# **Race, Class and Politics in Colonial Mexico 1610-1670**

---

J. I. Israel

---

The social structure of Spanish Mexico in the seventeenth century presents a complex picture of different racial groups, and reflects the rivalry of two distinct European élites for political and economic domination. This book investigates the tensions at work in this multi-racial social structure and their effect on the political and social development of the viceroyalty. £8 *Oxford Historical Monographs*

## **Empires to Nations**

---

Expansion in America 1713-1824

---

Max Savelle

---

The main themes of this volume are the evolution of the English, French, Spanish, Portuguese, and Dutch empires in the New World into separate and distinct societies, and their differentiation from each other and from their mother countries. Out of the birth and growth of national self-consciousness there developed a nationalism and anti-colonialism which led to the movements for independence which began in the United States and finished with the independence of Brazil. A Study in Kinship and Marriage

---

Joanna Overing Kaplan

---

Ideally, a Piaroa marries within the multiple-family communal house into which he was born; but the mode of political achievement among the Piaroa is such that this ideological ordering is often disrupted in practice. This ethnographic account throws light on the peculiar problems of analysis presented by the tribal societies of South America. £8.50

Race and Nationality in Brazilian Thought

---

Thomas E. Skidmore

---

This book examines the development of racial attitudes in Brazil and discusses them particularly in relation to her growing sense of national identity. Before abolition of slavery and the establishment of a republic late in the nineteenth century, Brazilian intellectuals had given little thought to the problem of race, but have shared pride in their nation's race politics ever since the 1930s, when a positive approach to Brazil's multi-racial composition was encouraged. £5.75

DANIEL H. LEVINE

## CONFLICT AND POLITICAL CHANGE IN VENEZUELA

Venezuela has had a long and bloody history of military dictatorship. Yet, since 1938, it has developed one of the few effective, competitive democracies in Latin America. To explain this transformation Daniel H. Levine analyzes the development of modern mass-based political parties with pervasive organisations and commanding strong loyalties; the changing structure and content of social and political conflict; and the gradual emergence of common norms governing political behaviour.

FRANK D. McCANN, Jr.

## THE BRAZILIAN-AMERICAN ALLIANCE IN WORLD WAR II, 1937-1945

Getúlio Dornelles Vargas established his dictatorship in Brazil in 1937, and from 1938 to 1940 American diplomats and military planners were preoccupied with the possibility that Brazil might ally herself with Nazi Germany. Such an alliance would have made fortress America vulnerable and closed the South Atlantic to Allied shipping. Fortunately for America, Brazil eventually joined the Allies and American engineers turned Northeast Brazil into a vast springboard for supplies for the war fronts. Frank D. McCann has used previously inaccessible Brazilian archival material to discuss the events during the Vargas regime which brought about a close alliance between Brazil and the United States and resulted in Brazil's economic, political, and military dependence on her powerful North American ally.

## THE UNITED STATES AND THE CARIBBEAN REPUBLICS, 1921-1933

Between 1921 and 1933, the United States moved from a policy of active intervention to a policy of noninterference in the internal political affairs of the Caribbean states. How the shift from the diplomacy of the Taft and Wilson administrations to the Good Neighbour policy of Franklin Roosevelt occurred is the subject of Dana Gardner Munro's book. The author draws on special records and on his personal experience as a member of the Latin American Division of the United States Department of State to piece together the history of the transition in diplomatic policy.

## THE PERUVIAN EXPERIMENT Continuity and Change Under Military Rule

Peru's self-proclaimed "revolution"—surprisingly extensive reforms initiated by the military government—has aroused great interest all over Latin America and the Third World. This book is the first systematic and comprehensive attempt to appraise Peru's current experiment in both national and regional perspective. It compares recent innovative approaches to Peru's problems with the methods used by earlier regimes, providing original and stimulating interpretations of contemporary Peru from the viewpoints of political science, sociology, history, economics, and education.

**PSYCHOLOGY OF THE MEXICAN**

**Culture and Personality**

In his quest to understand and describe the behaviour of the Mexican, the distinguished Mexican psychologist R. Diaz-Guerrero combines a strong theoretical interest in the relationship of culture to personality with a pragmatic concern for methodology. This collection of essays is rooted both in studies of Mexican psychology as an independent phenomenon and in cross-cultural comparisons of Mexicans, Mexican-Americans, and Anglo-Americans.

**INTRODUCTION TO CLASSICAL NAHUATL**

Classical Nahuatl was the language used by the Aztecs at the time of Cortes's conquest of Mexico and until near the end of the colonial period. Introduction to Classical Nahuatl is the first concerted, detailed application of modern linguistic analysis to Nahuatl and the most helpful guide available to the language's unusual features. The grammatical structures are presented in a systematic, step-by-step progression, designed for use either in self-instruction or in class study. The book is divided into four parts, dealing with basic verbal sentences, derived verbal sentences, nominal sentences, and the combinations of these simple sentences into complex and compound structures. A comprehensive vocabulary is included in the first volume, organised in such a way as to make its use a further part of the learning process. The accompanying workbook contains exercises that drill the principal points discussed in the grammar, supplementary reading passages, and a key.

**A MEXICAN FAMILY EMPIRE**

**The Latifundio of the Sánchez Navarros, 1765-1867**

Perhaps no other institution has had a more significant impact on Latin American history than the large landed estate—the hacienda. In Mexico, the latifundio, an estate usually composed of two or more haciendas, dominated the social and economic structure of the country for four hundred years. A Mexican Family Empire is a careful examination of the largest latifundio ever to have existed, not only in Mexico but also in all of Latin America—the latifundio of the Sánchez Navarros.

