

## Keyword Index

### A

- Ab reaction** — Emotional arousal as therapy : activation vs dissociation, 161
- Acetylcholine** — Effects of piracetam on the dexamethasone suppression test in Alzheimer's and multi-infarct dementias, 195
- Adaptative behavior** — Effect of symptoms on the assessment of social functioning: comparison between Axis V of DSM III-R and the Psychosocial Aptitude Rating Scale, 67
- Affective disorder** — Sleep, dexamethasone suppression test, and response to somatic therapies in an atypical affective state presenting as erotomania: a case report, 269
- $\alpha_2$ -Agonists** — Cocaine use and Opioid Withdrawal Syndrome, 89
- Agoraphobia** — Platelet serotonin binding and plasma cortisol in panic disorder before and after alprazolam plus behavioral guidance treatment, 31
- Alcohol** — Drugs, alcohol and tobacco : making the science and politics connections, 331
- Alcoholism** — Alcoholism: a psychobiological perspective, 209 — How depressive are male alcoholic inpatients? Psychometric results from the "Tübinger Alkoholismusprojekt", 243
- Algorithms** — Clinical target syndromes in psychiatry : latent structure analysis versus factor analysis, 301
- Alzheimer's disease** — Effects of piracetam on the dexamethasone suppression test in Alzheimer's and multi-infarct dementias, 195
- Animal models** — Alcoholism: a psychobiological perspective, 209
- Anorexia nervosa** — A follow-up study on anorexia nervosa : clinical features and diagnostic outcome, 177
- Antidepressant treatment** — Sleep, dexamethasone suppression test, and response to somatic therapies in an atypical affective state presenting as erotomania: a case report, 269
- Anxiety** — Alcoholism: a psychobiological perspective, 209
- Anxiety-reduction** — Emotional arousal as therapy: activation vs dissociation, 161
- Appetite** — Hunger and appetite during visual perception of food in eating disorders, 237
- Artificial intelligence** — Kraepelin : an expert system for the diagnosis of Obsessive — Compulsive Disorders, 171
- Autobiographical memory** — Autobiographical memory and major depressive states, 141
- Auto-questionnaire** — Measuring patient response biases by means of a new self-rated questionnaire evaluating severity of depression, 187
- Axis V** — Effect of symptoms on the assessment of social functioning:

comparison between Axis V of DSM III-R and the Psychosocial Aptitude Rating Scale, 67

### B

- Beck Depression Inventory (BDI)** — How depressive are male alcoholic inpatients? Psychometric results from the "Tübinger Alkoholismusprojekt", 243
- Behavioural tolerance** — Alcoholism: a psychobiological perspective, 209
- Benzodiazepine** — The use of benzodiazepines in schizophrenia: a review, 217
- Binding sites** — Platelet  $^3\text{H}$ -imipramine binding in major depressive episodes, 73
- Biological clock** — Biological clocks in depression: phase-shift experiments revisited, 21
- Biological marker** — Platelet  $^3\text{H}$ -imipramine binding in major depressive episodes, 73
- Biological research** — Reciprocal influences between clinical and biological research in shaping the modern concept of schizophrenia, 109
- Bipolar disorder** — Bipolar disorder, cycloid psychosis and schizophrenia: a study using "lifetime" psychopathology ratings, factor analysis and canonical variate analysis, 223
- Brain atrophy** — How depressive are male alcoholic inpatients? Psychometric results from the "Tübinger Alkoholismusprojekt", 243
- Brief Psychiatric Rating Scale (BPRS)** — Rationale for BPRS use in routine clinical practice: quantitative assessment of psychopathology, consistent with clinical sense, 261

### C

- Careers** — Research during psychiatric training as a predictor of future academic research career: the Maudsley experience, 115
- Catharsis** — Emotional arousal as therapy: activation vs dissociation, 161
- CIDI** — CIDI, SCAN and IPDE : structured diagnostic interviews for ICD 10 and DSM III-R, 277
- Circadian rhythm** — Biological clocks in depression: phase-shift experiments revisited, 21 — Circadian variations in

