

Erratum

Gifford M, Otfinowski R (2013) Landscape disturbances impact affect the distribution and abundance of exotic grasses in northern fescue prairies. *Invasive Plant Science and Management*. 6(4):577–584.

“Impact” should be removed from the title, which should read “Landscape Disturbances Affect the Distribution and Abundance of Exotic Grasses in Northern Fescue Prairies.”

In addition, Figures 2 and 4 were erroneously labeled and their Y-axes should represent the predicted values of the abundance of exotic grasses that were allowed to range below zero, rather than the predicted probabilities, as a function of their distance from roads or trails. Finally, Figures 3, 5 and 6: the Y-axes represent Proportional Cover, not percentage.