## Papers of the IV International Congress of Mexican History

*Edited by*

*James W. Wilkie, Michael C. Meyer, and Edna Monzón de Wilkie*

This comprehensive volume offers a new and important interdisciplinary focus on Mexican history since 1910, and comprises the most up-to-date work yet available.

The editors have organized 45 papers by leading Mexicanists into a cohesive volume which treats the following topics: population, space, and migration since 1910; elites and masses; land reform; the roles of the Church and the military; official party politics; the Mexican economy and its role in Latin America; Mexican-U.S. relations; the Chicano and the Mexican; education and cultural life; periodization of contemporary Mexican history; and the present and likely future state of scholarship on these subjects. About half the papers are in Spanish.

## NEGRO SLAVERY IN LATIN AMERICA

*Rolando Mellafe*

This is the first general study of slavery in Latin America to be made available in English. It covers the period from the Conquest to abolition, describing conditions favorable to the introduction of slaves in various regions and the development, magnitude, and decline of the slave-holding colonies. Considerable attention is given to the slave trade: the transoceanic routes, sources of supply in Africa, numbers of people, and the system of marketing and distribution in Latin America. Spain never had effective control over this trade; the author discusses the reasons for this. He also analyzes the legal and social controls that evolved during the slave period and the transition from slavery to other forms of servile labor. The book includes a large bibliography.

240 pages £6.30

## THE PEASANT MARKETING SYSTEM OF OAXACA, MEXICO

*Ralph L. Beals*

This is the first study of peasant economics to deal with the totality of a marketing system. Most studies of peasant economics have centered on a single village or a single marketplace and have at most touched upon the larger marketing system or network only tangentially. The Oaxaca system consists of hundreds of villages and dozens of marketplaces serving nearly a million people and involving goods valued conservatively at more than a billion pesos annually. The Oaxaca system thus is the largest and one of the best preserved of a number of traditional peasant marketing systems existing in Mesoamerica.

# LATIN AMERICAN FOREIGN POLICIES

## An Analysis

*Harold Eugene Davis, Larman C. Wilson  
and others*

Although Latin American international and foreign policy has been studied in the United States since the 1920s, this is the first book to present the subject from the perspective of the individual Latin American nations. It examines Latin American foreign policy country-by-country (or in a few cases, by small groups of countries), focusing on the formulation of foreign policy and how it is influenced by historical tradition and national politics. Each essay also analyzes the major international problems the countries confront and the position they assume in their relations with various other countries, regions, and international organizations.

From institutions around the country, the authors represent the points of view of a new generation of scholars. As historians, political scientists and economists, they provide interdisciplinary and theoretical diversity.

A challenging departure from the standard works in the field, this book makes a timely contribution to the study of Latin American foreign policy.

# FROM COLONY TO NATION

## Essays on the Independence of Brazil

*edited by A. J. R. Russell-Wood*

This is the first collection of essays to consider the fifty-year period preceding Brazilian independence in 1822 from cultural, political, economic, and social perspectives. The contributors, distinguished scholars in Brazilian history, present an up-to-date assessment of the importance of Brazilian independence based on extensive research in the libraries and archives of Portugal and Brazil.

The eight essays deal with preconditions and possible precipitants of the move toward independence, emancipation from Portugal and the creation of a Brazilian national consciousness, U.S. policy toward the new nation, the effects of rural and urban growth on the political process, and the ideological and intellectual background of the independence movement.

*From Colony to Nation* contributes to our understanding of those events occurring in Portuguese America before and after independence and to our knowledge of modern Brazil and her role in contemporary Latin America.

# The Politics of Oil in Venezuela

*Franklin Tugwell.* A case study of the relationship between foreign oil corporations and the state in Venezuela, this book focuses on the strategies adopted by Venezuelan leaders to control the behavior of the world's largest and most powerful multinational corporations. Among the main themes of the book are the pattern of bargaining and conflict between the government and the oil companies; the impact of ideology upon the selection of alternative courses of action; and the interdependence of the domestic political process, petroleum policy, and rapid social change. \$8.95

## NOTES FOR CONTRIBUTORS

*Journal of Latin American Studies* is published twice a year under the academic sponsorship of the Centres or Institutes of Latin American Studies at the Universities of Cambridge, Glasgow, Liverpool, London and Oxford.

The scope of the journal is the study of Latin America from the standpoint of the social sciences, including anthropology, archaeology, economics, geography, history, international relations, politics, sociology, etc., though it is not concerned with linguistic or literary studies.

Editorial policy avoids commitment to any political viewpoint or ideology, but welcomes free discussion of such issues in the Latin American context, on the understanding that all responsibility for opinions expressed rests exclusively with the author concerned and not with either the journal or its editors.

Contributions are invited from all parts of the world. Articles should generally not be more than 8,000 words long, and two copies, typed with double-spacing, should be submitted. Diagrams and maps may be included by arrangement with the editors. The journal is published in English, but articles written in other languages may be considered, and arrangements made as required for translation into English. Contributors should keep one copy of the typescript for use in correcting proofs.

All contributions and editorial correspondence should be addressed to *Journal of Latin American Studies*, Institute of Latin American Studies, 31 Tavistock Square, London, WC1H 9HA.

Each contributor will receive, free of charge, 25 offprints of his article and a copy of the issue of the journal in which it appears.
