	557

No. 4 (August 1989)

Effect of amount and composition of feed given over three lactations on the performance of the dairy cow. W. H. BROSTER, A. J. CLEMENTS, V. J. BROSTER, T. SMITH, J. W. SIVITER and R. E. HILL	561
Automatic application of teat disinfectant through the milking machine cluster. R. J. GRINDAL and D. J. PRIEST	579
Short-term effects of frequent milking of dairy cows. R. VAN DER IEST and J. E. HILLERTON	587
Laboratory simulations of a commercial UHT treatment using an oil bath and a programmable, electronically temperature-controlled oven. R. E. O'CONNOR and C. O'CONNOR	593
Tryptic phosphopeptides from whole casein. I. Preparation and analysis by fast protein liquid chromatography. M. A. JULLERAT, R. BAECHLER, R. BERROCAL, S. CHANTON, J.-C. SCHERZ and R. JOST	603
Incorporation of individual casein constituents into casein aggregates cross-linked by colloidal calcium phosphate in artificial casein micelles. T. AOKI	613
A method for determination of γ -casein and its use for investigating proteolysis in bovine milk. Y. IGARASHI	619
Determination of chymosin and bovine pepsin A activity in combined rennets on the basis of immunochemical inhibition. E. BERÁNKOVÁ, P. RAUCH and J. KÁŠ	631
Characteristics of the autolysis of variants of <i>Lactococcus lactis</i> subsp. <i>cremoris</i> . K. NISKASAARI	639
Monitoring of B-complex vitamins in yogurt during fermentation. W. KNEIFEL, S. HOLUB and M. WIRTHMANN	651
Comparison of Cheddar cheese made with a recombinant calf chymosin and with standard calf rennet. V. E. BINES, P. YOUNG and B. A. LAW	657
Chemical prediction of water activity in processed cheese. M. A. ESTEBAN and A. MARCOS	665
Phosphopeptide dissociation from micellar calcium phosphate preparations does not induce crystallinity. L. S. NELSON JR, C. HOLT and D. W. L. HUKINS	669

No. 5 (November 1989)

Feeding calcium soaps of fatty acids to lactating cows: effect on production, body condition and blood lipids. D. SKLAN, E. BOGIN, Y. AVIDAR and S. GUR-ARIE	675
Effect of udder preparation on transmission of <i>Staphylococcus aureus</i> while milking with a multi-valved cluster. R. J. GRINDAL and A. J. BRAMLEY	683

Development of a cows' milk identification test (COMIT) for field use. T. GARCÍA, R. MARTÍN, E. RODRÍGUEZ, P. E. HERNÁNDEZ and B. SANZ	691
Lipase redistribution in cows' milk during induced lipolysis. I. Activation by agitation, temperature change, blood serum and heparin. P. CARTIER and Y. CHILLIARD	699
Lipase redistribution in cows' milk during induced lipolysis. II. Activation by milk pH adjustment. P. CARTIER, Y. CHILLIARD and J. BOUT	711
Changes in milk plasminogen, plasmin and <i>in vitro</i> bacterial growth in whey during early lactation. L. KAARTINEN and S. PYÖRÄLÄ	719
pH-Induced dissociation of bovine casein micelles. II. Mineral solubilization and its relation to casein release. D. G. DALGLEISH and A. J. R. LAW	727
Formation of galactose during heat treatment of milk and model systems. M. M. CALVO and A. OLANO	737
Ultraviolet spectroscopic studies on the feathering of cream in instant coffee. L. HAMBOYAN, D. A. PINK, D. KLAPSTEIN, L. MACDONALD and H. ABOUD	741
Theoretical analysis of ultraviolet spectroscopic studies on the feathering of cream in coffee. D. A. PINK, L. HAMBOYAN and H. ABOUD	749
Automatic method to quantify starter activity based on pH measurement. H. E. SPINNLER and G. CORRIEU	755
Intracellular proteinase of <i>Lactococcus lactis</i> subsp. <i>lactis</i> NCDO 763. G. MUSEY, V. MONNET and J.-C. GRIPON	765
Serological identification of <i>Streptococcus salivarius</i> subsp. <i>thermophilus</i> . M. A. NOUR, G. ABDEL-TAWAB, S. SHALABY and O. A. MOHAMED	779
Factors affecting the thermostability of β -galactosidase (<i>Streptococcus salivarius</i> subsp. <i>thermophilus</i>) in milk: a quantitative study. B.-S. CHANG and R. R. MAHONEY	785
Sandwich enzyme immunoassay of <i>Mucor miehei</i> proteinase (Fromase) in cheese. P. RAUCH, I. HOCHÉL, E. BERÁNKOVÁ and J. KÁŠ	793
Production of methanethiol in milk fat-coated microcapsules containing <i>Brevibacterium linens</i> and methionine. S. C. KIM and N. F. OLSON	799
Amino acid composition of yeast single cell protein grown on paneer whey. K. SINGH and S. NEELAKANTAN	813
Specificity of plasmin towards bovine α_{s2} -casein. D. LE BARS and J.-C. GRIPON	817
Proteolysis in cheese investigated by high performance liquid chromatography. T. M. I. E. CHRISTENSEN, K. R. KRISTIANSEN and J. S. MADSEN	823

DIRECTIONS TO CONTRIBUTORS

GENERAL

Two copies of manuscripts should be sent to the Editor, *Journal of Dairy Research*, Dr W. Manson, The Hannah Research Institute, Ayr KA6 5HL, Scotland. Submission of a paper will be held to imply that it reports unpublished original work, that it is not under consideration for publication elsewhere, and that if accepted for the *Journal* it will not be published elsewhere in any language, without the consent of the Editors.

