

FINAL REMARKS ON IAU SYMPOSIUM 132

FURENLID Without breaking the orderly progression of events during these last moments of IAU Symposium No. 132, I would like to insert a few words. We have just finished an excellent Symposium, and at this point there is no more any discussion or arguments when we all join in gratitude to the supporting staff at the meeting as well as to the scientific and local organizing committees. The Symposium has for me been like a school, where I have found myself -except for 11 too short minutes- on the appropriate side of the teacher's desk, the student side. The teachers were outstanding ! Our special thanks go to the Principal of this school, Dr. Giusa Cayrel, and as a small token of gratitude I would like to present her with a copy of the solar flux atlas. Dr. Cayrel, you are dear to us and we thank you very much !
