health system, developing a consensus framework for, S51
Community preparedness and response planning, integration of health center, 96
planning for, pandemic influenza, 76
Death notice surveillance, Hurricane Katrina, confirming suspicions of excess mortality, 15
Department of Homeland Security, health care and public response after 9/11, 7
Developing countries, vulnerability to disasters, 13
Disaster Medicine and Public Health Preparedness discussion for assessing and improving disaster medicine, 71
population-focused thinking to minimize impact, 71
welcome addition to the profession, 7
welcome from editor-in-chief, 2

- Disaster preparedness/response
 community emergency preparedness and, health center integration, 96
 domestic incident management, coordinated national approach to, 5
 lack of, developing countries, 13
 Pandemic and All-Hazards Preparedness Act for, 9
 public health and emergency care, networking of, 142
 public health emergencies, consensus framework for, S51
 researching and surveying the field, 57
 tornadoes, regional response system, 67
 Disaster training, ensuring appropriate and effective response, S3
- Earthquakes
 central Japan, damage and destruction of, 78
 Peru, road and housing damages in, 78
- Eczema, and atopic dermatitis, risk factor of smallpox vaccine, 11
- Emergency medical services
 collaborating with public health, 72
 interoperability among public health, 142
 mass casualties, overtriage and critical mortality, S14
 tactical, public safety support during hostile mass casualty event, S55
- Emergency operations center, functions of, bioevent disasters, 135
- Emergency response, communication and collaboration, 71
- Emergency Response Fund (CERF), United Nations, grant- and loan-making capacity of, 13
- Ethics
 medical, principles of, high-consequence events, 51
 physician's obligations, obligations to patients and public, S38
- Fatalities, building bombings, risk for structural collapse, 27, 31
- Flooding, south Asia, global climate change, 78
- Forensic pathology, public information officers, training in morgue and medicolegal death management, S25
- Global surveillance, new International Health Regulations for, 117
- Health Action in Crises (HAC), assessing health priorities in emergency settings, 7
- Health centers, planning and response, targeted resources for community integration, 96
- Health system response, Virginia Tech mass casualty incident, S9
- Hepatitis B and C virus, postexposure and prophylaxis to, traumatic explosive events, 106
- HIV, postexposure and prophylaxis to, traumatic explosive event, 106
- Hospital surge capacity
 after emergencies, lifeboat ethics, 51
 mass casualties, overtriage and critical mortality after, S14
- Humanitarian crises
 dilemmas of neglected, 69
 operational definition of need, relevant data sources, 110
- Hurricanes
 excess mortality in the aftermath of, 15
 physician relocation following, 21
 preparedness planning challenges, 8
 voluntarism in the wake of, 44
- Incident command system, bioevent disasters within, emergency operations and health unified command centers, 135
- Infectious disease, prevention of emerging/reemerging, global public health surveillance, 117
- Injury severity score (ISS)
 critical mortality rate calculation, 67
 tornado-related, analyzing natural disasters, 90
- International Health Regulations, global legislation and surveillance guidelines, 117
- Lifeboat ethics, high-consequence events, discharging of hospital inpatients, 51
- Mass casualties
 school and workplace violence, resistance, resilience and recovery from, S33
 traumatic explosive events, bloodborne pathogens, 106
 urban nuclear attack, adequate medical response to, 80
 Virginia Tech
 immediate behavioral health response, S31
 regional health system response, S9
- Media coverage, independently tracked, humanitarian stories, 69
- Medical air transport, thermal injuries from nuclear attack, prediction modeling to determine adequacy, 80
- Medical examiner system response, multiple fatality event, management procedures, S25
- Mental health
 restrictive gun laws, federal and state databases, S43
 school and workplace violence, resistance, resilience and recovery from, S33
- Mortality data, aftermath of Hurricane Katrina, 15
- Mortality rates, critical
 injury severity scores for, 67
 tornado-related injuries, 90
