Publisher: Katy Christomanou

Special sales and supplements:

This Journal accepts relevant advertisements and inserts. We also provide bulk reprints of suitable papers to meet teaching or promotional requirements. The journal also publishes supplements on behalf of academic and corporate collaborators. Please contact Katy Christomanou at the Cambridge address for further details. E-mail: kchristomanou@cambridge.org

Subscription information:

British Journal of Nutrition is an international journal published by Cambridge University Press on behalf of The Nutrition Society. The twelve issues starting January 2010 comprise Volume 103, the twelve issues starting July 2010 comprise Volume 104.

Annual subscription rates:

Volumes 103/104 (24 issues):
Internet/print package £954/\$1860/€1528
Internet only: £803/\$1566/€1283
Print only: £909/\$1772/€1477

Any **supplements** to this journal published in the course of the annual volume are normally supplied to subscribers at no extra charge.

Back volumes are available. Please contact Cambridge University Press for further information.

Claims for non-receipt of journal issues will be considered on their merit and only if the claim is received within six months of publication. Replacement copies supplied after this date will be chargeable.

US POSTMASTERS: please send address corrections to *British Journal of Nutrition*, Cambridge University Press, 100 Brook Hill Drive, West Nyack, New York 10994-2133.

Directions to Contributors are available from the Society at the address below or can be found on the Society's website at <http://www.nutritionociety.org> (an abbreviated Notes for Authors can be found inside the back cover).

Offprints: The author (or main author) of an accepted paper will receive a copy of the PDF file and a voucher copy of the issue in which their paper has been published. There will be an option to purchase paper offprints, these should be ordered at proof stage. No page charges are levied by this journal.

Copyright: As of 1 July 2000 the copyright of all articles submitted to *British Journal of Nutrition* are retained by the authors or their institutions. For articles prior to this date permission for reproduction of any part of the journal (text, figures, tables or other matter) in any form (on paper, microfiche or electronically) should be sought directly from the Society, at: The Publications Office, The Nutrition Society, 10 Cambridge Court, 210 Shepherds Bush Road, Hammersmith, London W6 7NJ, UK.

Disclaimer: The information contained herein, including any expression of opinion and any projection or forecast, has been obtained from or is based upon sources believed by us to be reliable, but is not guaranteed as to accuracy or completeness. The information is supplied without obligation and on the understanding that any person who acts upon it or otherwise changes his/her position in reliance thereon does so entirely at his/her own risk. Dietary Surveys and Nutritional Epidemiology

- Biochemical risk indices, including plasma homocysteine, that prospectively predict mortality in older British people: the National Diet and Nutrition Survey of People Aged 65 Years and Over.
C. J. Bates, M. A. Mansoor, K. D. Pentieva, M. Hamer & G. D. Mishra 893–899
- Excellent agreement between genetic and hydrogen breath tests for lactase deficiency and the role of extended symptom assessment.
D. Pohl, E. Savarino, M. Hersberger, Z. Behlis, B. Stutz, O. Goetze, A. v. Eckardstein, M. Fried & R. Tutuian 900–907
- Association of dietary patterns with BMI and waist circumference in a low-income neighbourhood in Brazil.
D. B. Cunha, R. M. V. R. de Almeida, R. Sichieri & R. A. Pereira 908–913
- High latitude and marine diet: vitamin D status in elderly Faroese.
C. Dalgård, M. S. Petersen, A. V. Schmedes, I. Brandslund, P. Weihe & P. Grandjean 914–918
- Behaviour, Appetite and Obesity***
- Absence of intestinal microbiota does not protect mice from diet-induced obesity.
C. K. Fleissner, N. Huebel, M. M. A. El-Bary, G. Loh, S. Klaus & M. Blaut 919–929

British Journal of Nutrition

Directions to Contributors - Concise Version

(Revised August 2007)

The *British Journal of Nutrition* is an international peer-reviewed journal that publishes original papers, review articles, technical notes and short communications in English in all branches of nutritional science. **Prospective authors should note that they (or their institutions) now retain the copyright of their material published in the *British Journal of Nutrition*.** As a contributor you are asked to follow the guidelines set out below. For detailed information on the presentation of the technical content of your paper please see the full version of the **Directions to Contributors**, which can be downloaded from the Nutrition Society website (<http://www.nutrition-society.org>). Prospective authors may also contact the Publications Office directly on + 44 (0)20 7605 6555 (telephone), +44 20 7602 1756 (fax), or edoffice@nutsoc.org.uk (email).

