P.C. Calder, University of Southampton, UK

*British Journal of Nutrition* is a leading international peer-reviewed journal covering research on human and clinical nutrition, animal nutrition and basic science as applied to nutrition. The journal recognises the multidisciplinary nature of nutritional science and includes material from all of the specialities involved in nutrition research, including molecular and cell biology and the emerging area of nutritional genomics.

**CAMBRIDGE**  
UNIVERSITY PRESS

(Contents continued from back cover)

**Nutrition Society Silver Medal Lecture****Chair: I. Macdonald, University of Nottingham, Nottingham, UK**

- Nutrigenetics and personalised nutrition: how far have we progressed and are we likely to get there?  
*G. Rimbach & A. M. Minihane* 162–172

**University of Nottingham, Nottingham, UK, 4 July 2008****Workshop on ‘Nutritional models of the developmental origins of adult health and disease’****Chair: M. Symonds, University of Nottingham, Nottingham, UK**

- Nutritional models of the developmental programming of adult health and disease  
*M. E. Symonds & H. Budge* 173–178
- Historical cohort studies and the early origins of disease hypothesis: making sense of the evidence  
*J. C. K. Wells* 179–188

**Workshop on ‘Changing nutrition behaviour to improve maternal and fetal health’****Chairs: M. Nelson, Schools Food Trust, UK; A. Jackson, University of Southampton, Southampton, UK**

- A review of factors affecting the food choices of disadvantaged women  
*W. Lawrence & M. Barker* 189–194
- Changing health behaviour of young women from disadvantaged backgrounds: evidence from systematic reviews  
*J. Baird, C. Cooper, B. M. Margetts, M. Barker, H. M. Inskip & the Food Choice Group, University of Southampton* 195–204
- The application of psychological theory to nutrition behaviour change  
*M. Barker & J. A. Swift* 205–209
- Intervening to change the diets of low-income women  
*J. A. Davies, P. Damani & B. M. Margetts* 210–215
- Food policy and dietary change  
*L. B. Levy* 216–220
- International moves to strengthen food policies  
*T. Lobstein* 221–224

## Directions to Contributors – Concise Version

The *Proceedings of the Nutrition Society* publishes papers presented by invitation and original communications given at the symposia and meetings of the Society. The geographical scope of the journal is international. As a contributor you should note and follow the guidelines set out below. Further information on how the technical content of your paper should be presented is given in the **Directions to Contributors** on the Nutrition Society web pages at <http://www.nutrition-society.org> or contact the Publications Office on +44 20 7605 6555 (telephone), +44 20 7602 1756 (fax) or [edoffice@nutsoc.org.uk](mailto:edoffice@nutsoc.org.uk) (email).

Authors are reminded that their papers will be read by a wide cross-section of the Society's members, many of whom were neither at the meeting nor are they specialists in the subject area. Authors should thus seek to provide an introduction and context to the subject and are encouraged to provide extensive references to allow the reader to further explore the subject, in addition to summarizing the more recent findings, conclusions and hypotheses of their own and other research groups. Authors should avoid unnecessary use of 'jargon' and acronyms and ensure that as far as possible acronyms and abbreviations are defined and explained in the text.

**Papers should be accompanied by a signed statement to the effect that the author accepts the conditions laid down in the full Directions to Contributors.** Contributors of Symposium papers will be asked to complete a copy of the 'Licence to Publish' (in lieu of copyright transfer) at the proof stage.

**Page format.** The *Proceedings of the Nutrition Society* is printed in double-column format (column width of 85 mm) with a text area of 235 × 177 mm.

**Text. Word-processed text provided electronically is required. Text files must be compatible with Microsoft Word 2000 (either in Word format or saved as rich text (.rtf) files.** The typescript should be prepared with 1.5 line spacing and margins (at least 1.5 cm) on each side and with no underlining, bold or italics (except for scientific names). Standard abbreviations (e.g. Fig. and Figs.) and SI units should be used. **This will enable papers to be handled rapidly, and with fewer typesetting errors. All relevant financial and other interests should be declared.**

**Synopsis.** Each paper must commence with a carefully prepared, accurate, informative synopsis, in one paragraph, that is complete in itself and intelligible without reference to text or figures. It should not exceed 250 words.

**Key Words.** Authors should supply two or three key words or phrases (each containing up to three words) for the subject index of the volume.

**Tables.** Tables should be reduced to the simplest form, and should not be used where text or illustrations give the same information. They should be submitted on separate sheets at the end of the article and must carry headings describing their content that are comprehensible without reference to the text.

