A. Sestero, The ignition brachystochrone [*J. Plasma Phys.* **65**(1), 59–72 (2001)]

The inequality appearing in the 9th line and again in the 13th line on page 63 should read as follows:

$$dt \geq 0.$$

The formulae given in (20a, b) on page 66 should read as follows:

$$n \propto \left(1 - \frac{x^2}{a^2} - \frac{y^2}{b^2}\right)^{p_n}, \quad T \propto \left(1 - \frac{x^2}{a^2} - \frac{y^2}{b^2}\right)^{p_T}.$$

A. SESTERO
