

BJPsych International

Volume 17
Number 3
August 2020

Mission of *BJPsych International*

We address themes that have real practical relevance to supporting patients, with a particular, but not exclusive, focus on the needs of low- and middle-income countries as well as the mental health needs of the poor and socially excluded in more developed countries. Contributors who can provide examples of innovative practice, which could be emulated elsewhere at minimal cost, are especially welcome, as are papers on public mental health.

Notice to contributors

BJPsych International publishes articles dealing with mental health policy, promotion and legislation, the administration and management of mental health services, and training in psychiatry around the world. The journal aims to be a platform for work that is generally underrepresented in the literature, especially psychiatry in low- and middle-income countries.

Manuscripts for publication should be submitted online at <https://mc.manuscriptcentral.com/bjpsych-int> (general enquiries may be addressed to ip@rcpsych.ac.uk).

Manuscripts accepted for publication are copy-edited to improve readability and to ensure conformity with house style. Authors whose first language is not English are encouraged to contribute.

Contributions are accepted for publication on the condition that their substance has not been published or submitted elsewhere. Once a paper is accepted for publication, all its authors are required to disclose any potential conflict of interest. Completion of the form developed by the International Committee of Medical Journal Editors for this purpose (<http://www.icmje.org/conflicts-of-interest/>) is mandatory.

About our peer review process

All articles submitted are reviewed by a minimum of two peers to ensure that their content, length and structure are appropriate for the journal. Not all papers will be accepted for publication, but our peer review process is intended to assist our authors in producing articles for worldwide dissemination. Wherever possible, our expert panel of assessors will help authors to improve their papers to maximise their impact when published.
