

Subject Index

Volume 14, Pages 1–694

A

- aberrant left brachiocephalic artery, repair of right aortic arch, hypoplastic left heart syndrome 441
- absent pulmonary valve syndrome, clinical presentation, natural history, outcome of patients 402
- acute chest pain, in young adult 85
- acute myocardial infarction, secondary to myxomatous embolisation 658
- acute myocarditis, outcomes for children 488
- adolescents, in children, severe rheumatic heart disease, mechanisms of mitral valvar insufficiency, echocardiographic study 527
- after cardiac surgery, heart and other organs, old problems and new solutions 182
- Amplatzer duct occluder, closure, congenital aortocaval fistula, congestive heart failure 676
- Amplatzer septal occluder, mitral valve, interventional closure, defects in oval fossa 494
- anomalous left coronary artery, from the right coronary artery, myocardial infarction in infancy 654
- anomalous origin, left coronary artery, pulmonary trunk 439
- antenatal left ventricular failure, pulmonary atresia, intact ventricular septum 335
- aorta and supraaortic vessels, anomalies, PHACES, neurocutaneous syndrome 206
- aortic coarctation and recoarctation, covered Cheatham-Platinum stents 50
- aortic-right atrial tunnel 86
- aorto-left ventricular tunnel, an unusual case 203
- aortopulmonary window
 - diagnosis, management, results of treatment 506
 - outcomes for patients, impact of associated 473
- appearance of markers of arrhythmia, time course, tetralogy of Fallot 360
- atresia of the main stem, left coronary artery 438
- atrial and ventricular septal defects, circumflex coronary artery, anomalous origin 96
- atrial fibrillation, closure of a patent arterial duct, septuagenarian 328
- atrial flutter, myotonic dystrophy, in childhood 89
- atrial septal defect
 - vestibular defect, surgical treatment 212
 - spontaneous closure, oval fossa 148
- atrial septostomy, fulminant staphylococcal infection 567
- atrial switch, surgical correction of transposition, long-term outcomes, meta-analysis 284
- atrioventricular junction, solitary trunk from right ventricle, cleft mitral valve, trifoliate left valve, atrioventricular septal defect 444

atrioventricular septal defect

- atrioventricular valvar orifice, long-term survival in children 24
 - Type A postaxial polydactyly 215
 - ten year review 15
- atrioventricular valvar orifice, atrioventricular septal defect, long-term survival in children 24

B

- balloon angioplasty, recombinant tissue plasminogen activator, Blalock–Taussig shunt, recanalization 322
- bilateral scimitar syndrome 447
- biological scurvy, pulmonary arteriovenous malformations, setting of cavopulmonary surgery 417
- Blalock–Taussig shunt
 - recanalization, plasminogen activator, balloon angioplasty, topical recombinant tissue 322
 - recanalization, recombinant tissue plasminogen activator, balloon angioplasty 322
 - infected, modified, surgical management 219

C

- cardiac aneurysm, resection of, left coronary artery from pulmonary trunk, anomalous origin 106
- cardiac death, sudden unexpected, Turner's syndrome 192
- cardiac surgery in infancy, perioperative predictors, developmental outcome 389
- cardiac surgery, effect of peritoneal dialysis, intra-abdominal pressure, cardio-respiratory function 293
- cardiomyopathy, variable clinical presentation, ventricular myocardium in infants and children, noncompaction 409
- cardio-respiratory function, effect of peritoneal dialysis, cardiac surgery, intra-abdominal pressure 293
- CardioSEAL[®], STARFlex[®], septal occluders, diverse experience 367
- cardiovascular malformations, trends in chromosomal investigation, in children 622
- cardioverter lead, small child, ventricular perforation 197
- care of patients, congenital heart disease, an adult focus 6
- catheter ablation in children, uncomplicated, routine echocardiography 386
- Cheatham-Platinum stents, covered, aortic coarctation and recoarctation 50
- childhood angina, congenital atresia, coronary sinus 200
- children and adolescents, congenital aortic stenosis, balloon dilation, outcomes 315
- children, cardiovascular malformations, trends in chromosomal investigation 622
- circumflex coronary artery, anomalous origin, atrial and ventricular septal defects 96

cleft mitral valve
 transposition, intact ventricular septum 550
 trifoliate left valve, atrioventricular septal defect, common
 atrioventricular junction, solitary trunk from right
 ventricle 444

