

ERRATUM

VOLUME 4

p. 461. In the abstract *On initial segments of computable linear orders* by R. Coles, R. Downey, and B. M. Khossainov, the statement of the theorem has the wrong subscript, Π_1^0 instead of Π_2^0 . The correct statement is as follows:

Theorem: There exists a computable linearly ordered set with a Π_2^0 -initial segment which does not possess a computable presentation.
