

INSTRUCTIONS FOR CONTRIBUTORS

SUBMISSION OF MANUSCRIPTS

Manuscripts should be submitted online via our manuscript submission and tracking site, <http://www.editorialmanager.com/psm/>. Full instructions for electronic submission are available directly from this site. To facilitate rapid reviewing, communications for peer review will be electronic and authors will need to supply a current e-mail address when registering to use the system.

Papers for publication from Europe (except those on genetic topics, irrespective of country), and all papers on imaging topics, should be submitted to the UK Office.

Papers from the Americas, Asia, Africa, Australasia and the Middle East (except those dealing with imaging topics), and all papers dealing with genetic topics, irrespective of country, should be sent to US Office.

Generally papers should not have text more than 4500 words in length (excluding these sections) and should not have more than a combined total of 5 tables and/or figures. Papers shorter than these limits are encouraged. For papers of unusual importance the editors may waive these requirements. A structured abstract of no more than 250 words should be given at the beginning of the article using the headings: Background; Methods; Results; Conclusions. The name of an author to whom correspondence should be sent must be indicated and a full postal address given in the footnote. Any acknowledgements should be placed at the end of the text (before the References section).

Declaration of Interest: A statement must be provided in the acknowledgements listing all financial support received for the work and, for all authors, any financial involvement (including employment, fees, share ownership) or affiliation with any organization whose financial interests may be affected by material in the manuscript, or which might potentially bias it. This applies to all papers including editorials and letters to the editor.

Contributors should also note the following:

1. S.I. units should be used throughout in text, figures and tables.
2. Authors should spell out in full any abbreviations used in their manuscripts.
3. Foreign quotations and phrases should be followed by a translation.
4. If necessary, guidelines for statistical presentation may be found in: **Altman DG, Gore SM, Gardner MJ & Pocock SJ** (1983). Statistical guidelines for contributors to medical journals. *British Medical Journal* **286**, 1489–1493.

REFERENCES (1) The Harvard (author-date) system should be used in the text and a complete list of References cited given at the end of the article. In a text citation of a work by more than two authors cite the first author's name followed by et al. (but the names of all of the authors should be given in the References section). Where several references are cited together they should be listed in rising date order. (2) The References section should be supplied in alphabetical order (authors' names in **bold**, journal titles in full), following the text. Some examples follow:

Miller PM, Byrne M, Hodges A, Lawrie SM, Johnstone EC (2002). Childhood behaviour, psychotic symptoms and psychosis onset in young people at high risk of schizophrenia: early findings from the Edinburgh high risk study. *Psychological Medicine* **32**, 173–179.

Cleckley HJ (1941). *The Mask of Sanity*, 2nd edn. Mosby: St. Louis, MO.

Brewer WJ, Wood SJ, DeLuca C, Pantelis C (2006). Models of olfaction for exploring neurodevelopment. In *Olfaction and the Brain* (ed. W. J. Brewer, D. Castle and C. Pantelis), pp. 97–121. Cambridge University Press: Cambridge.

(3) Online citations

doi (when published online prior to printed issue)

Lauritsen MB, Pedersen CB, Mortensen CB (2004). The incidence and prevalence of pervasive developmental disorders: a Danish population-based study. *Psychological Medicine*. Published online: 21 October 2004. doi:10.1017/S0033291704002387.

[Authors are requested to print-out and keep a copy of any online-only material, in case the URL changes or is no longer maintained.]

FIGURES AND TABLES Only essential figures and tables should be included. Further tables, figures, photographs and appendices, may be included with the online version on the journal website. To ensure that your figures are reproduced to the highest possible standards, Cambridge Journals recommends the following formats and resolutions for supplying electronic figures. Please ensure that your figures are saved at final publication size and are in our recommended file formats. Following these guidelines will result in high quality images being reproduced in both the print and the online versions of the journal. **Line artwork:** Format: tif or eps, Colour mode: black and white (also known as 1-bit), Resolution: 1200 dpi; **Combination artwork (line/tone):** Format: tif or eps, Colour mode: grayscale (also known as 8-bit), Resolution: 800 dpi; **Black and white halftone artwork:** Format: tif, Colour mode: grayscale (also known as 8-bit), Resolution: 300 dpi; **Colour halftone artwork:** Format: tif, Colour mode: CMYK colour, Resolution: 300 dpi. All photographs, graphs, and diagrams should be referred to as figures and should be numbered consecutively in Arabic numerals. Captions for figures should be typed double-spaced on separate sheets. **Tables** Tables should be numbered consecutively in the text in Arabic numerals and each typed on a separate sheet after the References section. Titles should be typed above the table.