- Natural disasters, mortality reporting, aftermath of Hurricane Katrina, 15
- Nuclear weapons
 terrorism threats using, world-changing impact, 65
 thermal casualties, burden of care for, 80
- Pandemic and All-Hazards Preparedness Act, Assistant Secretary for Preparedness and Response, 9
- Pandemics/epidemics
 bioevent disaster, triage management and surge capacity decisions, 135
 influenza, community preparedness planning, 76
- Patient confidentiality, physicians' ethical obligations for, Virginia Tech shootings, S38
- Physicians, displacement of, relocation following Hurricane Katrina, 21
- Postexposure immunization and prophylaxis, bloodborne pathogens, traumatic explosive event, 106
- Posttraumatic stress disorder (PTSD)
 burden of mental illness after tsunamis, 41
 sex disparities and prevalence of, Sri Lanka population, 34
- Public health
 and the emergency care community, improvement of preparedness efforts, 142
 preparedness planning, pandemic influenza, 76
- Public health system
 alternative sources for mortality information, Hurricane Katrina, 15
 collaboration of medicine, 72
 interoperable and integrated, disaster response, S51
 major gaps in delivery of health care, Hurricane Katrina, 44
 preparedness
 disaster medicine and, 57
 disaster medicine and, 64
 professional disciplines, crossing territorial boundaries, 3
 violence prevention, physicians' ethical obligations, S38
- Public safety
 gun violence, issues of policy and laws, S43
 tactical EMS support of, hostile mass casualty incident, S55
 US colleges and universities, campus police and security agencies for, S47
- Refugees, global increase in, 78
- Research and development
 public health disasters, response to, 57
 vaccines and pharmaceuticals, Assistant Secretary for Preparedness and Response, 9
- Schools and universities
 active shooters on campus, conflicting advice and maintaining perspective, S57
 campus police and security agencies at, federal and state funding of, S47
 mass violence, back to basics of public health, S4
 Security, college campuses
 active shooters on, S57
 stakeholder assessment and recommendations, S47
 September 11, 2001, domestic incident management, national approach to, 5
 Smallpox vaccinations, adverse event related to, 11
 Suicide bombing
 bloodborne pathogens, postexposure immunization and prophylaxis of, 106
 Glasgow International Airport, links to terrorist groups, 78
 Support services, professional disciplines, breaking down territorial boundaries, 3
 Surge capacity, decision making during bioevents, preventing disease transmission, 135
- Tarasoff laws, violence prevention warnings, physicians' ethical obligations, S38
- Territorial boundaries, breaking down of, professions and disciplines, 3
- Terrorism
 bombings, preparedness and response to, 72
 improving preparedness efforts, linking public health and emergency care community, 142
 nuclear weapons, world-changing impact, 65
- Terrorist attacks
 building bombings, preventing fatalities, 27, 31
 September 11, 2001, domestic incident management, 5
- Thermal burns, urban nuclear attack, medical response to, 80
- Tornadoes
 and disaster management, acute care medicine and public health, 67
 EF-5
 devastation in Greensburg, 63
 EF5, regional health system response to, 90
- Trauma system
 level 3 centers, Virginia Tech casualties, S9
 overtriage effects on increased mortality, S14
 response, limited mass casualty event, S7
- Triage
 ethical considerations in, hospital surge capacity, 51
 mass casualty incident, critical mortality after, S14
 protocols and decision making, bioevent disasters, 135
- Tsunami
 Indian Ocean
 slow recovery of, 13
 Sri Lanka, prevalence of PTSD, 34
 population screening for PTSD after, 41
- Violence
 gun, protecting the public's health, S43
 mass, safer schools in an age of, S4
 school and workplace, research on interventions that promote recovery from, S33
- Virginia Tech shootings
 call for standardized training, S3
 collateral damage, S1
 identifying factors contributing to, S2
 immediate behavioral health response to, S31
 inspiration in the face of tragedy, S6
 lessons from response to, S7
 regional health system response to, S9
- Volunteer Health Practitioners
 liability protections for, 73
 patient surge capacity after emergencies, 44
- Workers' compensation, liability for harm to volunteer health practitioners, 44
