*Paleoclimatology: China, Russia, Antarctica,
and North America*

DONALD K. GRAYSON

University of Washington
*Archaeology and Vertebrate Paleontology:
North America and Western Europe*

MILAN J. PAVICH

U. S. Geological Survey
*Quaternary Soils: Southeastern, Mid-
Continent and Southwestern United States*

CATHY L. WHITLOCK

Montana State University
*Paleoecology and Vegetation History:
North and South America*

RICHARD G. KLEIN

Stanford University
*Archaeology and Vertebrate Paleontology:
Africa*

JIM ROSE

University of London
*Terrestrial Palaeoenvironments and
Stratigraphy: Britain and Europe*

LIPING ZHOU

Peking University
*Loess, Geochronology, and Geomorphology:
Central Asia, East Asia*

Quaternary Research is the research journal for the American Quaternary Association

Cover photo. Winter operations of the HDP-06 Hovsgol Drilling Project on the 120-cm-thick ice of Lake Hovsgol, Mongolia's largest (136 km long) and deepest (262 m) lake. A view to the east toward the mountain range Bayan-Zurkhiin-Nuruu consisting of Lower Paleozoic intrusive complexes capped by the Pliocene basalts. Located in one of the rift basins of the Baikal rift zone, Lake Hovsgol preserved a sedimentary record of several past glacial–interglacial cycles with sedimentation rates on the order of 4–10 cm/kyr. (See the article by Prokopenko et al., pages 2–17, in this issue.) Photo by Alexander A. Prokopenko.
