Mathematics

Books and Journals from Cambridge University Press

Cambridge is a world leading publisher in pure and applied mathematics, with an extensive programme of high quality books and journals that reaches into every corner of the subject.

Our catalogue reflects not only the breadth of mathematics but also its depth, with titles for undergraduate students, for graduate students, for researchers and for users of mathematics.

We are proud to include world class researchers and influential educators amongst our authors, and also to publish in partnership with leading mathematical societies.

CAMBRIDGE UNIVERSITY PRESS

https://doi.org/10.1017/jfm.2016.861 Published online by Cambridge University Press

544 Internal wave attractors: different scenarios of instability
C. Brouzet, E. Ermanyuk, S. Joubaud, G. Pillet & T. Dauxois

569 Turbulent boundary layer response to the introduction of stable stratification
T. Van Buren, O. Williams & A. J. Smits

582 Aeroacoustic source mechanisms of a wavy leading edge undergoing vortical disturbances
J. M. Turner & J. W. Kim

612 Reverse Marangoni surfing
V. Vandadi, S. J. Kang & H. Masoud

622 Investigation of symmetry breaking in periodic gravity–capillary waves
T. Gao, Z. Wang & J.-M. Vanden-Broeck

642 On the threshold for wave breaking of two-dimensional deep water wave groups in the absence and presence of wind
A. Saket, W. L. Peirson, M. L. Banner, X. Barthelemy & M. J. Allis

659 Onset of thermoacoustic instability in turbulent combustors: an emergence of synchronized periodicity through formation of chimera-like states
S. Mondal, V. R. Unni & R. I. Sujith

682 An entrainment model for lazy turbulent plumes
P. Carlotti & G. R. Hunt

701 Linear instability of low Reynolds number massively separated flow around three NACA airfoils
W. He, R. S. Gioria, J. M. Pérez & V. Theofilis

742 Scaling theory for vortices in the two-dimensional inverse energy cascade
B. H. Burgess & R. K. Scott

JFM Rapids (online only)

R1 Note on the limitations of the Theodorsen and Sears functions
U. Cordes, G. Kampers, T. Meißner, C. Tropea, J. Peinke & M. Hölling

R2 Geometrical shock dynamics for magnetohydrodynamic fast shocks
W. Mostert, D. I. Pullin, R. Samtaney & V. Wheatley

S R3 An orientational order transition in a sheared suspension of anisotropic particles
N. K. Marath, R. Dwivedi & G. Subramanian

R4 Optimal perturbation growth in axisymmetric intrusions
B. R. Sutherland & C. P. Caulfield

R5 Parameter dependences of the onset of turbulent liquid-jet breakup
A. R. Kerstein, A. Movaghar & M. Oevermann

S indicates supplementary data or movies available online.

811

ISSN 0022-1120

Journal of Fluid Mechanics

25 January 2017

1 Resonance wave pumping with surface waves
R. A. Carmigniani, M. Benoit, D. Violeau & M. Gharib

S 37 Entrainment and topology of accelerating shear layers
G. A. Rosi & D. E. Rival

51 A model for Faraday pilot waves over variable topography
L. M. Faria

67 A model for confined vortex rings with elliptical-core vorticity distribution
I. Danaila, F. Kaplanski & S. S. Sazhin

95 Sensitivity of wavepackets in jets to nonlinear effects: the role of the critical layer
G. Tissot, M. Zhang, F. C. Lajús Jr, A. V. G. Cavalieri & P. Jordan

138 Generation and characteristics of vortex rings free of piston vortex and stopping vortex effects
D. Das, M. Bansal & A. Manghnani

168 Toward approximating non-local dynamics in single-point pressure–strain correlation closures
A. A. Mishra & S. S. Girimaji

189 Spectrograms of ship wakes: identifying linear and nonlinear wave signals
R. Pethiyagoda, S. W. McCue & T. J. Moroney

S 210 Mobility of an axisymmetric particle near an elastic interface
A. Daddi-Moussa-Ider, M. Lisicki & S. Gekle

234 Prediction of installed jet noise
B. Lyu, A. P. Dowling & I. Naqavi

269 Theory of Mach reflection of detonation at glancing incidence
J. B. Bdzil & M. Short

315 Nusselt numbers for Poiseuille flow over isoflux parallel ridges accounting for meniscus curvature
T. L. Kirk, M. Hodes & D. T. Papageorgiou

350 Swirl boundary layer and flow separation at the inlet of a rotating pipe
F.-J. Cloos, D. Stapp & P. F. Pelz

372 Heat/mass transport in shear flow over a reactive surface with inert defects
P. N. Shah, T. Y. Lin & E. S. G. Shaqfeh

400 Inherently unstable internal gravity waves due to resonant harmonic generation
Y. Liang, A. Zareei & M.-R. Alam

421 Revisiting the law of the wake in wall turbulence
D. Krug, J. Philip & I. Marusic

S 436 Inertial flow of a dilute suspension over cavities in a microchannel
H. Haddadi & D. Di Carlo

468 Coherent structure colouring: identification of coherent structures from sparse data using graph theory
K. L. Schlueter-Kuck & J. O. Dabiri

487 Stirring by periodic arrays of microswimmers
J. de Graaf & J. Stenhammar

499 The break-up of free films pulled out of a pure liquid bath
L. Champougny, E. Rio, F. Restagno & B. Scheid

525 Effects of inertia and turbulence on rheological measurements of neutrally buoyant suspensions
E. Linares-Guerrero, M. L. Hunt & R. Zenit
