

THE AERONAUTICAL QUARTERLY

A Journal devoted to Aeronautics and the Allied Sciences

Volume XI FEBRUARY 1960 Part 1

CONTENTS

- The Estimation of Laminar Skin Friction, including the Effects of Distributed Suction *N. Curle*
- A Theory for Flow with Axial Symmetry in Centrifugal Impellers Running at Low Speed *R. J. Tonks and A. G. Smith*
- Vibration of Rectangular Plates Point-Supported at the Corners *Hugh L. Cox and J. Boxer*
- The Pressure Distribution on a Wing with a Subsonic Leading Edge in the Presence of Anti-Symmetric Body Shaping *J. G. Jones*
- Struts with Linearly Varying Axial Loading *J. S. Przemieniecki*
- Some Properties of the Admittances of Dynamical Chains *W. J. Duncan*
- Correspondence on "Impulsive and Indicial Admittances of Simple Dynamical Chains" by W. J. Duncan *R. J. Fitzgerald*
