F. G. BAILEY

In doing so, it analyzes political problems of a universal concern: incivility in public life, the inescapable dilemma of duty in tension with interests, and true believers contesting realists who see virtue in compromise. \$39.95 cloth, \$15.95 paper

NEW TITLES IN ASIAN STUDIES

***Even the Gods Rebel: The Peasants of Takaino and the 1871 Nakano Uprising in Japan*, by Selçuk Esenbel**

Even the Gods Rebel reexamines much of the history of nineteenth-century rural Japan through the lens of a single uprising. In this way, we learn about conflict, growth, community, political influence, administration, and the transition from Tokugawa to Meiji. By showing that the Nakano rebellion arose from the peasant tradition of communal uprisings, Esenbel has produced a powerful and original reinterpretation of the causes of change in rural Japan.

Deadly Dreams

Opium and the Arrow War (1856-1860) in China

J.Y. Wong

Many have accepted that the Arrow War (1856-60) was caused by an insult to the British flag belonging to the pirate boat *Arrow*. Dr. Wong argues that Britain's reliance on the opium trade with China played a far greater role in pushing the diplomatic conflict into war. The war was not a simple diplomatic squabble: it involved vital economic interests in British India, which had to be protected at all costs. Dr. Wong offers penetrating insights into theories of imperialism and how they might be reassessed.

Father India explores the life-changing influence of the subcontinent on Western ideas of modernity through the spell-binding stories of a succession of 20th-century Westerners — including E. M. Forster, Carl Jung, W.B. Yeats, Christopher Isherwood, V. S. Naipaul, and Martin Luther King, Jr. — who acted out their most secret dreams in India.

DRU C. GLADNEY

Majorities are made, not born. This book argues that there are no pure majorities in the Asia-Pacific region, broadly defined, nor in the West, and challenges the thesis that civilizations are composed of more or less homogeneous cultures. The 14 contributors argue that emphasis on minority/majority rights is based on uncritically accepted views of purity, numerical superiority, and social consensus.

"This is a vintage yield of Ueda's work—a small book, deceptively simple, but an outstanding contribution to the appreciation of Japanese poetry and the narrow store of Western scholarship on Japan. It is not only the first English biography of Buson, in many ways the most rewarding of the haiku poets, but the finest introduction to his poetic art." —Howard Hibbett,

The Book in Japan

A Cultural History from the Beginnings to the Nineteenth Century

Peter Francis Kornicki

This study deals with all aspects of the history of the book in Japan, from the production of manuscripts and printed books to book-collecting, libraries, censorship and readership. It also sets books in the context of Japan's cultural ties with China, Korea and Parhae.

The focus is on the history of both texts and physical books. This encompasses not only books in Japanese but also books in Chinese by Chinese and Korean authors, and some Western books as well.

It is an essential reference tool and bibliographic guide for all those interested in book studies, and particularly of importance for historians of Japanese culture. It is illustrated with examples taken from various collections of early Japanese books in Europe.

Readership: All graduate students and scholars specialising in the study of pre-modern Japanese history of literature; librarians in general and specialists in the history of the book in general.

Peter Francis Kornicki, Ph.D. (1979), University of Oxford, is Reader in Japanese History and Bibliography at the University of Cambridge. He has published *Early Japanese Books in Cambridge University Library* (1991) and co-edited the *Cambridge Encyclopedia of Japan* (1993).

ASIAN VALUES AND HUMAN RIGHTS

*A Confucian
Communitarian
Perspective*

**WM. THEODORE
DE BARY**

In this provocative book, one of our most learned scholars of China moves beyond the political shouting match surrounding human rights in China by contextualizing this debate from a Confucian and a historical perspective. Highlighting the philosophical development of Confucianism as well as the Chinese historical experience with community organization, constitutionalism, education, and women's rights, de Bary argues that while the Confucian sense of personhood differs in some respects from Western libertarian concepts of the individual, it is not incompatible with human rights.

