

Directions to Contributors - Concise Version

The *British Journal of Nutrition* publishes original papers, review articles, technical notes and short communications in English in all branches of nutrition. The geographical scope of the journal is international. As a contributor you should note and follow the guidelines set out below. For further information on how the technical content of your paper should be presented please see the **Directions to Contributors** as reproduced in the first issue of a recent volume of *The British Journal of Nutrition* (January or July), or contact the Editorial Office on + 44 (0)171 371 6225 (telephone) or +44 (0)171 602 1756 (fax).

Papers should be accompanied by a signed statement to the effect that the author accepts the conditions laid down in the full Directions to Contributors.

Contributors of accepted articles will be asked to assign their copyright, on certain conditions, to The Nutrition Society to help protect their material.

Page format. *The British Journal of Nutrition* is printed in single-column format (column width of 135mm) with a text area of 135 x 203mm.

Text. Papers should be typed, on one side of the paper only, with double line spacing and ample margins (at least 1.5 cm) on each side and with no underlining or bold in text except for scientific names. Draft-quality print from a word-processor is not acceptable. Standard abbreviations (e.g. Fig. and Figs) and SI units must be used. **When a paper has been accepted, word-processed text stored on floppy disk is encouraged, providing the software is IBM/DOS compatible, but floppy disks must be accompanied by a hard copy. This will enable papers to be handled rapidly, and with fewer typesetting errors.**

Abstract. Each paper must commence with a carefully prepared, accurate, informative abstract, in one paragraph, that is complete in itself and intelligible without reference to text or figures. It should not exceed 250 words. A short title of up to 45 characters should be provided as a running head.

Key Words. Authors should supply two or three key words or phrases (each containing up to three words) on the title page of the typescripts.

Tables. Tables should be reduced to the simplest form, and should not be used where text or illustrations give the same information. They should be submitted on separate sheets at the end of the article and must fit conveniently into single-column or landscape (if absolutely necessary) format. Table captions should be typed on a separate sheet.

Illustrations. Copies only of artwork should be submitted. The original illustrations should accompany the paper after acceptance and revision. Text figures, line drawings, computer-generated figures and graphs should be of sufficient size and quality to allow for reduction by half or two-thirds. Half-tone photographs are acceptable where they are a real contribution to the text. Figure captions should be typed on a separate sheet and numbered corresponding to the relevant Figures.

References. References must be based on the name and year (Harvard) system; **give full journal titles** and conform to the following styles:

Bingham, S. A. & Cummings J. H. (1985). Urine nitrogen as an independent validatory measure of dietary intake: a study of nitrogen balance in individuals consuming their normal diet. *American Journal of Clinical Nutrition* 42, 1276-1289.

Haralddottir, J. (1989). Dietary history. In *Manual on Methodology for Food Consumption Studies*, pp. 88-92 [M. E. Cameron and W. A. van Staveren, editors]. Oxford: Oxford University Press.

Underwood, E.J. (1977). *Trace Elements in Human and Animal Nutrition*, 5th ed. New York: Academic Press.

Citation of authors in the text should appear in the form: Polaszek (1990) or (Polaszek, 1990). More than one author should be cited in chronological order as: (Holloway *et al.* 1987; Walker & Huddleston, 1988).

Proofs. Only one set of page proofs will be provided to authors for checking, and this should be returned as promptly as possible to Dr I.E.Sambook, Executive Editor, The British Journal of Nutrition, The Nutrition Society, 10 Cambridge Court, 210 Shepherds Bush Road, London W6 7NJ, UK

Manuscripts. Four complete copies of the manuscript and artwork should be submitted to:

Dr Keith N Frayn
Chairman of the Editorial Board
The British Journal of Nutrition
The Nutrition Society
10 Cambridge Court
210 Shepherds Bush Road
London W6 7NJ

Vol. 77 No. 3 March 1997

The
British Journal
of Nutrition

Contents**Human and Clinical Nutrition**

- Dietary intake in relation to clinical status in patients with psoriasis.
Kari Solvoll, Elisabeth Søyland, Berit Sandstad & Christian A. Drevon 337–344
- Non-starch polysaccharide intakes in Mexican villagers and residents of Mexico City.
Claudia P. Sánchez-Castillo, David Grubb, Maria de Lourdes Solano, Michael F. Franklin & W. Philip T. James 345–357
- Energy expenditure during heavy work and its interaction with body weight.
P. Haggarty, M. E. Valencia, G. McNeill, N. L. Gonzalez, S. Y. Moya, A. Pinelli, L. Quihui, M. S. Saucedo, J. Esparza, J. Ashton, E. Milne & W. P. T. James 359–373
- Effects of high- and low-fat meals on the diurnal response of plasma lipid metabolite concentrations in healthy middle-aged volunteers.
D. L. Frape, N. R. Williams, A. J. Scriven, C. R. Palmer, Kathryn O'Sullivan & R. J. Fletcher 375–390
- Severe malnutrition is associated with decreased levels of plasma transferrin receptor.
F. O. T. Akenami, A. Vaheri, M. Koskiniemi, S-M. Kivivuori, E. E. Ekanem, D. M. Bolarin & M. A. Siimes 391–397

Animal Nutrition

- Mechanisms of adaptation in sheep to overcome silage intake depression induced by biogenic amines.
M. Van Os, A. M. Van Vuuren & S. F. Spoelstra 399–415
- Energy expenditure related to the act of eating in Granadina goats given diets of different physical form.
M. Lachica, J. F. Aguilera & the late C. Prieto 417–426
- The effect of previous growth retardation on energy and nitrogen metabolism of goat, infected with *Trypanosoma vivax*.
J. T. P. van Dam, J. W. Schrama, A. Vreden, M. W. A. Verstegen, T. Wensing, D. Van der Heide & D. Zwart 427–441

General Nutrition

- Nutritional evaluation of sweet lupin (*Lupinus angustifolius*): net protein utilization (NPU), nitrogen balance and fractionation studies.
Mohammed H. Rahman, Iqbal Hossain & Moslehuddin 443–457
- Modulation of duodenal iron uptake by hypoxia and fasting in the rat.
E. M. Taylor, K. B. Raja, R. J. Simpson & T. J. Peters 459–473
- On the origin of the increased tissue iron content in graded magnesium deficiency states in the rat.
Klaus Schümann, Annette Lebeau, Ursula Gresser, Theodor Günther & Jürgen Vormann 475–490

Corrigendum

491