- response to protirelin test in major depressive episode, 79
- Classification** — The DSM IV field trials: moving towards an empirically derived classification, 307 — The classification of mental disorders in the Tenth Revision of the International Classification of Diseases, 315 — Diagnostic criteria in psychiatry: a straitjacket or a prop, 323
- Classification of psychoses** — Bipolar disorder, cycloid psychosis and schizophrenia: a study using “lifetime” psychopathology ratings, factor analysis and canonical variate analysis, 223
- Clinical research** — Reciprocal influences between clinical and biological research in shaping the modern concept of schizophrenia, 109 — Diagnostic criteria in psychiatry: a straitjacket or a prop, 323
- Clomipramine** — Drug disposition and switch process: an attractive hypothesis, 53 — The validity of the Melancholia Scale (MES) in predicting outcome of antidepressants in chronic idiopathic pain disorders, 119
- Cocaine** — Cocaine use and Opioid Withdrawal Syndrome, 89
- Cognitive therapy** — Therapist and patient speech in cognitive depression therapy: assessment and discussion, 147
- Communicability** — Cloze Procedure and Type Token Ratio: an aid to diagnosis, 57
- Computer-aided diagnosis** — Neurometric-quantitative EEG as a diagnostic adjunct in clinical psychiatry, 131
- Concept** — The definition of pain, 153
- Cortical metabolic patterns** — Cortical metabolic patterns in schizophrenia: a mismatch with the positive-negative paradigm, 7
- Cortisol** — Platelet serotonin binding and plasma cortisol in panic disorder before and after alprazolam plus behavioral guidance treatment, 31
- Cycloid psychosis** — Bipolar disorder, cycloid psychosis and schizophrenia: a study using “lifetime” psychopathology ratings, factor analysis and canonical variate analysis, 223

## D

- Definition** — The definition of pain, 153
- Dementia** — Effects of piracetam on the dexamethasone suppression test in Alzheimer’s and multi-infarct dementias, 195
- Depression** — Biological clocks in depression: phase-shift experiments revisited, 21 — Platelet  $^3$ H-imipramine binding in major depressive episodes, 73 — Circadian variations in response to protirelin test in major depressive episode, 79 — Emotional blunting and sensation seeking in HIV-infected individuals, 99 — Therapist and patient speech in cognitive depression therapy: assessment and discussion, 147 — Measuring patient response biases by means of a new self-rated questionnaire evaluating severity of depression, 187 — How depressive are male alcoholic inpatients? Psychometric results from the “Tübinger Alkoholismusprojekt”, 243
- Dexamethasone suppression test** — Platelet serotonin binding and plasma cortisol in panic disorder before and after alprazolam plus behavioral guidance treatment, 31 —

Effects of piracetam on the dexamethasone suppression test in Alzheimer’s and multi-infarct dementias, 195

- Diagnosis** — Cloze Procedure and Type Token Ratio: an aid to diagnosis, 57
- Diagnostic criteria** — Lists of integrated criteria for the evaluation of taxonomy, 287 — Diagnostic criteria in psychiatry: a straitjacket or a prop, 323
- Diagnostic instruments** — Lists of integrated criteria for the evaluation of taxonomy, 287
- Diagnostic interviews** — CIDI, SCAN and IPDE : structured diagnostic interviews for ICD 10 and DSM III-R, 277
- Diagnostic outcome** — A follow-up study on anorexia nervosa: clinical features and diagnostic outcome, 177
- Disorganization** — Principal-component analysis of PANSS and SANS-SAPS global ratings in schizophrenic patients, 251
- Dissociation** — Emotional arousal as therapy: activation vs dissociation, 161
- Drug** — Drugs, alcohol and tobacco: making the science and politics connections, 331
- Drug response** — Rationale for BPRS use in routine clinical practice: quantitative assessment of psychopathology, consistent with clinical sense, 261
- DSM III-R** — CIDI, SCAN and IPDE: structured diagnostic interviews for ICD 10 and DSM III-R, 277
- DSM IV** — The DSM IV field trials: moving towards an empirically derived classification, 307
- DST** — Sleep, dexamethasone suppression test, and response to somatic therapies in an atypical affective state presenting as erotomania: a case report, 269