PROOFS AND OFFPRINTS Page proofs will be sent to the author designated to receive correspondence. corrections other than to printer's errors may be charged to the author. The corresponding author of each paper will receive a PDF file of their article and hard copy offprints may be purchased if they are ordered on the form supplied when the proof is returned.

PSYCHOLOGICAL MEDICINE

CONTENTS

INVITED REVIEW ARTICLE

- Gene–environment interplay in the etiology of psychosis**
Zwicker A, Denovan-Wright EM & Uher R 1925

REVIEW ARTICLES

- Social anxiety disorder: looking back and moving forward**
Hyett MP & McEvoy PM 1937

- Dismantling cognitive-behaviour therapy for panic disorder: a systematic review and component network meta-analysis**
Pompoli A, Furukawa TA, Efthimiou O, Imai H, Tajika A & Salanti G 1945

- Sickness absence: a systematic review and meta-analysis of psychological treatments for individuals on sick leave due to common mental disorders**
Salomonsson S, Hedman-Lagerlöf E & Öst L-G 1954

ORIGINAL ARTICLES

- The COMMAND trial of cognitive therapy to prevent harmful compliance with command hallucinations: predictors of outcome and mediators of change**
Birchwood M, Dunn G, Meaden A, Tarrier N, Lewis S, Wykes T, Davies L, Michail M & Peters E 1966

- Comparative efficacy and acceptability of pharmacological treatments for post-traumatic stress disorder in adults: a network meta-analysis**
Cipriani A, Williams T, Nikolakopoulou A, Salanti G, Chaimani A, Ipser J, Cowen PJ, Geddes JR & Stein DJ 1975

- Amygdala reactivity in ethnic minorities and its relationship to the social environment: an fMRI study**
McCutcheon R, Bloomfield MAP, Dahoun T, Quinlan M, Terbeck S, Mehta M & Howes O 1985

- School performance from primary education in the adolescent offspring of parents with schizophrenia and bipolar disorder– a national, register-based study**
Ranning A, Laursen T, Agerbo E, Thorup A, Hjorthøj C, Jepsen JRM & Nordentoft M 1993

- Reduced cortical thickness and increased gyrification in generalized anxiety disorder: a 3 T MRI study**
Molent C, Maggioni E, Cecchetto F, Garzitto M, Piccin S, Bonivento C, Maieron M, D'Agostini S, Balestrieri M, Perna G, Altamura AC & Brambilla P 2001

- The interplay between cognitive ability, alcohol consumption, and health characteristics**
Degerud E, Ystrom E, Tambs K, Ariansen I, Morland J, Magnus P, Davey Smith G & Naess Ø 2011

- Optical coherence tomography indices of structural retinal pathology in schizophrenia**
Silverstein SM, Paterno D, Cherneski L & Green S 2023

- Online prevention of disordered eating in at-risk young-adult women: a two-country pragmatic randomized controlled trial**
Wilksch SM, O'Shea A, Taylor CB, Wilfley D, Jacobi C & Wade TD 2034

- Executive function and other cognitive deficits are distal risk factors of generalized anxiety disorder 9 years later**
Zainal NH & Newman MG 2045

- Ethnic density effects for adult mental health: systematic review and meta-analysis of international studies**
Bécares L, Dewey ME & Das-Munshi J 2054

- The cross-national structure of mental disorders: results from the World Mental Health Surveys**
de Jonge P, Wardenaar KJ, Lim CCW, Aguilar-Gaxiola S, Alonso J, Andrade LH, Bunting B, Chatterji S, Ciutan M, Gureje O, Karam EG, Lee S, Medina-Mora ME, Moskalewicz J, Navarro-Mateu F, Pennell B-E, Piazza M, Posada-Villa J, Torres Y, Kessler RC, Scott K and on behalf of the WHO World Mental Health Survey Collaborators 2073

- Perimenstrual exacerbation of symptoms in borderline personality disorder: evidence from multilevel models and the Carolina Premenstrual Assessment Scoring System**
Eisenlohr-Moul TA, Schmalenberger KM, Owens SA, Peters JR, Dawson DN & Girdler SS 2085

- Correspondence** 2096, 2098

- Erratum** 2100