clinical and epidemiological correlations, echocardiographic study,
 mechanisms of mitral valvar insufficiency 527

clinical presentation, natural history, outcome of patients, absent
 pulmonary valve syndrome 402

closure of a patent arterial duct, septuagenarian, atrial
 fibrillation 328

closure of atrial septal defect, electrical and morphological atrial
 abnormalities, persistent 481

co-existing divided left atrium, tetralogy of Fallot, preoperative
 diagnosis 456

collateral circulation, aortic coarctation, temporary ascending to
 descending aortic bypass 39

common atrioventricular junction
 atrioventricular septal defect, trifoliate left valve 444
 solitary trunk from right ventricle, cleft mitral valve, trifoliate
 left valve 444

congenital aortic stenosis, in children and adolescents, outcomes
 after balloon dilation 315

congenital aortocaval fistula, congestive heart failure, closure with
 the Amplatzer duct occluder 676

congenital atresia, coronary sinus, childhood angina 200

congenital cardiac disease
 haemodynamic assessment, follow-up 373
 neonatal population, validity of echocardiography 585

congenital cardiac malformations
 extra-cardiac anomalies in children, population-based
 study 600
 in Iceland 396

congenital heart disease
 coping and social support, style 122
 improving the care of patients, an adult focus 6
 parental decision-making 309

congenitally corrected transposition
 right ventricular dysfunction, regional and global, minimally
 symptomatic patients 168
 right ventricular function, ventricular perfusion defects, in
 adults 174

congestive heart failure, congenital aortocaval fistula, Amplatzer
 duct occluder 676

constructing a conduit from right ventricle to pulmonary
 arteries, Norwood procedure, use of saphenous venous
 homograft 325

coping and social support, style, congenital heart disease 122

coronary and systemic aneurysms, magnetic resonance imaging,
 Kawasaki disease 198

coronary arterial fistulas in childhood, institutional experience,
 review 380

coronary arteries, tricuspid atresia, multiple fistulas, left
 ventricle 562

correction of congenitally corrected transposition, hemi-Mustard,
 bi-directional Glenn, Rastelli operations, ventricle and
 half repair 330

current therapeutic options, morphologic features, right
 ventricular outflow tract, problems, review 533

cutaneo-mediastinal sinus, Fontan circulation with an adjustable
 fenestration 83

D

designing therapeutic strategies, dominant left ventricle,
 ventriculoarterial connections, unobstructed flow of
 blood to the lungs 630

developmental outcome, cardiac surgery in infancy, perioperative
 predictors 389

diagnosis, management, results of treatment, aortopulmonary
 window 506

dilated cardiomyopathy, ventricular preexcitation, causal
 relationship 594

diverse experience, CardioSEAL[®], STARFlex[®], septal
 occluders 367

diverticulum of the coronary sinus, complicating ablation, inferior
 paraseptal pathway 674

divided left atrium, obstruction of pulmonary venous, setting of
 hypoplasia, left heart 553

dominant left ventricle, designing therapeutic strategies,
 ventriculoarterial connections, unobstructed flow of
 blood to the lungs 630

Doppler echocardiographic predictors, outcome in newborns,
 persistent pulmonary hypertension 277

double switch operation, young infant 661

E

Ebstein's malformation, clinical profile, from the fetus to
 the adult 55

echocardiographic characteristics, venous air embolism, reversible
 pulmonary atresia, premature neonate 102

echocardiography and nuclear medicine, correlation, ventricular
 perfusion defects, right ventricular function 174

effect of peritoneal dialysis, intra-abdominal pressure,
 cardio-respiratory function in infants, cardiac
 surgery 293

elective cardiac surgery, children, parents, psychological
 functioning 131

electrical and morphological atrial abnormalities, persistent,
 closure of atrial septal defect 481

emergency trans-oesophageal ventricular pacing, in child 333

epicardial pacing in children, thirty years of experience 512

epicardial pacing, thirty years of experience, in children 512

extra-cardiac anomalies in children, population-based study,
 congenital cardiac malformations 600