## E

- Eating disorders** — Hunger and appetite during visual perception of food in eating disorders, 237
- Emotional disturbances** — Emotional blunting and sensation seeking in HIV-infected individuals, 99
- Emotional engagement** — Emotional arousal as therapy: activation vs dissociation, 161
- Erotomania** — Sleep, dexamethasone suppression test, and response to somatic therapies in an atypical affective state presenting as erotomania: a case report, 269
- Exposure** — Emotional arousal as therapy: activation vs dissociation, 161

## F

- $^{18}$ F-fluoro-deoxyglucose** — Cortical metabolic patterns in schizophrenia: a mismatch with the positive-negative paradigm, 7
- Factor analysis** — Clinical target syndromes in psychiatry: latent structure analysis *versus* factor analysis, 301
- Fields trials** — The DSM IV field trials: moving towards an empirically derived classification, 307
- Follow-up** — A follow-up study on anorexia nervosa: clinical features and diagnostic outcome, 177

**Food** — Hunger and appetite during visual perception of food in eating disorders, 237

## G

**Generalized Anxiety Disorder** — Differential social adjustment correlates of Axis I and Axis II psychopathology in anxiety and depressive disorders, 127

## H

**<sup>3</sup>H-imipramine** — Platelet <sup>3</sup>H-imipramine binding in major depressive episodes, 73

**Hallucination** — Cortical metabolic patterns in schizophrenia: a mismatch with the positive-negative paradigm, 7

**Haloperidol** — Rationale for BPRS use in routine clinical practice: quantitative assessment of psychopathology, consistent with clinical sense, 261

**Healthy volunteers** — Antagonism by modafinil of the psychomotor and cognitive impairment induced by sleep-deprivation in 12 healthy volunteers, 93

**History of psychiatry** — Psychiatry at the end of the 20th century, 1

**HIV infection** — Emotional blunting and sensation seeking in HIV-infected individuals, 99

## I

**ICD 10** — CIDI, SCAN and IPDE: structured diagnostic interviews for ICD 10 and DSM III-R, 277 — The classification of mental disorders in the Tenth Revision of the International Classification of Diseases, 315

**Imipramine** — Drug disposition and switch process: an attractive hypothesis, 53

**Individual differences** — Alcoholism: a psychobiological perspective, 209

**Integrated criteria lists** — Lists of integrated criteria for the evaluation of taxonomy, 287

**Interactive theory** — Autobiographical memory and major depressive states, 141

**IPDE** — CIDI, SCAN and IPDE: structured diagnostic interviews for ICD 10 and DSM III-R, 277

## L

**Language** — Cloze Procedure and Type Token Ratio: an aid to diagnosis, 57

**Latent structure analysis** — Clinical target syndromes in psychiatry: latent structure analysis *versus* factor analysis, 301

**Less than major depression** — The validity of the Melancholia

Scale (MES) in predicting outcome of antidepressants in chronic idiopathic pain disorders, 119

## M

**Major depression** — The validity of the Melancholia Scale (MES) in predicting outcome of antidepressants in chronic idiopathic pain disorders, 119 — Differential social adjustment correlates of Axis I and Axis II psychopathology in anxiety and depressive disorders, 127

**Major Depressive State** — Autobiographical memory and major depressive states, 141

**Mania** — Cloze Procedure and Type Token Ratio: an aid to diagnosis, 57

**Meaning** — The definition of pain, 153

**Mental disorders** — The classification of mental disorders in the Tenth Revision of the International Classification of Diseases, 315

**Mental health politics** — Psychiatry at the end of the 20th century, 1

**Mianserin** — The validity of the Melancholia Scale (MES) in predicting outcome of antidepressants in chronic idiopathic pain disorders, 119

**Milnacipran** — Pilot study of milnacipran in panic disorder, 103

**Modafinil** — Antagonism by modafinil of the psychomotor and cognitive impairment induced by sleep-deprivation in 12 healthy volunteers, 93

**Modified ischemic score** — Effects of piracetam on the dexamethasone suppression test in Alzheimer's and multi-infarct dementias, 195

