

(12) The subject of the "popular" lecture to be on any subject connected with the hygiene of mind.

(13) As regards the question as to whether the lectures should be biennial, the members who voted for the annual lecture made the valuable suggestion that a "scientific" lecture should be given one year and the "popular" lecture the following year, and so on.

(14) As regards the time and place of the lectures it was decided that the "popular" lecture should be held at the Annual Meeting, followed the next May by a "scientific" lecture.

(15) The President shall preside at the Lecture, with the General Secretary on his right and the Treasurer on his left, as at the Quarterly Meetings.

(16) Your Committee anticipate that after all expenses are paid there will remain a sum which will accumulate from year to year, and they suggest this might be expended in two ways: (a) Assistance to assistant medical officers for original research; (b) propaganda work. Your Committee attach great importance to the latter, and suggest the printing and circulation of the "popular" lecture if deemed expedient. They would also recommend that other lectures might be given and suitable literature printed and circulated. The expenses of this could be provided out of the accumulated balance.

(17) Your Committee feel that later experience might suggest some alteration of the above regulations, and suggest that the matter should be again considered by the Council. They would remind the Council that the will of the benefactor contains no restrictions as to how the bequest should be expended.

*New Member* : Annie Shortridge Mules, M.R.C.S., L.R.C.P., Assistant House-Surgeon, Devon and Exeter Hospital, proposed by Drs. Eager, MacBryan, and Bartlett, was elected a member of the Association.

A most interesting day was arranged by Lieut.-Col. Hurst. During the morning hysterical cases under treatment and cases of war neurosis were demonstrated by Lieut.-Col. Hurst, Major Venables, Capts. Gordon, Gill, Robin, and Wilkinson. This was followed by a cinematograph portrayal of cases before, during, and after treatment. After lunch and the Committee Meeting, Capt. Gordon ably debated the causes of psychasthenia, and was followed by Lieut.-Col. Hurst, who gave us much food for thought on the subject of the close alliance between hysteria and epilepsy; Drs. Head, Lavers, Eager, and Soutar took part in the ensuing discussion. A most hearty vote of thanks was accorded to Lieut.-Col. Hurst and his officers for their kind hospitality and unsparing efforts in the provision of a most instructive and interesting programme, which was greatly appreciated by all present.