F

fetal cardiology, practice, in Europe, recommendations 109

fetus, unguarded tricuspid valvar orifice 557

follow-up, congenital cardiac disease, haemodynamic
 assessment 373

Fontan circulation, cutaneo-mediastinal sinus 83

fulminant staphylococcal infection, atrial septostomy 567

G

gaseous microemboluses, after replacement of the mitral valve,
 mechanical prosthesis in a child 569

greater circulation, lesser ventricle 118

H

haemodynamic assessment, congenital cardiac disease,
 follow-up 373

Hall of Fame, Alexander Sandor Nadas

heart and other organs, after cardiac surgery, old problems and new solutions 182

human immune deficiency virus, vasculopathy of the large arteries, in children 671

hypoalbuminemia, spontaneous echoes 560

hypoplastic left heart syndrome, aberrant left brachiocephalic artery, repair in infancy of right aortic arch 441

I

implanting telehealth network, paediatric cardiology, Quebec experience 608

inferior paraseptal pathway, coronary sinus complicating ablation, diverticulum 674

institutional experience, coronary arterial fistulas in childhood, review 380

intact ventricular septum

- antenatal left ventricular failure, pulmonary atresia 335
- cleft mitral valve, transposition 550
- pulmonary atresia, outcomes, management 299
- quality of life in children, pulmonary atresia 615

interventional catheterization, pulmonary venous connection, partially anomalous 222

interventional paediatric cardiology, proposals for future training 347

intra-abdominal pressure, cardiac surgery, effect of peritoneal dialysis, cardio-respiratory function 293

intraoperative rescue, placement of a stent, surgical coronary arterial injury 93

introduction of extracardiac completion, impact, single center, total cavopulmonary connections 140

isolated haemangioma, tricuspid valve 324

K

Kawasaki disease, magnetic resonance imaging, coronary and systemic aneurysms 198

L

left atrial appendage, intrapericardial giant 338

left cervical aortic arch, proximal obstruction 453

left coronary artery

- anomalous origin, pulmonary trunk, cardiac aneurysm, resection 106
- atresia of the main stem 438
- pulmonary trunk, anomalous origin 439

left heart, setting of hypoplasia, divided left atrium, obstruction of pulmonary venous 553

left ventricle, multiple fistulas, tricuspid atresia, coronary arteries 562

left ventricular myocardial velocities, tissue Doppler echocardiography, filling of left ventricle, healthy children 156

lesser ventricle, greater circulation 118

long on QT, low on calcium 667

long-term outcomes, atrial switch, surgical correction of transposition, Mustard and Senning procedures 284

long-term survival in children, atrioventricular septal defect, common atrioventricular valvar orifice 24

long-term survival, repair of atrioventricular septal defect 3

low on calcium, long on QT 667

M

magnetic resonance imaging, coronary and systemic aneurysms, Kawasaki disease 198

main stem, atresia, left coronary artery 438

markers of arrhythmia, time course of appearance, tetralogy of Fallot 360

maternal alcoholism, QT prolongation in the newborn 565

mechanical prosthesis in a child, gaseous microemboluses, after replacement of the mitral valve 569

mechanisms of mitral valvar insufficiency, in children, adolescents, severe rheumatic heart disease, echocardiographic study 527

meta-analysis, surgical correction of transposition, atrial switch, long-term outcomes 284

minimally symptomatic patients, right ventricular dysfunction, regional and global 168

mitral valve

- Amplatzer septal occluder, growth of the patient, interventional closure of defects, oval fossa 494
- growth of the patient, Amplatzer septal occluder 494
- molecular characterisation, neonatal cardiac hypertrophy, regression 498

morphologic features, current therapeutic options, right ventricular outflow tract, problems, review 533

multiple fistulas, from the coronary arteries to the left ventricle, tricuspid atresia 562

Mustard and Senning procedures, meta-analysis, long-term outcomes, surgical correction of transposition 284

myocardial infarction in infancy, anomalous left coronary artery, from the right coronary artery 654

myotonic dystrophy, atrial flutter in childhood 89

myxomatous embolisation, secondary to, acute myocardial infarction 658

N

neonatal cardiac hypertrophy, regression, molecular characterisation 498

neonatal population, congenital cardiac disease, validity of echocardiography 585

neurocutaneous syndrome, aorta and supraaortic vessels, PHACES 206

newborn, QT prolongation, maternal alcoholism 565

Norwood procedure

- prenatal identification, outcome following, and impact of 32
- use of saphenous venous homograft, constructing a conduit from right ventricle to pulmonary arteries 325

