### **Scope of the Journal**

Clay Minerals - Journal of Fine Particle Science publishes electronically and in paper form research papers about clays, clay minerals and related materials, natural or synthetic. Aspects covered include: Earth Processes (interactions in 'system earth' ± soil science, and geology/mineralogy) including genesis/synthesis, phase transformations, stability, weathering, soil-organic interactions, ion-exchange, basin analysis, clay petrology; Solid State Chemistry/Materials Science ± synthesis, structure and dynamics, reactivity, crystal chemistry, mechanical, thermal, electrical properties, micro and nanophase materials; Environmental Science ± analytical methods, elemental distribution, waste containment, health issues, environmental impact assessment, conservation of cultural heritage; Colloid/Surface Science ± adsorption, colloid stability, surface chemistry, reactivity; and Applied Science and Technology ± industrial uses and technical applications, including mining and processing of clay, zeolite (and other) deposits and application in ceramics, paper, paint, polymer, ion-exchange, sorption, catalysis etc.

### **Submission of manuscripts**

In a letter accompanying the manuscript, the submitting author must state that all authors agree with the final version of the manuscript. The letter must also state that the manuscript has not previously been published elsewhere, either in full or in part, and that, while under review for Clay Minerals, it will not be submitted to any other publication. Authors are encouraged to suggest up to three possible reviewers for their papers.

All manuscripts are to be submitted online at <http://www.edmgr.com/clayminerals/>. The current set of instructions for authors is available at: <https://www.cambridge.org/CLM>

All authors are allowed, free of charge, an e-print of their papers published in the journal.

### **Join the Mineralogical Society today**

If you are a regular reader of Clay Minerals consider joining the Society and receiving your own copy four times a year at a very modest cost. Membership currently starts at £55 per annum. For this, you will receive bi-monthly copies of Elements, our international membership magazine (in full colour) on mineralogy, geochemistry and petrology as well as online access to Mineralogical Magazine, Clay Minerals and Elements. You may also opt to pay an additional premium in order to continue receiving paper copies of our journals. Full details on how to join the Society and an application form can be found on the Society's website at [www.minersoc.org](http://www.minersoc.org). Membership of the Society introduces you to a vibrant community of those interested in the mineral sciences. Through membership of one or more of the Society's eight special interest groups you can take an active part in the Society's numerous scientific meetings and conferences as described on the website.

### **Mineralogical Society Journals**

#### *Mineralogical Magazine*

International journal of mineral sciences which covers the fields of mineralogy, crystallography, geochemistry, petrology, environmental geology and economic geology. This journal is available primarily as an e-journal.

#### *Clay Minerals*

International journal of clay minerals and fine particle science, published four times a year, including research papers about clays, clay minerals and related materials, natural or synthetic. The journal includes papers on Earth processes, soil science, geology/mineralogy, chemistry/material science, colloid/surface science and applied science and technology. The journal is available primarily as an e-journal.

### **Copyright**

For both the paper and electronic versions, copyright of all papers accepted shall be assigned to the Mineralogical Society before publication, except where Crown Copyright is reserved.

## CONTENTS

### Articles

- XUEFEN ZHANG, MINGXUE XIANG, ZHONGBANG ZHU, YOUQIN ZOU and PING ZHANG: Hierarchical layered double hydroxide for the removal of charged dyes: the role of an anionic surfactant 169
- BURCU ERDOĞAN, ORKUN ERGÜRHAN and ASLIHAN ANTER: Influence of acid activation on the  $\text{NH}_3$ -adsorption properties of a Turkish bentonite 178
- HADI ROUHANI, FATOLA FARHADI, MAHSA AKBARI KENARI, EFFAT ESKANDARI and SEERAM RAMAKRISHNA: Selection of suitable bentonite and the influence of various acids on the preparation of a special clay for the removal of trace olefins from aromatics 185
- HASAN ALI TANER and VILDAN ONEN: Study of chalcopyrite flotation in the presence of illite using a design of experiments approach 197
- LIHUI LIU, SHUAI ZHANG, QINFU LIU, LINSONG LIU and YOUJUN DENG: Palaeoclimate, palaeosalinity and redox conditions control palygorskite claystone formation: an example from the Yangtaiwatan Basin, northwest China 210
- BURCU ERDOĞAN and FAHRI ESENLİ: Sepiolite as an efficient adsorbent for ethylene gas 222
- GEORGIA LEONTOPOULOU, GEORGIOS E. CHRISTIDIS, GRIGORIOS ROUSAKIS, NOÉMI S. MÜLLER, GEORGE PAPANATHANASSIOU and MARIA GERAGA: Provenance analysis of sediments in the south-east Aegean during the Upper Quaternary: a composite approach based on bulk and clay mineralogy and geochemistry 229
- YAN WU, SHIANG HE, DONGMEI LI, YANG LI and HAO WANG: Esterification of naphthenic acids with various structures over tungstophosphoric acid-intercalated layer double hydroxide catalysts with various interlayer spacings 250
