

JOURNAL OF APPLIED PROBABILITY
VOLUME 44 (2007): INDEX

	PAGES
ABRAHAM, R., DHERSIN, J. S. AND YCART, B. Strong convergence for urn models with reducible replacement policy	652–660
ABRAMOV, V. M. Optimal control of a large dam	249–258
AKI, S. <i>see</i> INOUE, K.	
ALPERN, S. Rendezvous search with revealed information: applications to the line	1–15
ALSMEYER, G. AND MEINERS, M. A stochastic maximin fixed-point equation related to game tree evaluation	586–606
AYESTA, U. A unifying conservation law for single-server queues	1078–1087
BALDI ANTOGNINI, A. AND GIANNERINI, S. Generalized Pólya urn designs with null balance	661–669
BALL, F., O’NEILL, P. D. AND PIKE, J. Stochastic epidemic models in structured populations featuring dynamic vaccination and isolation	571–585
BALLANI, F., STOYAN, D. AND WOLF, S. On two damage accumulation models and their size effects	99–114
BANSAYE, V. On a model for the storage of files on a hardware. II. Evolution of a typical data block	901–927
BARBE, PH., McCORMICK, W. P. AND ZHANG, C. Asymptotic expansions for distributions of compound sums of random variables with rapidly varying subexponential distribution	670–684
BELZUNCE, F., MARTÍNEZ-PUERTAS, H. AND RUIZ, J. M. Reserved preservation properties for series and parallel systems	928–937
BEN ALAYA, M. AND JOURDAIN, B. Probabilistic approximation of a nonlinear parabolic equation occurring in rheology	528–546
BOMPADRE, A., DROR, M. AND ORLIN, J. B. Probabilistic analysis of unit-demand vehicle routing problems	259–278
BOOTH, H. S. <i>see</i> KANTOROVITZ, M. R.	
BROCKWELL, P. J., DAVIS, R. A. AND YANG, Y. Estimation for nonnegative Lévy-driven Ornstein–Uhlenbeck processes	977–989
BURDEN, C. J. <i>see</i> KANTOROVITZ, M. R.	
CAIRNS, B. J. <i>see</i> POLLETT, P.	
CARPIO, K. J. E. AND DALEY, D. J. Long-range dependence of Markov chains in discrete time on countable state space	1047–1055
CHA, J. H. AND MI, J. Study of a stochastic failure model in a random environment	151–163
CHEN, A., POLLETT, P., LI, J. AND ZHANG, H. A remark on the uniqueness of weighted Markov branching processes	279–283
CHEN, R. <i>see</i> GRIGORESCU, I.	
CHEUNG, K. C. Characterizations of conditional comonotonicity	607–617
CLARK, S. P. AND KIESSLER, P. C. A diffusion approximation for Markov renewal processes	366–378
CZADO, C. <i>see</i> HAUG, S.	
DALEY, D. J. <i>see</i> CARPIO, K. J. E.	
DAVIS, R. A. <i>see</i> BROCKWELL, P. J.	
DENISOV, D. AND ZWART, B. On a theorem of Breiman and a class of random difference equations	1031–1046
DHERSIN, J. S. <i>see</i> ABRAHAM, R.	
DROR, M. <i>see</i> BOMPADRE, A.	
DUPUIS, P., NUZMAN, C. AND WHITING, P. Large deviation principle for occupancy problems with colored balls	115–141
ELSHAMY, M. A stability property of stochastic vibration	444–457
ERYILMAZ, S. <i>see</i> NAVARRO, J.	

FENG, S. AND WANG, F.-Y. A class of infinite-dimensional diffusion processes with connection to population genetics	938–949
FILLIGER, R. AND HONGLER, M.-O. Explicit Gittins indices for a class of superdiffusive processes.	554–559
FINKELSTEIN, M. On some ageing properties of general repair processes	506–513
FINLAY, R. AND SENETA, E. A gamma activity time process with noninteger parameter and self-similar limit	950–959
FRANKE, B. A Lévy process whose jumps are dragged by a spherical dynamical system	732–741
FREIXAS, J. Bounds for Owen’s multilinear extension	852–864
GAPEEV, P. V. Discounted optimal stopping for maxima of some jump-diffusion processes	713–731
GIANNERINI, S. <i>see</i> BALDI ANTOGNINI, A.	
GNEDIN, A. V. Optimal stopping with rank-dependent loss	996–1011
— AND MIRETSKIY, D. I. Winning rate in the full-information best choice problem	560–565
GRIGORESCU, I., CHEN, R. AND SHEPP, L. Optimal strategy for the Vardi casino with interest payments	199–211
GUILLEMIN, F. M., MAZUMDAR, R. R., ROSENBERG, C. P. AND YING, Y. A stochastic ordering property for leaky bucket regulated flows in packet networks	332–348
HANSEN, J., REYNOLDS, C. AND ZACHARY, S. Stability of processor sharing networks with simultaneous resource requirements	636–651
HAUG, S. AND CZADO, C. An exponential continuous-time GARCH process	960–976
HE, X. AND HU, Y. Ruin probability for the integrated Gaussian process with force of interest	685–694
HOLST, L. Counts of failure strings in certain Bernoulli sequences	824–830
— <i>see</i> LINDELL, A.	
HONGLER, M.-O. <i>see</i> FILLIGER, R.
