

A C K N O W L E D G E M E N T S

First we thank our host institutions, the Dominion Astrophysical Observatory and the University of Victoria, for their hospitality, and the University for allowing us to use the excellent facilities of their beautiful campus.

The Provincial Government of British Columbia hosted a salmon barbeque for symposium participants, and this was greatly appreciated.

The members of the Scientific and Local Organizing Committees are listed below. We are most grateful to them all for contributing so much to the success of this symposium.

Scientific Organizing Committee B. Balázs, P. Demarque, R. Dickens, K.C. Freeman (Chairman), P. Hodge, I. King, G. Lyngå, A. Sharov, S. van den Bergh, R. Wielen.

Local Organizing Committee F.D.A. Hartwick, J.E. Hesser (Chairman), R.D. McClure.

The scientific program was arranged from Mt Stromlo Observatory. We are grateful to the Observatory for providing administrative and computer support. Our thanks go also to Joanne Fisher, who organized very efficiently the record keeping and the correspondence with participants.

Doris Bloomfield and Shirley Baker of the University of Victoria's Housing and Conference Services Office were exceptionally cooperative and helpful during the year of conference planning. We are grateful to them and to Maureen Keen, Kathy Harrower and Ron Burgerone for their pleasant, effective aid at the Housing Office during the meeting. We thank J.B. Tatum for lending his recording equipment; Douglas Forbes, David Hartwick, Robert McClure, Stephen Morris, and James Nemeč for help with the mechanics of the meeting; Harvey Richardson, Chris Aikman Murray Fletcher, Stephen Morris and Chris Pritchett for acting as our hosts during a tour of the DAO; and Sidney van den Bergh for taking the conference photograph. We are also grateful to the Physics Department at the University and to the DAO for support throughout.

Major review papers are published as received from the authors; however, to achieve greater stylistic uniformity, short contributions were retyped. Tape transcription was done by Jim LePard, Susan Chapman, Judy Pitcher and J.E.H. Final typing onto camera ready sheets was done by Judy Pitcher, to whom we particularly extend our gratitude for a difficult job well done. The Editor apologizes in advance for those errors of proofreading that have gone undetected in our efforts to achieve publication while the results are still of more than historical interest.

Kenneth C. Freeman
Chairman, Scientific
Organizing Committee

James E. Hesser
Editor and Chairman,
Local Organizing Committee
