The *Journal* is the official publication of the British Society for the History of Science. It appears in March, July and November each year, the three issues making a volume. The 1986 subscription rate is £30 (UK), £36 (overseas) and \$52 (USA and Canada), post free: orders and subscriptions should be sent to Blackwell Scientific Publications Ltd, PO Box 88, Oxford, England.

Contributions are welcome and should be sent to the Editor. They are considered on the understanding that they are unpublished and are not on offer to another journal. Two copies should be submitted, typed in double-spacing with a margin on A4 or American Quarto paper. Include an abstract of 150–200 words. Quotations when long should be inset; when short, in single quotation marks. Spelling should follow the *Oxford English dictionary*, and arrangement H. Hart, *Rules for compositors*, Oxford, many edns. Be clear and consistent.

All papers should be rigorously documented, with references to primary and secondary sources typed separately from the text in double spacing, and numbered consecutively. Cite as follows:

14. J. Smith and J. Bloggs, *Early chemistry and the Royal Society*, 2nd edn. (ed. H. Jones, tr. R. Roe), 5 vols. in 6, Edinburgh & London, [1896]–1914; reprinted, New York, 1965, i(ii), chapter VI, especially pp. 123–31. Only name the publisher for good reason. For a symposium: 15. J. Doe (ed.) *Science yesterday*, 2 vols., Oxford 1977, i, 16. Subsequent references may be written: 17. Doe, op. cit. (15), ii, 34. Standard works like *D.N.B.*, *D.S.B.*, may be cited thus; also Plato, *Timaeus*, 27C–32C, *Genesis*, I, 6, identifying translation or edition if necessary. Articles—use bold for volume numbers, Roman numerals for series: e.g. 7. J. J. Thomson, 'Cathode-rays', *Phil. Mag.* (1897) V, **44**, pp. 293–316; a comma after unabbreviated titles, e.g. [*Liebig's*] *Annalen*, (1843). For theses, cite University Microfilm order number, or at least Dissertations Abstract number. Line drawings should be drawn boldly in black ink on stout white paper, faint-ruled graph paper or tracing paper. Photographs should be glossy prints of good contrast and well matched for tonal range. The place of an illustration should be indicated in the margin of the text. Each illustration must carry the name of the author and article, its number, and a caption. Xerox copies may be sent when the article is first submitted for consideration.

© British Society for the History of Science. The British Society for the History of Science retains copyright for all articles published: it is the author's responsibility to secure any necessary permission for publication. Single copies of articles may be made for research or private study without further ado. Permission to make multiple copies should be obtained from the Society. Authors will receive twenty-five offprints of articles free. The editor cannot accept responsibility for loss of a typescript, but will take every care of it; typescripts are not normally returned to authors. In all matters concerning the publication of the article, the Editor's decision is final.

The journal is delivered to North America by accelerated surface post (a.s.p.) and subscribers there can expect to receive their copies within two weeks of British publication. Current issues for the Indian Sub-Continent, Australasia and the Far East are sent by air to regional distribution points from where they are forwarded to subscribers by surface mail. Any back numbers are normally despatched by surface to all regions, except North America, where they are sent by a.s.p., and India, where they are sent by air freight.

## A History of Embryology

Edited by T. J. HORDER, J. A. WITKOWSKI and C. C. WYLIE

'This volume shows that the legacy of Needham in Britain and of Oppenheimer in the United States is being built upon by a new generation, some working embryologists, some historians of science and some philosophers.' *Nature*

*British Society for Developmental Biology* 8

477 pp. 1986 0 521 25953 3 £60.00 net

## From Knowledge to Power

The Rise of the Science Empire in France, 1860-1939

HARRY W. PAUL

'With the publication of *From Knowledge to Power*, the study of french science in a period which until recently was neglected .... has been notably advanced .... Harry Paul has always been regarded as an adventurous historian, and now once again, he has worked barely tilled soil to produce a book of characteristically absorbing interest.' *Nature*

415 pp. 1986 0 521 26504 5 £32.50 net

*Reissue in paperback*

## John Ray

Naturalist: His Life and Works

*Second edition*

*The late* CHARLES E. RAVEN, with an introduction by S. M. WALTERS

*John Ray* is one of the great works in the history of science, as well as a fascinating account of a highly influential figure in the development of evolutionary theory.