**Illustrations.** All figures should be of sufficient size and quality to allow for reduction by half or two-thirds. Half-tone photographs are acceptable where they make a real contribution to the text. Colour illustrations can be used at the discretion of the Editor. Figure captions should be typed separately at the end of the main text and numbered corresponding to the relevant figures. For illustrations, preferred software packages are Adobe Illustrator, Adobe Photoshop, Aldus Freehand, Chemdraw or CorelDraw. Preferred formats are TIFF or JPEG, if a TIFF file is not possible save as an EPS or a Windows metafile. Microsoft PowerPoint files are also acceptable.

**References.** References must be based on the numbered (Vancouver) system. **When an article has more than ten authors, only the names of the first three should be given followed by *et al.*; give abbreviated journal titles and conform to the following styles:**

1. Goel V, Cheema SK, Agellon LB, Ooraikul B & Basu TK (1999) Dietary rhubarb (*Rheum raphaniticum*) stalk fibre stimulates cholesterol 7 $\alpha$ -hydroxylase gene expression and bile acid excretion in cholesterol-fed C57BL/6J mice. *Br J Nutr* **81**, 65–71.
2. Jenkins DJ, Kendall CW, Marchie A *et al.* (2003) The effect of combining plant sterols, soy protein, viscous fibres, and almonds in treating hypercholesterolemia. *Metabolism* **52**, 1478–1483.
3. Brandtzaeg P (2003) Role of local immunity and breast-feeding in mucosal homeostasis and defence against infections. In *Nutrition and Immune Function*, pp. 273–320 [PC Calder, CJ Field and HS Gill, editors]. Wallingford, Oxon: CAB International.
4. Stock M & Rothwell NJ (1982) *Obesity and Leanness: Basic Aspects*. London: John Libbey.

Citations should be numbered consecutively in the order in which they first appear in the text using superscript Arabic numerals in parentheses, e.g. 'The conceptual difficulty of this approach has recently been highlighted<sup>(1,2-4)</sup>'. If a reference is cited more than once the same number should be used each time.

**Proofs.** PDF page proofs will be accessible to authors from the typesetter's website and should be returned within 48 hours (by email or Express mail) to:

**Monica Nelson**  
2 Leicester Road, Wanstead  
London  
E11 2DP  
UK  
email [nelsononline@btinternet.com](mailto:nelsononline@btinternet.com)

**Typescripts.** The electronic version of the paper should be emailed to:

**Professor C. Jamie Newbold**  
Proceedings Editor  
The Nutrition Society  
10 Cambridge Court  
210 Shepherd's Bush Road  
London W6 7NJ  
UK

Vol. 68 No. 2 May 2009

## Contents

# Proceedings of the Nutrition Society

### O'Reilly Hall, University College, Dublin, Republic of Ireland, 18–20 June 2008

#### Symposium on 'The challenge of translating nutrition research into public health nutrition'

##### Session 2: Personalised nutrition

**Chairs:** M. Gibney, *University College Dublin, Dublin, Republic of Ireland;*

E. Gibney, *University College Dublin, Dublin, Republic of Ireland*

- Genetic variation and disease risk: new advances  
*J. Scott* 113–121

##### Session 3: Joint Nutrition Society and Irish Nutrition and Dietetic Institute Symposium on 'Nutrition and autoimmune disease'

**Chairs:** N. Kennedy, *Trinity College, Dublin, Republic of Ireland;*

C. Corish, *Dublin Institute of Technology, Dublin, Republic of Ireland*

- Recent advances in genetic understanding of coeliac disease  
*C. F. Feighery & R. McManus* 122–126
- Nutrition in Crohn's disease  
*M. O'Sullivan* 127–134

##### Session 5: Nutrition communication

**Chairs:** A. McGloin, *University College Dublin, Dublin, Republic of Ireland;*

M. Faughnan, *Safefood, Dublin, Republic of Ireland*

- The challenge of effective food risk communication  
*A. McGloin, L. Delaney, E. Hudson & P. Wall* 135–141

### University of Nottingham, Nottingham, UK, 30 June–3 July 2008

#### Conference on 'Multidisciplinary approaches to nutritional problems'

##### Postgraduate Symposium

**Chair:** M. Lomax, *University of Nottingham, Nottingham, UK*

- Does promoter methylation of the *SLC30A5* (ZnT5) zinc transporter gene contribute to the ageing-related decline in zinc status?  
*L. J. Coneyworth, J. C. Mathers & D. Ford* 142–147
- Effects of chronic and acute consumption of fruit- and vegetable-puree-based drinks on vasodilation, risk factors for CVD and the response as a result of the *eNOS* G298T polymorphism  
*T. W. George, C. Niwat, S. Waroonphan, M. H. Gordon & J. A. Lovegrove* 148–161