Papers should be accompanied by a statement to the effect that the conditions laid down in the full Directions to Contributors are accepted. The statement should affirm that the submission represents original work that has not been published previously and which is not currently being considered by another journal. It should also confirm that each author has seen and approved the contents of the submitted paper. At the time of acceptance the authors should provide a completed copy of the 'Licence to Publish' (in lieu of copyright transfer). The Licence to Publish is available on the Nutrition Society website (<http://www.nutrition-society.org>). All relevant financial interests should be declared.

Text. Papers should be submitted with 1.5 line spacing and margins of at least 2 cm on each side. Text should be printed without underlining, bold or italics (except for scientific names). Standard abbreviations (e.g. Fig. and Figs.) and SI units should be used. **Typescripts can be submitted as Word, WordPerfect, EPS, Text, Postscript or RTF files. A Word processing format is required for production purposes once papers have been accepted. When substantial revisions are required to typescripts, authors are given the opportunity to do this once only, the need for any further changes should at most reflect any minor issues.**

Title Page. The first page should include a concise, informative title together with the names and addresses of the authors. A contact name for correspondence should be given and telephone, fax and email addresses provided. Authors should supply three or four key words or phrases (each containing up to three words). A short title of up to 45 characters is required as a running head.

Abstract. Each paper should commence with an accurate and informative abstract, written as a single paragraph. It should be complete in itself and intelligible without reference to the text or figures, and should not exceed 250 words.

Tables. Tables should be reduced to the simplest form, and should not duplicate information in the text or figures. They should be typed on separate pages, one page for each Table, at the end of the article and carry headings describing their content.

Illustrations. The original illustrations should accompany the submitted typescript. Text figures, line drawings, computer-generated figures and graphs should be of sufficient size and quality to allow for reduction by half or two-thirds. Half-tone photographs are acceptable where they clearly contribute to the text. All figures should be numbered and legends should be provided.

Note that authors will be charged 350 GBP for the publication of colour figures. Authors from countries entitled to free journal access through HINARI will be exempt from these charges.

References. References should be based on the numbered (Vancouver) system. **When an article has more than ten authors, only the names of the first three should be given followed by *et al.*; give abbreviated journal titles and conform to the following styles:**

- Goel V, Cheema SK, Agellon LB, Ooraikul B & Basu TK (1999) Dietary rhabarb (*Rheum rhabarbarum*) stalk fibre stimulates cholesterol 7 α -hydroxylase gene expression and bile acid excretion in cholesterol-fed C57BL/6J mice. *Br J Nutr* **81**, 65–71.
- Jenkins DJ, Kendall CW, Marchie A, *et al.* (2003) The effect of combining plant sterols, soy protein, viscous fibres, and almonds in treating hypercholesterolemia. *Metabolism* **52**, 1478–1483.
- Brandtzaeg P (2003) Role of local immunity and breast-feeding in mucosal homeostasis and defence against infections. In *Nutrition and Immune Function*, pp. 273–320 [PC Calder, CJ Field and HS Gill, editors]. Wallingford, Oxon: CAB International.
- Stock M & Rothwell NJ (1982) *Obesity and Leanness: Basic Aspects*. London: John Libbey.

Citations should be numbered consecutively in the order in which they first appear in the text using superscript Arabic numerals in parentheses, e.g. 'The conceptual difficulty of this approach has recently been highlighted^(1,2-4). If a reference is cited more than once the same number should be used each time.

Referees. Authors are asked to submit the names of up to four scientists who would be well-qualified to review the paper; however, no more than one such reviewer will be used. The email addresses and institutions of the named reviewers should be given.

Proofs. PDF page proofs will be emailed to authors for checking, and should be returned within 3 days (by fax or Express mail) to the BJN Production Editor, Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 2RU, UK; fax +44 1223 325802, email bjnproduction@cambridge.org

Typescripts. The *British Journal of Nutrition* operates an on-line submission and reviewing system (eJournalPress). **Authors should submit to the following address:** <http://bjn.msubmit.net/> If any difficulties are encountered please contact the Publications Office (details above) immediately.