*Cambridge Science Classics*

c. 500 pp. 1986 0 521 31083 0 Paperback £15.00 net

## Einstein as Myth and Muse

A. J. FRIEDMAN and C. DONLEY

In this book a scientist and a literary critic combine their talents in order to assess the impact of the revolution in physical theory on literature. How did quantum theory and the general theory of relativity influence creative writers in the first half of this century and what impact have Einstein's ideas had on contemporary writers? The central thesis is that modern science does indeed have a deep influence on other aspects of culture.

## Scientific Controversies

Case Studies in the Resolution and Closure of Disputes in Science and Technology

Edited by H. TRISTRAM ENGELHARDT, Jr and ARTHUR L. CAPLAN

*Scientific Controversies* is offered as a contribution to the better understanding of the role of science and of the place of non-scientific interests in what may at first appear to be purely scientific undertakings.

c. 600 pp. 0 521 25565 1 Hard covers about £25.00 net

## **AN ILLUSTRATED HISTORY**

---

**M. Patricia Donahue** PhD, RN *Associate Professor,  
College of Nursing, The University of Iowa*

'In this 508 page book Patricia Donahue demonstrates how history can help change the face of nursing in the present. With the assistance of Patricia Russac, an archivist for Sotheby's Fine Art (New York City) she has attempted to put nursing into focus .... She has highlighted areas and captured facets of nursing from primitive man through to the twentieth century. ... This glossy book, containing many colour plates, opens up many vistas for the inquiring nurse. ... It will provide a powerhouse of potential research ideas.'

*Nursing Mirror*

**Contents** The origin of nursing; Ancient civilizations; Nursing in a Christian world; Nursing in a changing world: aristocratic and military influences; Nursing in transition: the dark period and the dawn of modern times; The development of nursing in America; Advancing toward new frontiers; Nurses in action: wars of the twentieth century; Nursing: the state of the art.

1985. 524 pages, 405 illustrations (169 in colour)

# The Darwinian Heritage

Edited by *David Kohn*

Representing the present rich state of historical work on Darwin and Darwinism, this volume of essays places the great theorist in the context of Victorian science. The book includes contributions by some of the most distinguished senior figures of Darwin scholarship and by leading younger scholars who have been transforming Darwinian studies. The result is the most comprehensive survey available of Darwin's impact on science and society.

Contributors to the book include M. Acanfora, J. Beatty, G. Beer, P. J. Bowler, J. Browne, R. W. Burkhardt, Jr., I. B. Cohen, P. Corsi, J. R. Durant, H. E. Gruber, S. Herbert, M. J. S. Hodge, D. L. Hull, M. J. Kottler, D. Kohn, E. Mayr, J. R. Moore, G. Pancaldi, D. M. Porter, W. B. Provine, S. P. Rachootin, J. Roger, M. J. S. Rudwick, F. M. Scudo, S. S. Schweber, J. A. Secord, P. R. Sloan, E. Sober, F. J. Sulloway, A. La Vergata, P. Weindling, and R. M. Young.

1140 pages. \$95.00 (U.S.)

# DENTISTRY

## *AN ILLUSTRATED HISTORY*

**Malvin E. Ring** DDS, MLS, FACD

Man's varied attempts to escape dental pain are sometimes shocking, sometimes bizarre, sometimes funny and always fascinating. Studies of ancient cultures reveal dental treatment ranging from drilling to relieve pressure from abscesses to toothpaste made of cumin, incense and onion. *Dentistry: an Illustrated History* brings together this information in a survey of dental history from primitive societies to the present. The book is lavishly illustrated in colour throughout and contains material from an impressive list of contributors.

**Contents:** The primitive world; The ancient Near East; The classical world; The early Middle Ages; The Islamic world; The Far East; The late Middle Ages in western Europe; The Renaissance; The seventeenth century in Europe; The eighteenth century in Europe; America: from the earliest times to the mid-nineteenth century; The late nineteenth century; The twentieth century.

**1985. 332 pages, 300 illustrations (80 in colour)**
