

Scope of the Journal

Clay Minerals - Journal of Fine Particle Science publishes electronically and in paper form research papers about clays, clay minerals and related materials, natural or synthetic. Aspects covered include: Earth Processes (interactions in 'system earth' ± soil science, and geology/mineralogy) including genesis/synthesis, phase transformations, stability, weathering, soil-organic interactions, ion-exchange, basin analysis, clay petrology; Solid State Chemistry/Materials Science ± synthesis, structure and dynamics, reactivity, crystal chemistry, mechanical, thermal, electrical properties, micro and nanophase materials; Environmental Science ± analytical methods, elemental distribution, waste containment, health issues, environmental impact assessment, conservation of cultural heritage; Colloid/Surface Science ± adsorption, colloid stability, surface chemistry, reactivity; and Applied Science and Technology ± industrial uses and technical applications, including mining and processing of clay, zeolite (and other) deposits and application in ceramics, paper, paint, polymer, ion-exchange, sorption, catalysis etc.

Submission of manuscripts

In a letter accompanying the manuscript, the submitting author must state that all authors agree with the final version of the manuscript. The letter must also state that the manuscript has not previously been published elsewhere, either in full or in part, and that, while under review for Clay Minerals, it will not be submitted to any other publication. Authors are encouraged to suggest up to three possible reviewers for their papers.

All manuscripts are to be submitted online at <http://www.edmgr.com/clayminerals/>. The current set of instructions for authors is available at: <https://www.cambridge.org/CLM>

All authors are allowed, free of charge, an e-print of their papers published in the journal.

Join the Mineralogical Society today

If you are a regular reader of Mineralogical Magazine consider joining the Society and receiving your own copy six times a year at a very modest cost. Membership currently starts at £55 per annum. For this, you will receive bi-monthly copies of Elements, our international membership magazine (in full colour) on mineralogy, geochemistry and petrology as well as online access to Mineralogical Magazine, Clay Minerals and Elements. You may also opt to pay an additional premium in order to continue receiving paper copies of our journals. Full details on how to join the Society and an application form can be found on the Society's website at www.minersoc.org. Membership of the Society introduces you to a vibrant community of those interested in the mineral sciences. Through membership of one or more of the Society's eight special interest groups you can take an active part in the Society's numerous scientific meetings and conferences as described on the website.

Mineralogical Society Journals

Mineralogical Magazine

International journal of mineral sciences which covers the fields of mineralogy, crystallography, geochemistry, petrology, environmental geology and economic geology. This journal is available primarily as an e-journal.

Clay Minerals

International journal of clay minerals and fine particle science, published four times a year, including research papers about clays, clay minerals and related materials, natural or synthetic. The journal includes papers on Earth processes, soil science, geology/mineralogy, chemistry/material science, colloid/surface science and applied science and technology. The journal is available primarily as an e-journal.

Copyright

For both the paper and electronic versions, copyright of all papers accepted shall be assigned to the Mineralogical Society before publication, except where Crown Copyright is reserved.

CLAY MINERALS

Journal of Fine Particle Science

VOLUME 53, NUMBER 1, MARCH 2018

CONTENTS

- A. Bourliva, A. K. Sikalidis, L. Papadopoulou, M. Betsiou, K. Michailidis, C. Sikalidis and A. Filippidis. Removal of Cu^{2+} and Ni^{2+} ions from aqueous solutions by adsorption onto natural palygorskite and vermiculite 1
- M. Pelayo, J. F. Marco, A. M. Fernández, L. Vergara, A. M. Melón and L. Pérez del Villar. Infrared and Mössbauer spectroscopy of Fe-rich smectites from Morrón de Mateo bentonite deposit (Spain) 17
- Shifeng Zhang, Yanfeng He, Zhixue Chen, James J. Sheng and Lipei Fu. Application of polyether amine, poly alcohol or KCl to maintain the stability of shales containing Na-smectite and Ca-smectite 29
- Nacarid Delgado, Fredy Ysambertt, Raúl Ochoa, Gerson Chávez, Bélgica Bravo, Jorge Santos and Danny E. García. Esterified lignins from *Pinus caribaea* as bentonite-dispersing agents 41
- Faezeh Hosseini, Farzaneh Hosseini, Seyyed Mehdi Jafari and Azade Taheri. Bentonite nanoclay-based drug-delivery systems for treating melanoma 53
- Abdelilah El Haddar, Elkhadir Gharibi, Ali Azdimousa, Nathalie Fagel, Iz-Eddine El Amrani El Hassani and Meriam El Ouahabi. Characterization of halloysite (North East Rif, Morocco): evaluation of its suitability for the ceramics industry 65
- Gustavo Franco de Castro, Jader Alves Ferreira, Denise Eulálio, Silas Junior de Souza, Sarah Vieira Novais, Roberto Ferreira Novais, Frederico Garcia Pinto and Jairo Tronto. Layered double hydroxides: matrices for storage and source of boron for plant growth 79
- F. Kooli, Y. Liu, K. Hbaieb, O.Y. Ching and R. Al-Faze. Characterization of organo-kenyaite: thermal stability and their effects on eosin removal characteristics 91
