

INDEXES

compiled by Graham Shipley

The introductory notes to the indexes in volumes 101 and 102 apply.

Ar	archaic	LR	Late Roman
BA	Bronze Age	MC	Middle Cycladic
Byz	Byzantine	Med	medieval
Cl	classical	MH	Middle Helladic
Cyc	Cycladic	MM	Middle Minoan
EByz	early Byzantine	Nl	Neolithic
EC	Early Cycladic	Or	orientalizing
G	Geometric	PC	Protocorinthian
geom.	geometric (Cycladic BA pottery)	PG	Protogeometric
Hl	hellenistic	PGB	Protogeometric B
IA	Iron Age	R	Roman
LC	Late Cycladic	SF	small find
LH	Late Helladic	SM	Submycenaean
LM	Late Minoan		

Periods are subdivided by the prefixes E (early), M (middle), and L (late): e.g. EPG = early Protogeometric. Some of these combinations, however, are listed above as periods in their own right: e.g. LH. Centuries (which are BC unless AD is appended) are subdivided by the suffixes 'f' and 's', signifying first or second half (e.g. C4f); or by 'e', 'm', and 'l', signifying early/mid-/late (e.g. C5l).
