Explore the Treaty Implementation for Sustainable Development series

Over the past three decades, a series of international treaties have entered into force to address pressing global concerns – social and economic development and environmental protection. New regimes on climate change, biodiversity and biosafety, desertification, agriculture and seeds, trade and investment liberalization have been established to implement global commitments related to sustainable development, many with nearly universal membership. Successful domestic implementation of these international treaty regimes is one of the most significant challenges facing international law today. Although much has been written on the content and form of treaty law, there is relatively little that examines the transition from international legal theory and treaty texts to domestic regulation and practice. This new series of books addresses this need. It provides a serious contribution to ongoing global debates by conducting a detailed analysis of how myriad new treaty regimes covering the most pressing concerns of the future can be made to work in practice.

General Editors: Marie-Claire Cordonier Segger (*Centre for International Sustainable Development Law, University of Cambridge*) and Markus W. Gehring (*Centre for International Sustainable Development Law, University of Ottawa*)

Economics

Books and Journals from
Cambridge University Press

Cambridge's economics list is renowned for the breadth and quality of its publishing.

Our book list is home to the work of some of the most important economists in the history of the discipline, most notably John Maynard Keynes, as well as the work of almost 30 Sveriges Riksbank Nobel Prize laureates, including Kenneth Arrow, Herbert Simon, Robert Solow and Joseph Stiglitz.

This is complemented by a cluster of key journals such as *Econometric Theory*, *Journal of Economic History* and *Journal of Financial and Quantitative Analysis*.
