Cycles of Abuse: joint Section conference

This conference will be held in London on 26 and 27 September 1994 and will address aims and obstacles of working together with regard to the different aspects of the Sections within the College and how that reflects on the development of interdisciplinary practices. It will involve College Sections for child and adolescent psychiatry, forensic psychiatry, mental handicap, psychotherapy and the International Association

for Forensic Psychotherapy and will take the form of plenary sessions and workshops.

Dr Fiona Caldicott, the President of the College, will open the conference and the Rt Hon Lord Justice Butler-Sloss, DBE, has agreed to be the after-dinner speaker on 26 September.

For further details, please contact Mrs Jean Wales, Continuing Medical Education Officer, The Royal College of Psychiatrists.
