

## BOOKS IN BRIEF

The editorial office has received a number of edited volumes of articles and other general texts that will be of interest to our readership. These works tend to be less suitable for unified reviews than monographs, and thus a considerable backlog has developed. To introduce these volumes, we occasionally list in this section the publication information and tables of contents entries for those we have received. The volumes selected for this issue include recently received textbooks and primary source readers.

*The Maya*. 9th ed. Edited by Michael D. Coe and Stephen Houston. New York: Thames and Hudson Press, 2015. Pp. 314. Chronological table. Further reading. Sources. Index.