**Montgomery and Asberg depression rating scale** — Widlöcher's Depressive Retardation Scale and Montgomery Asberg's Depression Rating Scale: an inter-rater study, 47

**Mood disorders** — Emotional blunting and sensation seeking in HIV-infected individuals, 99

**Multi-infarct dementia** — Effects of piracetam on the dexamethasone suppression test in Alzheimer's and multi-infarct dementias, 195

**Multivariate statistical analysis** — Bipolar disorder, cycloid psychosis and schizophrenia: a study using "lifetime" psychopathology ratings, factor analysis and canonical variate analysis, 223

## N

**Negative symptoms** — The use of benzodiazepines in schizophrenia: a review, 217 — Principal-component analysis of PANSS and SANS-SAPS global ratings in schizophrenic patients, 251

**Neuroleptics** — Treatment of tardive dyskinesias with vitamin E, 201

**Neurometrics** — Neurometric-quantitative EEG as a diagnostic adjunct in clinical psychiatry, 131

**Neuropsychology** — How depressive are male alcoholic inpatients? Psychometric results from the "Tübinger

Alkoholismusprojekt", 243  
 Nosology — Psychiatry at the end of the 20th century, 1

## O

**Obsessive-Compulsive Disorders** — Kraepelin: an expert system for the diagnosis of Obsessive — Compulsive Disorders, 171  
**Opioid withdrawal** — Cocaine use and Opioid Withdrawal Syndrome, 89  
**Oxidation polymorphism** — Drug disposition and switch process: an attractive hypothesis, 53

## P

**Pain** — The validity of the Melancholia Scale (MES) in predicting outcome of antidepressants in chronic idiopathic pain disorders, 119 — The definition of pain, 153  
**Panic disorder** — Platelet serotonin binding and plasma cortisol in panic disorder before and after alprazolam plus behavioral guidance treatment, 31 — Pilot study of milnacipran in panic disorder, 103 — Differential social adjustment correlates of Axis I and Axis II psychopathology in anxiety and depressive disorders, 127  
**Patient-therapist interaction** — Therapist and patient speech in cognitive depression therapy: assessment and discussion, 147  
**Personality disorders** — Differential social adjustment correlates of Axis I and Axis II psychopathology in anxiety and depressive disorders, 127  
**Pharmacological treatment** — Treatment of tardive dyskinesias with vitamin E, 201  
**Phase shift** — Biological clocks in depression: phase-shift experiments revisited, 21  
**Piracetam** — Effects of piracetam on the dexamethasone suppression test in Alzheimer's and multi-infarct dementias, 195  
**Platelet** — Platelet serotonin binding and plasma cortisol in panic disorder before and after alprazolam plus behavioral guidance treatment, 31  
**Polydiagnostic** — Lists of integrated criteria for the evaluation of taxonomy, 287  
**Positive symptoms** — Principal-component analysis of PANSS and SANS-SAPS global ratings in schizophrenic patients, 251  
**Positive and negative symptoms** — Rationale for BPRS use in routine clinical practice: quantitative assessment of psychopathology, consistent with clinical sense, 261  
**Positron tomography** — Cortical metabolic patterns in schizophrenia: a mismatch with the positive-negative paradigm, 7  
**Post-traumatic stress disorder** — Severity of the prisoner of war experience and post-traumatic stress disorder, 39  
**Principal component analysis (PCA)** — Principal-component analysis of PANSS and SANS-SAPS global ratings in schizophrenic patients, 251

