

Seed Science Research

The official journal of the International Society for Seed Science (ISSS)

Editor-in-Chief

H.W.M. Hilhorst, Wageningen University, The Netherlands

Seed Science Research is an international journal publishing original and opinion papers, as well as reviews. The Journal deals primarily with the fundamentals of seed research with emphasis on the physiology, biochemistry, molecular biology and ecology of seed development, dormancy and germination.

The importance of seeds to propagation, food, biofuel and biodiversity is of increasing interest and therefore submissions on seed genetics, seed biotechnology, seed treatment and seedling establishment are especially encouraged if they are novel and 'seed driven'.

Instructions to authors for the submission of manuscripts to *Plant Genetic Resources: Characterization and Utilization* can be found at journals.cambridge.org/pgr/ifc

Plant Genetic Resources Characterization and Utilization

Contents

Editorial

Farewell to PGR

Robert Koebner 263

Chakhao (delicious) rice landraces (*Oryza sativa* L.) of North-east India: collection, conservation and characterization of genetic diversity

Somnath Roy, A. Banerjee, A. Pattanayak, S. S. Roy, R. S. Rathi, A. K. Misra, S. V. Ngachan and K. C. Bansal 264

Microsatellite high-resolution melting (SSR-HRM) analysis for genotyping and molecular characterization of an *Olea europaea* germplasm collection

Aliki Xanthopoulou, Ioannis Ganopoulos, Georgios Koubouris, Athanasios Tsaftaris, Chrysa Sergendani, Apostolos Kalivas and Panagiotis Madesis 273

Genetic diversity in *Vicia faba* L. populations cultivated in Tunisia revealed by simple sequence repeat analysis

Yassine Yahia, Hédia Hannachi, Antonio Jose Monforte, James Cockram, Mohamed Loumerem, Belkacem Zarouri and Ali Ferchichi 278

Genetic structure of green ash (*Fraxinus pennsylvanica*): implications for the establishment of *ex situ* conservation protocols in light of the invasion of the emerald ash borer

Constance E. Hausman, Michelle M. Bertke, John F. Jaeger and Oscar J. Rocha 286

Next-generation genebanking: plant genetic resources management and utilization in the sequencing era

Rob van Treuren and Theo J. L. van Hintum 298

Morphological and molecular diversity and genetic structure of Moroccan cultivated almond (*Prunus dulcis* Mill.) beside some foreign varieties

Abdelali El Hamzaoui, Ahmed Oukabli and Mohiéddine Moumni 308

Molecular characterization and genetic relationship of marigolds (*Tagetes* spp.) based on simple sequence repeat markers

Sukhman Whankaew, Supaporn Hasthanasombut, Ratchadaporn Thaikert, Piengtawan Tappiban, Duncan R. Smith and Kanokporn Triwitayakorn 317

Molecular characterization of almond accessions from the island of La Palma (Canary Islands, Spain) using SSR markers

Guillermo Padilla, Rafel Socias i Company and Amando Ords 323

Molecular-level and trait-level differentiation between the cultivated apple (*Malus × domestica* Borkh.) and its main progenitor *Malus sieversii*

Satish Kumar, Pierre Raulier, David Chagné and Claire Whitworth 330

Molecular characterization of oil palm *Elaeis guineensis* Jacq. of different origins for their utilization in breeding programmes

Diana Arias, Iván Ochoa, Fernando Castro and Hernán Romero 341

Short Communications

Genetic outcomes from a farmer-assisted landrace selection programme to develop a synthetic variety of broccoli

Simona Ciancaleoni, Lorenzo Raggi and Valeria Negri 349

Evaluation of genetic variations at glutenin loci in Korean wheat landraces using allele-specific DNA markers

Jeong Hwan Ahn, Soo-Kyung Lee and Chul Soo Park 353

Corrigendum

A preliminary investigation of cultivated and wild species of *Luffa* for oil and protein contents – CORRIGENDUM

Krishna Prakash, Jalli Radhamani, Anjula Pandey and Sangita Yadav 357