FORM OF PAPERS

The author should follow these directions carefully, and consult a current issue of the *Journal* for guidance on details of typographical and other conventions.

Every paper should be headed with its title, the names and initials of the authors (each author supplying one given name) and the name and address of the laboratory where the work was done.

Papers should be in English, using the spelling of the *Shorter Oxford English Dictionary*. They should be typed with double spacing, on one side only of the sheets, and with ample margins for editorial annotations.

Papers should in general be divided into the following parts in the order indicated: (a) Summary, brief and self-contained; (b) Introductory paragraphs, briefly explaining the object of the work but without giving an extensive account of the literature; (c) Experimental or Materials and Methods; (d) Results; (e) Discussion and Conclusions; (f) Acknowledgements without a heading; (g) References. With some types of material headings other than (c), (d) and (e) may be preferable.

The use of footnotes should be avoided if possible. Underlining should be used only to indicate italics. Proper nouns, including trade names, should be given a capital initial letter. Manufacturers or suppliers of materials and equipment, with their addresses, should be given. The typescript should carry the name and address of the person to whom the proofs are to be sent, and give a shortened version of the paper's title, not exceeding 45 letters and spaces, suitable for a running title in the *Journal*.

TABLES

Tables should be numbered and should carry headings describing their content. They should be comprehensible without reference to the text. They should be typed on separate sheets and their approximate positions in the text indicated. *To minimize the cost of printing, the number and size of tables should be kept to an absolute minimum.*

ILLUSTRATIONS

Line drawings and photographs, which must be originals, should be numbered as Figures in Arabic numerals. Drawings should be in Indian ink, on Bristol board or cartridge paper. However, a technique which may be more convenient to authors is to use a double-sized folded piece of tracing paper, or translucent graph paper, with the drawing on one half and the other half acting as a flyleaf. *There should be no lettering or numerals on the drawing itself.*

Attached to every figure there should be a translucent flyleaf cover on the outside of which should be written legibly: (a) title of paper and name of author; (b) figure; (c) the figures and lettering, which are intended to appear on

the finished block, in the correct positions relative to the drawing underneath. Each paper should have a separate typed sheet listing figure numbers with their legends, and the approximate positions of illustrations should be indicated in the text.

The photographs and diagrams should be about twice the size of the finished block and not larger overall than the sheets on which the paper itself is typed. For a figure measuring 250 mm × 150 mm all lines, axes and curves should be 0.4 mm thick, thus ———. Graph symbols in order of preference are ○ ●, △ ▲, □ ■, × +, and for a 250 mm × 150 mm graph the circles should be 3 mm in diam. The triangles should be equilateral of 3 mm side, and the squares also of 3 mm side. The crosses should have lines 3 mm long at right angles. Scale marks on the axes should be on the inner side of each axis and should be 3 mm long.

SHORT COMMUNICATIONS

Short communications or notes of not more than 2500 words or the equivalent space in print and without a summary will also be published.

REFERENCES

In the text, references should be quoted by whichever of the following ways is appropriate: Arnold & Barnard (1900); Arnold & Barnard (1900a); Arnold & Barnard (1900a, b); Arnold *et al.* (1900). Give both names for two authors. For three or more authors give the first name *et al.* on all occasions, adding *a, b, etc.* to the date if there is any ambiguity.

References should be listed alphabetically at the end of the paper. Titles of journals should be given in full, authors' names should be in caps and their initials included. Each reference should be punctuated and set out thus: ARNOLD, T. B., BARNARD, R. N. & COMPOUND, P. J. 1900. Title of paper. *Journal of Dairy Research* **18**, 158–165, and references to books should include names of authors, year of publication, title, names of editors, town of publication and name of publisher in that order, thus: ARNOLD, T. B. 1900 In *Dairying*, vol. 1, pp. 5–11 (Ed. R. W. Brown). London: Brown and Chester.

It is the duty of the author to *check all references.*

UNITS, SYMBOLS AND ABBREVIATIONS

SI units must be used, as explained in British Standards Institution publication BS 5555: 1981 (*Specification for SI units and recommendations for the use of their multiples and of certain other units*). Until SI units are widely understood, it is permissible to give the equivalent value in other units in parenthesis. Symbols and abbreviations used are those of British Standard 5775 (*Specification for Quantities, Units and Symbols*).

DESCRIPTIONS OF SOLUTIONS

Normality and molarity should be indicated thus: N-HCl, 0.1 M-NaH₂PO₄. The term '%' means g/100 g solution. For ml/100 ml solution the term '(v/v)' should be used and for g/100 ml solution the correct abbreviation is '(w/v)'.

OFFPRINTS

Order forms giving quotations for offprints are sent to authors with their proofs.

JOURNAL OF DAIRY RESEARCH
