Health Economics, Policy and Law

Published in association with LSE Health

Editor-in-Chief

Adam Oliver, *London School of Economics and Political Science, UK*

International trends highlight the confluence of economics, politics and legal considerations in the health policy process. *Health Economics, Policy and Law (HEPL)* provides a forum for inter-disciplinary health policy studies, and will be of use to academics, policy makers, health care managers and professionals. *HEPL* is international in scope, publishing both theoretical and applied work, with articles on all aspects of health policy. *HEPL* is particularly interested in publishing innovative ideas that promise to contribute to improving health and healthcare policy. Considerable emphasis is placed on rigorous conceptual development and analysis, and on the presentation of empirical evidence that is relevant to the policy process. Review articles and debate sections bring readers in touch with current research developments and issues.

Cover Artwork

Field of Poppies, acrylic painting by Karen Watson-Newlin

Karen Watson-Newlin currently works with acrylic paint; however, she has a long history of watercolor painting and watercolor collage, oil painting, pastel and conté portrait drawing, and fiber art. Presently, she is exploring themes in a series based on prairie plants in the different seasons of the year. Her ideas, concepts, and visual images are present in her mind long before coming to life on paper or canvas. Like flirtations of possibilities, these ideas roll over and over until the images evolve into something tangible from the mindscape. While her works are based on her personal experiences and surroundings, she is forever experimenting with new materials and concepts.

Ms. Watson-Newlin's undergraduate work was at Anderson University (Indiana USA) and she holds an MA in Art Education from the University of Wisconsin-Madison (USA). She taught art in public schools in Indiana and Wisconsin for many years.

She and her husband reside in Wisconsin with their Bichon Frise, Gracie. Ms. Watson-Newlin's work can be viewed at karenwatsonnewlin.com.

Aims and Scope: The mission of *Prehospital and Disaster Medicine* (PDM) is the distribution of information relevant to the practice of out-of-hospital and in-hospital emergency medical care, disaster health, and public health and safety. PDM provides an international forum for the reporting and discussion of scientific studies, both quantitative and qualitative, that have relevance to the above practices. The major objectives are: (1) the improvement of the types and quality of the care delivered to patients with perceived medical emergencies and to victims of multi-casualty accidents or disasters, including the public health and safety aspects of such events; and (2) the prevention and/or mitigation of the occurrence of such events and of the effects of these events upon the human population and environment.