O

obstruction of pulmonary venous return, left heart, divided left atrium, setting of hypoplasia 553

outcome in newborns, persistent pulmonary hypertension, Doppler echocardiographic predictors 277

outcomes after balloon dilation, congenital aortic stenosis, in children and adolescents, outcomes 315

oval fossa

- atrial septal defects, spontaneous closure 148
- growth of the patient, interventional closure of defects, Amplatzer septal occluder 494

P

- paediatric cardiac surgery, less privileged parts of the world 341
 paediatric cardiology
 future model, shrinking subspecialty 460
 implanting telehealth network, Quebec experience 608
 parental decision-making, congenital heart disease 309
 partially anomalous pulmonary venous connection, superior caval vein, Warden procedure 64
 patent arterial duct, thorascopic closure 164
 patients with congenitally corrected transposition, prenatal diagnosis, short-term outcome for patients 265
 perioperative predictors, developmental outcome, following cardiac surgery in infancy 389
 persistent pulmonary hypertension, Doppler echocardiographic predictors, outcome in newborns 277
 PHACES, neurocutaneous syndrome, aorta and supraaortic vessels, anomalies 206
 population-based study, extra-cardiac anomalies in children, congenital cardiac malformations 600
 positional cyanosis, right-sided cardiac masses, unusual presentation 46
 practice of fetal cardiology, in Europe, recommendations 109
 prenatal diagnosis, short-term outcome, patients with congenitally corrected transposition 265
 prenatal identification, Norwood procedure, outcome following, and impact of 32
 preoperative diagnosis, co-existing divided left atrium, tetralogy of Fallot 456
 problems with right ventricular outflow tract, current therapeutic options, morphologic features 533
 proposals for future training, interventional paediatric cardiology 347
 proximal obstruction, left cervical aortic arch 453
 psychological functioning, parents, children undergoing elective cardiac surgery 131
 pulmonary arteriovenous malformations, biological scrabble, setting of cavopulmonary surgery 417
 pulmonary atresia
 intact ventricular septum, antenatal left ventricular failure 335
 management, outcomes, intact ventricular septum 299
 quality of life in children, intact ventricular septum 615
 obstructive bicuspid aortic valve, tetralogy of Fallot 99
 pulmonary trunk
 anomalous origin, left coronary artery 439
 left coronary artery, cardiac aneurysm, resection 106
 pulmonary venous connection, partially anomalous, interventional catheterization 222

Q

- QT prolongation in the newborn, maternal alcoholism 565
 quality of life in children, pulmonary atresia, intact ventricular septum 615
 quantitative analysis, right atrial performance, surgical repair, tetralogy of Fallot 520
 Quebec experience, implanting telehealth network, paediatric cardiology 608

R

- regional right and left ventricular function, Senning operation, ultrasonic study of strain rate and strain 255

- repair in infancy, hypoplastic left heart syndrome, aberrant left brachiocephalic artery 441
 repair of aortic coarctation, temporary ascending to descending aortic bypass, collateral circulation 39
 repair of atrioventricular septal defect, long-term survival 3
 repair of critical tricuspid regurgitation, ruptured papillary muscle, in a newborn 450
 replacement of the mitral valve, after, gaseous microemboluses, mechanical prosthesis in a child 569
 restenosis, aortic stenting 210
 reversible pulmonary atresia, venous air embolism, echocardiographic characteristics 102
 review of an institutional experience, coronary arterial fistulas in childhood, review of the literature 380
 right aortic arch, repair in infancy, aberrant left brachiocephalic artery, hypoplastic left heart syndrome 441
 right atrial performance, tetralogy of Fallot, quantitative analysis, surgical repair 520
 right ventricular dysfunction, regional and global, asymptomatic or minimally symptomatic patients, congenitally corrected transposition 168
 right ventricular function, ventricular perfusion defects, congenitally corrected transposition 174
 right ventricular outflow tract, problems, morphologic features, current therapeutic options 533
 right-sided cardiac masses, unusual presentation, positional cyanosis in infants 46
 routine echocardiography, after uncomplicated catheter ablation, in children 386
 ruptured papillary muscle, in a newborn, repair of critical tricuspid regurgitation 450