THE WAGES OF AFFLUENCE

*Labor and Management
in Postwar Japan*

ANDREW GORDON

Andrew Gordon goes to the core of the Japanese enterprise system—the workplace—and reveals a complex history of contest and confrontation. Though the Japanese model produced a dynamic economy, managerial hegemony was achieved only after a bitter struggle that undermined the democratic potential of postwar society. Beginning with the Occupation reforms and their influence on the workplace, Gordon traces worker activism in the 1950s and '60s, and how it gave way to management victory in the 1960s and '70s. He illuminates the Japanese system with frequent references to other capitalist nations, and looks to Japan's future, rebutting hasty predictions that Japanese industrial relations are about to be dramatically transformed in the American free-market image.

CHINA

*A New History
Enlarged Edition*

**JOHN KING FAIRBANK
AND MERLE GOLDMAN**

The late John King Fairbank was the West's doyen on China, and this book is the full and final expression of his lifelong engagement with this vast ancient civilization. This book remains a masterwork without parallel—a concise and authoritative account of China and its people over four millennia. The distinguished historian Merle Goldman has brought the book up to date with a chapter on events in the post-Mao period and a new preface and epilogue.

"This new edition is superb. The interpretative themes structuring Goldman's concluding chapter are strong and convincing. Illuminating comparisons are drawn between the Deng Xiaoping and earlier eras."

GROWTH TRIANGLES IN ASIA

A New Approach to Regional Economic Cooperation
Second Edition

Edited by MYO THANT, MIN TANG, and HIROSHI KAKAZU

The "growth triangle" is a newly popular form of regional economic cooperation in Asia that involves bringing together the resources of three countries to collectively foster economic development in each. In studying three such triangles—in southern China; on the borders of Singapore, Indonesia, and Malaysia; and in the Tumen River Delta on China's northeast border—these essays define, explore, and debate the issues surrounding the establishment of such entities.

ASIA IN THE MAKING OF EUROPE

Volume III: A Century of Advance

DONALD F. LACH and EDWIN J. VAN KLEY

A New York Times Book Review Notable Book of the Year

This monumental series, acclaimed as a "masterpiece of comprehensive scholarship" in the *New York Times Book Review*, reveals the impact of Asia's high civilizations on the development of modern Western society. The authors examine the ways in which European encounters with Asia have altered the development of Western society, art, literature, science, and religion since the Renaissance.

In Volume III: *A Century of Advance*, the authors have researched seventeenth-century European writings on Asia in an effort to understand how contemporaries saw Asian societies and peoples.

Book 1: Trade, Missions, Literature discusses Christian missions and trade and conquest in the East. It examines the various histories, reports, letterbooks, and travelogues printed and widely disseminated throughout Europe in the seventeenth century. Individual chapters cover literature from Iberia, Italy, France, the Netherlands, Germany, Denmark, and England.

Book 2: South Asia examines the European images of the lands, societies, religions, and cultures of the Mughul Empire, Goa, Bijapur, Kanara, Malabar, Coromandel, and insular South Asia including the Maldivic and Laccadive Archipelagoes and Ceylon.

Book 3: Southeast Asia examines European images of the lands, societies, religions, and cultures of Southeast Asia. The continental nations of Siam, Vietnam, Malaya, Pegu, Arakan, Cambodia, and Laos are discussed, as are the islands of Java, Bali, Sumatra, Borneo, Amboina, the Moluccas, the Bandas, Celebes, the Lesser Sundas, New Guinea, Australia, New Zealand, the Philippines, Mindanao, Jolo, Guam, and the Marianas.

Book 4: East Asia examines European images of China during the late Ming and early Ch'ing dynasties, ranging from its religious practices, customs, and intellectual life to its geography and climate. Additional chapters discuss Japan, Tibet, Korea, Taiwan, and Inner Asia. This book also contains an epilogue to the entire third volume, as well as bibliographies and the cumulative index.

RECORDS OF WIND AND EARTH: A TRANSLATION OF FUDOKI, WITH INTRODUCTION AND COMMENTARIES

by Michiko Y. Aoki

In A.D. 713, the Japanese central government ordered all provincial governors to compile surveys of their respective regions, including products, animals, plants, land conditions, etymologies of place names, legends, and oral traditions. The five extant "old" *fudoki* translated in *Records of Wind and Earth* are all that remain of these early reports. Three of these *fudoki* (Harima, Bungo, and Hizen) are being made available here for the first time in English. This collection contains invaluable records for any English-speaking person wishing to understand the early history of Japan—its land, its people, and its earliest literature.

