## STATEMENT OF EDITORIAL POLICY

International Legal Materials is a collection of current official documents designed to meet needs for up-to-date information by scholars, practicing lawyers, legal advisers to government agencies and corporations, national and international officials, and others concerned with the legal aspects of public and private international dealings. The documents fall into two main groups: current materials not available in more permanent collections until a later date; and recent materials, likely to be of interest to a broad group of readers, that are not readily available in any other form in most law libraries.

The term international law is interpreted broadly for the purposes of this publication. Some of the materials may be of a kind normally classified under other rubrics, such as foreign law, comparative law, conflicts of law, constitutional law, international organization, and the like. The main criterion in selecting materials is that the document be of substantial interest to a large number of legal scholars, practicing lawyers, and officials dealing with public and private international matters. It is recognized that these interests may vary considerably among users of the publication in the United States and elsewhere.

Technical matters covered by more highly specialized publications, such as tax law in the United States and elsewhere, are normally excluded. Articles, speeches, commentaries, and reports by individuals and private organizations are also excluded.

We try to reproduce the original documents whenever possible within our deadlines. In some instances, however, the documents appear in typewritten form -- for example, when the material is not yet available in an official printing or when excerpts are used.