**Prisoner of war** — Severity of the prisoner of war experience and post-traumatic stress disorder, 39  
**Prognostic factors** — A follow-up study on anorexia nervosa: clinical features and diagnostic outcome, 177  
**Prolactin** — Circadian variations in response to protirelin test in major depressive episode, 79  
**Protirelin test** — Circadian variations in response to protirelin test in major depressive episode, 79  
**Psychiatric diagnosis** — Kraepelin: an expert system for the diagnosis of Obsessive — Compulsive Disorders, 171  
**Psychiatric training** — Research during psychiatric training as a predictor of future academic research career: the Maudsley experience, 115  
**Psychometry** — Measuring patient response biases by means of a new self-rated questionnaire evaluating severity of depression, 187  
**Psychomotor and cognitive performances** — Antagonism by modafinil of the psychomotor and cognitive impairment induced by sleep-deprivation in 12 healthy volunteers, 93  
**Psychosocial Aptitude Rating Scale** — Effect of symptoms on the assessment of social functioning: comparison between Axis V of DSM III-R and the Psychosocial Aptitude Rating Scale, 67  
**Psychostimulant** — Antagonism by modafinil of the psychomotor and cognitive impairment induced by sleep-deprivation in 12 healthy volunteers, 93

## Q

**Quantification** — Clinical target syndromes in psychiatry: latent structure analysis *versus* factor analysis, 301  
**Quantitative EEG** — Neurometric-quantitative EEG as a diagnostic adjunct in clinical psychiatry, 131

## R

**Rating scales** — Structured evaluation of psychosocial factors, 295 — Clinical target syndromes in psychiatry: latent structure analysis *versus* factor analysis, 301  
**Research experience** — Research during psychiatric training as a predictor of future academic research career: the Maudsley experience, 115  
**Research training** — Research during psychiatric training as a predictor of future academic research career: the Maudsley experience, 115  
**Response** — Measuring patient response biases by means of a new self-rated questionnaire evaluating severity of depression, 187

## S

**Sandoz Clinical Assessment Geriatric Scale** — Effects of

piracetam on the dexamethasone suppression test in Alzheimer's and multi-infarct dementias, 195

**Scales** — Principal-component analysis of PANSS and SANS-SAPS global ratings in schizophrenic patients, 251

**SCAN** — CIDI, SCAN and IPDE : structured diagnostic interviews for ICD 10 and DSM III-R, 277

**Schizoaffective disorders** — Bipolar disorder, cycloid psychosis and schizophrenia: a study using "lifetime" psychopathology ratings, factor analysis and canonical variate analysis, 223

**Schizophrenia** — Cortical metabolic patterns in schizophrenia: a mismatch with the positive-negative paradigm, 7 — Cloze Procedure and Type Token Ratio: an aid to diagnosis, 57 — Reciprocal influences between clinical and biological research in shaping the modern concept of schizophrenia, 109 — Treatment of tardive dyskinesias with vitamin E, 201 — The use of benzodiazepines in schizophrenia: a review, 217 — Bipolar disorder, cycloid psychosis and schizophrenia: a study using "lifetime" psychopathology ratings, factor analysis and canonical variate analysis, 223 — Principal-component analysis of PANSS and SANS-SAPS global ratings in schizophrenic patients, 251

**Schizophrenic spectrum** — Reciprocal influences between clinical and biological research in shaping the modern concept of schizophrenia, 109

**Secondary depression** — The validity of the Melancholia Scale (MES) in predicting outcome of antidepressants in chronic idiopathic pain disorders, 119

**Serotonin binding** — Platelet serotonin binding and plasma cortisol in panic disorder before and after alprazolam plus behavioral guidance treatment, 31

**Severity of POW experience** — Severity of the prisoner of war experience and post-traumatic stress disorder, 39

**Shared phenomenology** — Clinical target syndromes in psychiatry: latent structure analysis *versus* factor analysis, 301

**Sleep** — Sleep, dexamethasone suppression test, and response to somatic therapies in an atypical affective state presenting as erotomania: a case report, 269

**Sleep-deprivation** — Antagonism by modafinil of the psychomotor and cognitive impairment induced by sleep-deprivation in 12 healthy volunteers, 93

**Social adjustment** — Differential social adjustment correlates of Axis I and Axis II psychopathology in anxiety and depressive disorders, 127 — Structured evaluation of psychosocial factors, 295

**Social support** — Structured evaluation of psychosocial factors,

295

**Specific memory** — Autobiographical memory and major depressive states, 141

**Stress** — Alcoholism: a psychobiological perspective, 209

**Switch process** — Drug disposition and switch process: an attractive hypothesis, 53

## T

**Tardive dyskinesia** — Treatment of tardive dyskinesias with vitamin E, 201

**Test reliability** — Widlöcher's Depressive Retardation Scale and Montgomery Asberg's Depression Rating Scale: an inter-rater study, 47