RIVER OF SORROW: ENVIRONMENT AND SOCIAL CONTROL IN RIPARIAN NORTH INDIA, 1770-1994

by CHRISTOPHER V. HILL

In this analysis of colonial attempts to control and manage the agrarian region surrounding the Kosi River, Hill argues that colonial ecological, political, and social policies were inextricably intertwined. The colonial administrators set about "improving" India's physical environment, just as they "improved" its social and political climate. In so doing, they were ill-prepared to understand, let alone administer, a river such as the Kosi—which traced a violent and erratic course out of the Himalayas, "carrying thousands of tons of silty sand and destroying everything in its path." The ecological paternalism imposed by the colonial governors introduced social and revenue policies that were to have a profound effect on the peasantry that continues to this day.

The Institute's world-renowned economists analyze the financial catastrophe plaguing the region and recommend urgent steps to reverse its decline.

"The Institute...is one of Washington's most influential think tanks. Its studies often frame the intellectual debate on trade and technology issues."

—The Wall Street Journal

**The Asian Financial Crisis:
Causes, Cures, and Systemic Implications**

Morris Goldstein

The economic turmoil that has rocked Asia is the third major currency crisis of the 1990s. *How could this happen to such a high-performing region? How can the crisis be overcome and what can prevent it from happening again?* Morris Goldstein explains how the Asian financial crisis arose and spread and then outlines what needs to be done to fix it. He also discusses the role of the IMF and offers specific proposals for improving the international financial architecture.

"A first-rate piece of work...an excellent and comprehensive discussion of why the Asian crisis occurred and what would be the appropriate policy responses."

—Frederic S. Mishkin, Professor of Economics, Graduate School of Business, Columbia University.

Global Economic Effects of the Asian Currency Devaluations

Marcus Noland, Li-Gang Liu, Sherman Robinson, and Zhi Wang

This quantitative analysis analyzes exchange rate changes caused by the Asian financial crisis and their impact on international trade and economic activity in the United States, Asia, and the rest of the world. The study examines the risk of increased protectionist pressure in the United States and what will happen if China devalues its currency.

"This is a clear and well argued analysis of the crisis in Asia...(It) adds significantly to our understanding of the key policy issues facing Asia and the United States in the aftermath of the crisis."

—Warwick J. McKibbin, Australian National University and The Brookings Institution.

July 1998. 124 pages. ISBN: 0-88132-260-1. \$15.95.

Restoring Japan's Economic Growth

Adam S. Posen

Will the Japanese government take the decisive but feasible policy actions needed to bring about economic recovery? Only one-third of the announced stimulus packages of 1992-97 was actually undertaken, and Japan's problems are due primarily to huge policy errors rather than structural problems. This timely and detailed analysis explains why a shift in Japanese fiscal and monetary policies is urgently needed and outlines a program for putting the country back on the path to solid economic growth. The author also draws broader lessons from recent Japanese policy actions that led to the economy's stunning decline.

"Japan's persistent stagnation is among the most important problems confronting the world economy today, and Adam Posen's treatment of it is the best I have seen. His analysis is right on the mark, and his policy proposals bear attention at the highest level of the Japanese government."

—Benjamin Friedman, Harvard University

POLITICS AND TRANSCENDENT WISDOM

The *Scripture for Humane Kings* in the Creation of Chinese Buddhism
CHARLES D. ORZECH

"Orzech's project forces a rethinking of the relationship between religion and politics that scholars in all fields of religion will find intriguing. His focus is a Buddhist text authored in China but made to look like a translation from Sanskrit. His study excavates what the winds of history and the biases of history-writers have covered up: the fact that Tantric Buddhism occupied a crucial position in medieval Chinese civilization."

—Stephen F. Teiser, Princeton University

This volume presents for the first time a full, annotated translation of the *Scripture for Humane Kings*.