Contents

Review Article

- Gestational diabetes: risk factors and recent advances in its genetics and treatment.
C. J. Petry 775–787
- n*-6 Fatty acids and cardiovascular health: a review of the evidence for dietary intake recommendations.
S. Czernichow, D. Thomas & E. Bruckert 788–796

Meta-analysis

- The use of low-glycaemic index diets in diabetes control.
D. E. Thomas & E. J. Elliott 797–802

Short Communication

- Effect of the artificial sweetener, sucralose, on small intestinal glucose absorption in healthy human subjects.
J. Ma, J. Chang, H. L. Checklin, R. L. Young, K. L. Jones, M. Horowitz & C. K. Rayner 803–806

Molecular Nutrition

- The hypocholesterolaemic effects of *Lactobacillus acidophilus* American Type Culture Collection 4356 in rats are mediated by the down-regulation of Niemann-Pick C1-Like 1.
Y. Huang, J. Wang, Y. Cheng & Y. Zheng 807–812
- Inhibition of protein tyrosine phosphatase 1B and regulation of insulin signalling markers by caffeoyl derivatives of chicory (*Cichorium intybus*) salad leaves.
V. S. Muthusamy, C. Saravanababu, M. Ramanathan, R. B. Raja, S. Sudhagar, S. Anand & B. S. Lakshmi 813–823
- Apoptosis-inducing factor and caspase-dependent apoptotic pathways triggered by different grape seed extracts on human colon cancer cell line Caco-2.
S. Dinicola, A. Cucina, A. Pasqualato, S. Proietti, F. D'Anselmi, G. Pasqua, A. R. Santamaria, P. Coluccia, A. Laganà, D. Antonacci, A. Giuliani & M. Bizzarri 824–832

Metabolism and Metabolic Studies

- Prolonged administration of secoisolariciresinol diglycoside increases lignan excretion and alters lignan tissue distribution in adult male and female rats.
N. M. Saarinen & L. U. Thompson 833–841

Nutritional Endocrinology

- Maternal serum concentrations of insulin-like growth factor (IGF)-I and IGF binding protein-1 before and during pregnancy in relation to maternal body weight and composition and infant birth weight.
H. Olausson, M. Löf, K. Brismar, E. Forsum & A. Sohlström 842–848

Nutritional Immunology

- A 12-week supplementation with quercetin does not affect natural killer cell activity, granulocyte oxidative burst activity or granulocyte phagocytosis in female human subjects.
S. A. Heinz, D. A. Henson, D. C. Nieman, M. D. Austin & F. Jin 849–857

Human and Clinical Nutrition

- Vitamin K absorption and kinetics in human subjects after consumption of ¹³C-labelled phyloquinone from kale
J. A. Novotny, A. C. Kurilich, S. J. Britz, D. J. Baer & B. A. Clevidence 858–862
- Postprandial lipaemia does not affect resting haemodynamic responses but does influence cardiovascular reactivity to dynamic exercise.
V. G. Rontoyanni, P. J. Chowienzyk & T. A. B. Sanders 863–871
- Comparison of the effect of individual dietary counselling and of standard nutritional care on weight loss in patients with head and neck cancer undergoing radiotherapy.
M. G. A. van den Berg, E. L. Rasmussen-Conrad, K. H. Wei, H. Lintz-Luidens, J. H. A. M. Kaanders & M. A. W. Merks 872–877
- Fluid intake and nutritional risk in non-critically ill patients at hospital referral.
E. Cereda, C. Pedrolli, L. Lucchin, A. D'Amicis, M. G. Gentile, N. C. Battistini, M. A. Fusco, A. Palmo & M. Muscaritoli on behalf of the PIMAI group 878–885
- Biochemical markers of nutritional status and childhood malaria severity in Cameroon.
J. B. P. Mfonkeu, I. Gouado, H. F. Kuaté, O. Zambou, V. Combes, G. E. R. Grau & P. H. A. Zollo 886–892
