**Leading the way in the study of all aspects of
infection of man and animals ...**

Epidemiology and Infection

Aims and Scope

Epidemiology and Infection presents reports of research and original findings in all subjects related to infectious diseases. It gives particular emphasis to the epidemiology, prevention and control of such diseases, but the field covered is broad and includes microbiology, virology, immunology, sanitary bacteriology, food hygiene, statistics and the clinical, diagnostic and social aspects of infectious diseases. Papers cover both the medical and veterinary field and come from scientists worldwide.

Editorial Policy

Epidemiology and Infection started life as the 'Journal of Hygiene' and is now the longest established journal in the field of microbiology. **Epidemiology and Infection** has contained many important and seminal papers on such topics as scarlet fever, typhoid, pathogenic microbes in milk, bacteriological examination of water and the like.

It is still the home for important papers on these topics but also has become the key periodical in which to find the latest reports on recently discovered infections and new technology. In the new title, used since 1987, the word 'Infection' reflects the broadly based nature of the journal and 'Epidemiology' the particular slant of the journal since it was founded. The editors' overriding policy is to publish high quality articles in the shortest possible time (some articles are published in as little as 4 months). The success of this policy is shown by the very high submission rate from authors and the journal's high impact factor and long cited half life (SCI Journal Citation Report).

Why You Should Subscribe

- high-quality articles
- international coverage
- rapid publication
- regular review articles
- covers wide subject area
- book reviews
- high quality & accurate production
- colour illustrations where this enhances understanding
- no page charges and free offprints for authors
- wide audience

Subscription Information

Six issues a year in 2 volumes. Volumes 116 & 117 in 1996. £190; £97 for members of the Society for Infectious Diseases and British Society for the Study of Infection. Airmail £36 per year extra. ISSN 0950-2688.