**The Melancholia Scale (MES)** — The validity of the Melancholia Scale (MES) in predicting outcome of antidepressants in chronic idiopathic pain disorders, 119

**Tobacco** — Drugs, alcohol and tobacco : making the science and politics connections, 331

**TRH** — Circadian variations in response to protirelin test in major depressive episode, 79

**TSH** — Circadian variations in response to protirelin test in major depressive episode, 79

## V

**Visual perception** — Hunger and appetite during visual perception of food in eating disorders, 237

**Vitamin E** — Treatment of tardive dyskinesias with vitamin E, 201

## W

**Widlöcher's depressive retardation scale** — Widlöcher's Depressive Retardation Scale and Montgomery Asberg's Depression Rating Scale: an inter-rater study, 47

**World War II** — Severity of the prisoner of war experience and post-traumatic stress disorder, 39

## Instructions to Authors

**Submission procedure.** Submission of a paper to *European Psychiatry* is understood to imply that the data contained therein has not previously been published (except in abstract form) or is being considered for publication elsewhere.

There are no submission or pages charges.

Only submissions in English will be considered. One original plus three copies (one copy set of photographs must be original prints) should be submitted to one of the following *five receiving centres* according to geographical location:

Pr C BALLUS  
Unidad de Psiquiatria  
Facultad de Medicina  
Casanova, 143  
08036 Barcelona, Spain  
Fax: (34) 32 54 66 91

### Deputy Editors

Dr P BOYER  
Inserm, Clinique des maladies  
mentales et de l'encéphale  
100, rue de la Santé  
75014 Paris  
Fax: (33) 1 45 65 89 43

Dr Y LECRUBIER  
Hôpital de la Salpêtrière  
Pavillon Clérambault U 302  
47, boulevard de l'Hôpital  
75651 Paris Cedex 13  
Fax: (33) 1 44 23 92 49

Submissions from Eastern Europe should, for the time being, be sent to the Deputy Editors.

Submissions from non European countries can be sent to any of the preceding editors.

Papers that do not conform to the general criteria for publication in *European Psychiatry* will be returned immediately to authors to avoid unnecessary delay in submission elsewhere.

**Organisation of the manuscript.** Manuscripts should be typewritten/printed double-spaced with wide margins throughout. Title page, abstracts, tables, legends to figures and reference list should each be provided on separate sheets of paper. The title page should include: the title, the name(s) and affiliation(s) of the author(s), an address for correspondence, and telephone/fax numbers for editorial queries. All original and review articles should include an abstract (a single paragraph of no more than 150 words) and 3-6 key words for abstracting and indexing purposes. For original and review articles, the text should be ordered under the following headings: Introduction, Experimental Procedures, Results, Discussion (may be combined with Results), Conclusions, Acknowledgments (when appropriate), References.

• **Short communications** should not exceed 1500 words or equivalent space including figures and tables, with abstracts of no more than 50 words.

• **Letters to the Editor** (maximum of 500 words) will be processed rapidly and therefore should be sent to the Deputy Editors. To ensure speedy publication, please adhere strictly to the general instructions on style and arrangement; provide only figures and tables suitable for direct reproduction.

• **Illustrations.** Photographs should be presented as glossy prints with high contrast. Figures should be completely and consistently lettered, the size of the lettering being appropriate to that of the illustration, taking into account the necessary reduction in size.

Illustrations should be designed to fit either a single column or the full text width. Each illustration should be clearly marked on the reverse side with the name of the author(s), the number of the illustration and its orientation (top).

Colour figures will be included subject to the author's agreement to defray part of the cost.

• **Tables.** All tables must be cited in the text, have titles and be numbered consecutively with roman numerals. Only horizontal lines should be included, and kept to a minimum.

