Constitutionalism

Philosophical Foundations

Larry Alexander, Editor

A distinguished international team of legal theorists examines the issue of constitutionalism and poses such foundational questions as: Why have a constitution? How do we know what the constitution of a country really is? How should a constitution be interpreted? Why should one generation feel bound by the constitution of an earlier one? The volume will be of particular importance to those in philosophy, law, political science and international relations who are interested in whether and what kinds of constitutions should be adopted in countries without them, and who are involved in debates about constitutional interpretation.

Shrinking the State

The Political Underpinnings of Privatization

**Harvey Feigenbaum,
Chris Hamnett, and
Jeffrey Henig**

Privatization has spread worldwide during the 1980s and 1990s, reshaping the balance between state and market in many countries. This book provides a comparative political analysis of privatization in the UK, United States and France. The authors argue that privatization is a political phenomenon and should be analyzed as such, rather than as an economic response to the growth of the state and the cost of state provision. The book will be of interest to students of politics, economics, public policy and business studies, as well as to policy-makers and business consultants.

The Dynamics of Industrial Competition

A North American Perspective

John R. Baldwin

"...this pathbreaking study...sets out a new and compelling research agenda for understanding and analyzing industrial competition..."

— *Journal of Economic Literature*

The Dynamics of Industrial Competition provides the first extensive quantitative examination of the processes associated with competition: entry and exit, mergers, growth and decline of incumbent firms. It will be of interest to all social scientists who are concerned with the workings of markets—economists, political scientists, government specialists, as well as antitrust lawyers.

Term Limits and Legislative Representation

John M. Carey

Legislative term limits are the most important electoral reform on the political agenda in the United States. This book tests the central arguments made by both supporters and opponents of the reform by examining the experience of Costa Rica, the only long-term democracy to impose term limits on legislators, and by providing extensive comparisons with legislatures in Venezuela and the United States.