S

- saphenous venous homograft, conduit from the right ventricle to the pulmonary arteries, Norwood procedure 325
 Senning operation, ultrasonic study of strain rate and strain, regional right and left ventricular function 255
 septal occluders, STARFlex[®], CardioSEAL[®], diverse experience 367
 septuagenarian, atrial fibrillation, closure of a patent arterial duct 328
 setting of cavopulmonary surgery, pulmonary arteriovenous malformations, biological scrabble 417
 setting of hypoplasia, obstruction of pulmonary venous, hypoplasia of the left heart, divided left atrium 553
 setting of tetralogy of Fallot, longevity, survival to the 84th year 664
 severe rheumatic heart disease, clinical and epidemiological correlations, mechanisms of mitral valvar insufficiency, echocardiographic study 527
 short-term outcome for patients, patients with congenitally corrected transposition, prenatal diagnosis 265
 solitary trunk from right ventricle, cleft mitral valve, trifoliate left valve, atrioventricular septal defect 444
 spontaneous echoes, hypoalbuminemia 560
 staphylococcal infection, fulminant, atrial septostomy 567
 STARFlex[®], CardioSEAL[®], septal occluders, diverse experience 367
 stent, surgical coronary arterial injury, intraoperative rescue 93

superior caval vein, partially anomalous pulmonary venous connection, Warden procedure 64
 surgical coronary arterial injury, intraoperative rescue, stent 93
 surgical correction of transposition, Mustard and Senning procedures, meta-analysis, atrial switch 284
 surgical management, Blalock-Taussig shunts, infected, modified 219
 surgical repair, quantitative analysis, tetralogy of Fallot, right atrial performance 520
 surgical treatment, atrial septal defect, vestibular defect 212

T

temporary ascending to descending aortic bypass, collateral circulation, repair of aortic coarctation 39
 tetralogy of Fallot
 markers of arrhythmia, time course of appearance 360
 obstructive bicuspid aortic valve, pulmonary atresia 99
 preoperative diagnosis, co-existing divided left atrium 456
 setting of, longevity, survival to the 84th year 664
 surgical repair, right atrial performance, quantitative analysis 520
 The International Working Group, Mapping and Coding of Nomenclatures, Paediatric and Congenital Heart Disease, update 225
 thorascopic closure, patent arterial duct 164
 topical recombinant tissue plasminogen activator, balloon angioplasty, Blalock-Taussig shunt, recanalization 322
 total cavopulmonary connections, introduction of extracardiac completion, impact, single center 140
 trans-oesophageal ventricular pacing, emergency, in child 333
 transposition, intact ventricular septum, cleft mitral valve 550
 trends in chromosomal investigation, in children, cardiovascular malformations 622
 tricuspid atresia, left ventricle, coronary arteries, multiple fistulas 562
 tricuspid valvar orifice, unguarded, fetus 557
 tricuspid valve, isolated haemangioma 324
 trifoliate left valve, atrioventricular septal defect, common atrioventricular junction, solitary trunk from right ventricle, cleft mitral valve 444
 Turner's syndrome, sudden unexpected cardiac death 192
 Type A postaxial polydactyly, atrioventricular septal defect 215

U

ultrasonic study of strain rate and strain, regional right and left ventricular function, Senning operation 255
 uncomplicated catheter ablation in children, routine echocardiography 386
 unguarded tricuspid valvar orifice, fetus 557
 unobstructed flow of blood to the lungs, dominant left ventricle, designing therapeutic strategies, ventriculoarterial connections 630
 update, The International Working Group, Mapping and Coding of Nomenclatures, Paediatric and Congenital Heart Disease 225

V

validity of echocardiography, congenital cardiac disease, neonatal population 585
 variable clinical presentation, ventricular myocardium, noncompaction, in infants and children, cardiomyopathy 409
 vasculopathy of the large arteries, in children, human immune deficiency virus 671
 venous air embolism, reversible pulmonary atresia, echocardiographic characteristics 102
 ventricle and half repair, correction of congenitally corrected transposition, hemi-Mustard, bi-directional Glenn operations 330
 ventricular myocardium, variable clinical presentation, infants, cardiomyopathy, children, noncompaction 409
 ventricular perforation, cardioverter lead, small child 197
 ventricular perfusion defects, right ventricular function, congenitally corrected transposition 174
 ventricular preexcitation, dilated cardiomyopathy, causal relationship 594
 vestibular defect, atrial septal defect, surgical treatment 212

W

Warden procedure, partially anomalous pulmonary venous connection, superior caval vein 64

Y

young infant, double switch operation 661