• **References** (Harvard System) Authors are responsible for the accuracy of the references. Only published articles and those in press (the

journal should be stated) may be included; unpublished results and personal communications should be cited as such in the text. In the text, a reference should be cited by author and date; when there are more than two authors, state the first author's name followed by "et al". References should be arranged alphabetically at the end of the paper and include, in the following order: all authors (surnames followed by initials), year in parentheses, journal title (abbreviated according to the Serial Sources for the Biosis Data Base), volume number, and inclusive page numbers. For a book, the editors' names, book title, publisher and publisher's location should appear before volume and page numbers.

### Examples:

#### Journal article

Lêo H, Rein W, Souche A, Dufour H, Guefi JD, Malka R, Olié JP (1990) Psychopathological and sociodemographic characteristics of 1231 depressed patients with and without co-existing alcoholism. *Psychiatr & Psychobiol* 5, 249-256

#### Book

Takahashi R, R Flor-Henry P, Gruzeliér J, Niwa SI (1987) *Dynamics, Laterality and Psychopathology*. Elsevier, Amsterdam

#### Chapter in a book

Pinard G, Tetreault L (1974) Concerning semantic problems in psychological evaluation. In: *Psychological Measurements in Psychopharmacology. Modern Problems in Pharmacopsychiatry*, Vol 7 (Pichot P, ed) Karger, Basel, 8-22

• **Nomenclature.** Metric units must be used throughout, laboratory units must be followed by SI units. The generic name of a drug should be used unless the specific trade name of the drug is directly relevant to the discussion.

• **Proofs and reprints.** One set of proofs will be supplied to the author to check for typesetting accuracy: no changes to the original manuscript will be allowed at this stage. To speed up publication time, authors should respond as quickly as possible, preferably by fax.

**25 free reprints** are supplied per contribution. Additional reprints may be ordered at the prices quoted on the order form sent to the corresponding author.

• **Copyright.** As soon as the article is published, the author is considered to have transferred his rights to the publisher. Requests for reproduction should be sent to the latter.

“ This handbook achieves its aim in providing a comprehensive review of the theoretical and clinical bases of general hospital psychiatry along with fully illustrating the current and future role of liaison psychiatry ”

# Handbook of Studies on General Hospital Psychiatry

edited by *Fiona K. Judd, Graham D. Burrows and Don R. Lipsitt*

This handbook draws together the conceptual and clinical issues. Lipowski provides a comprehensive overview of the beginnings, scope, organisation and functions of consultation-liaison psychiatry.

The psychiatric problems in a general hospital and psychological reactions in physically ill patients are well described by Mayou and Sharpe and by Lloyd respectively.

Several important areas of general hospital psychiatry, often neglected in standard textbooks, are included in this volume - these include the benefits of consultation-liaison psychiatry, consultation-liaison nursing, consultation-liaison research and burnout in the health professions.

Recent clinical initiatives in general hospital psychiatry are described in chapters on behavioral medicine and the medical-psychiatric unit in the general hospital. While many of the management strategies used in liaison psychiatry are familiar to the general psychiatrist, they require modification or at times extra caution when used in the liaison setting. Thus, this volume includes chapters on the systems approach to consultation-liaison psychiatry, brief psychotherapy, psychotropic drugs, and the family approach with medical and surgical patients.

Special attention has been given to children with physical impairments, the family of those with chronic illness and the elderly.

Selectively focussing on particular illnesses provides the basis for approach in many illnesses and diseases. The spinal injuries unit is used as a model for liaison psychiatry; plastic

and reconstructive surgery highlight the psychosocial care aspects; duodenal ulcer, one of the original psychosomatic illnesses, illustrates our understanding and conceptualization in this area. Somatoform disorders, chronic pain, depression in the mentally ill and consultations in the emergency department form the main area of liaison psychiatry.

Post-traumatic stress disorder is being increasingly recognized. AIDS is one of the biggest new areas for endeavor by the liaison psychiatrist. Terminal illness remains one of the most demanding areas for involvement by the liaison psychiatrist.

Spanning 26 chapters, this handbook achieves its aim in providing a comprehensive review of the theoretical and clinical bases of general hospital psychiatry along with fully illustrating the current and future role of liaison psychiatry.
