
JINS VIRTUAL ISSUE

Complexities of Mild Traumatic Brain Injury and Posttraumatic Stress Disorder

This Virtual Issue consists of papers previously published in the *Journal of the International Neuropsychological Society*, with an introduction by internationally recognized researchers Jennifer Vasterling and Sureyya Dikmen, who are experts in post-traumatic stress disorder (PTSD) and traumatic brain injury (TBI). Their introduction integrates these two literatures and highlights the critical issues that impact our understanding and clinical diagnosis of patients with PTSD and mild TBI.
