

EDITORIAL NOTE

Readers of this journal will have noticed a dramatic advertisement for a recent book placed just following the Table of Contents of the December 1981 issue. Favored placement of this ad was inadvertent and does not signify this editor's endorsement of the importance of the book. I apologize to readers of this journal—and most especially to members of the Philosophy of Science Association—for any insinuation of partisanship they may have thought attributable to the editorial staff of *Philosophy of Science* by the unfortunate inclusion of this ad in the body of the issue.

Robert E. Butts
Editor-in-Chief
