

Insect Science and its Application

The International Journal of Tropical Insect Science

Aims and Scope

Insect Science and its Application deals comprehensively with all aspects of scientific research targeted on tropical insects (and related arthropods), and the application of new discoveries to such diverse fields as pest and vector management and the use of insects for human welfare.

A distinctive feature of the journal is its multi- and interdisciplinary nature, which transcends the traditional boundaries of entomology.

Its second feature is its concentration on the recording and reviewing of the progress of insect science in the tropical and subtropical regions of the world. Thus, without excluding any area of the wide field encompassed by insect science, the journal will accept manuscripts in environmental physiology, the regulation of development and reproduction, population modelling, chemical ecology, natural products chemistry, plant resistance, host/insect relations, behaviour of tropical pest species, epidemiology of tropical diseases, vector biology, pest and vector management research, entomo-meteorology, insects in relation to farming systems, forest entomology, insect pathology, social insects and arthropods, and the use of insects. It is the intention of the Editors to have manuscripts published rapidly, consistent with the needs of quality control.

In addition to articles of original research, the journal also publishes book reviews, announcements and reports of meetings and mini-reviews. Each regular issue of the journal usually contains a short review article on a critical or rapidly developing area of tropical insect science; normally the Editors will have invited an author to contribute such a mini-review.

Information for Contributors

1. All papers for publication in *Insect Science and Its Application* should be submitted directly to the Editor-in-Chief, Professor Thomas R. Odhiambo, Scientific Editorial Services, P.O. Box 59900, Nairobi, Kenya. Papers should be mailed in a strong, preferably linen, envelope, as they may otherwise arrive in a damaged condition.
2. Papers should be in English or French and be original contributions in the field of tropical insect science. Each paper should have a summary in the form of an abstract in both English and French.
3. Submission of a paper implies that it has not been published previously, that it is not under consideration for publication elsewhere, and that if accepted for *Insect Science and Its Application* the authors will transfer copyright to Pergamon Press as is customary. Articles and illustrations become the property of the journal. There is no page charge for papers accepted for publication.
4. Manuscripts and illustrations must be submitted in triplicate to ensure efficient refereeing, and the author should retain a copy. In the case of multiple authorship the authors should indicate who is to receive correspondence.
5. Manuscripts must be typewritten with double spacing (including the reference list), and with wide margins on one side of the paper only. Authors are requested to keep their communications as concise as possible. Footnotes should be avoided, and italics should not be used for emphasis. A running head of not more than 30 letters should be supplied.
6. Twenty-five free reprints will be supplied to the first-named author of each paper published in the journal. Detailed Instructions to Authors for the preparation of manuscripts are available from the Editor-in-Chief or the Publishing Office.

Insect Science and its Application

The International Journal of Tropical Insect Science

VOLUME 6 NUMBER 5

1985

CONTENTS

- MARY-L. A. OWAGA 561 Observations on the efficacy of buffalo urine as a potent olfactory attractant for *Glossina pallidipes* Austen
- S. LINGAPPA, A. JAGADISH, K. SHIVARAMU and H. P. PRABHUSWAMY 567 Relative intrinsic toxicity of seven insecticides to foragers of the Indian hive bee, *Apis cerana indica* F.
- J. O. OKOTH 569 The use of indigenous plant materials for the construction of tsetse traps in Uganda
- GUY J. HALLMAN 573 Comparison and contrast of cotton and *Desmodium tortuosum* as hosts of *Heliothis virescens*
- LÉDA REGIS, YARA DE M. GOMES and ANDRÉ F. FURTADO 579 Factors influencing male accessory gland activity and first mating in *Triatoma infestans* and *Panstrongylus megistus* (Hemiptera: Reduviidae)
- SURINDER PAL KAUR, DALBINDER SINGH SIDHU, S. S. DHILLON and NIRMAL KUMAR 585 Transaminases during development and aging of the bruchid, *Zabrotes subfasciatus* (Boh.) (Coleoptera: Bruchidae)
- MORRIS W. OGENGA-LATIGO and BATTAN M. KHAEMBA 591 Some aspects of the biology of the black bean aphid *Aphis fabae* Scopoli reared on the common bean *Phaseolus vulgaris* L.
- A. NANTWI, I. K. ADJEI-MAAFO and S. K. DERY 595 Carbofuran, as furadan 5G, tested as an oil palm nursery insecticide
- GEORGE N. MBATA 597 Some physical and biological factors affecting oviposition by *Plodia interpunctella* (Hubner) (Lepidoptera: Phycitidae)
- IGHO B. IGBINOSA 605 On the ecology of the nettle caterpillar, *Latoia* (= *Parasa*) *viridissima* Holland (Limacodidae: Lepidoptera)
- M. S. SALEH 609 Effects of six insect growth regulators on mosquito larvae of *Aedes aegypti*
- SH. M. I. KASSEM, M. S. SALEH, M. I. ALY and MONA E. ABD ELLATIF 613 Formulations for controlled-release of fenitrothion in water
- M. S. SALEH 617 Larvicidal activity of *Bacillus thuringiensis* serotype H-14 against mosquito larvae
- J. ALLOTEY 621 Study of radiosensitivity of the immature stages of *Corcyra cephalonica* (Stainton) (Lepidoptera: Galleriidae)
- J. ALLOTEY and R. KUMAR 627 Competition between *Corcyra cephalonica* (Stainton) and *Ephestia cautella* (Walker) in cocoa beans
- Announcement i
- New Patents iii
- Editorial: Software Survey Section I
- Questionnaire II

Insect Sci. Applic. is Indexed/Abstracted in Current Contents, CABS, BIOSIS Database.
