## 6TH AIRCRAFT STRUCTURAL DESIGN CONFERENCE

**BRISTOL / 9-11 OCTOBER 2018**

This conference will address the challenges facing the designers of the next generation aircraft. New designs will need to meet progressively stricter environmental constraints and be subjected to ever increasing pressures for reductions in manufacturing and life-cycle costs. The resulting aircraft will be complex, requiring the use of advanced or novel materials, multi-disciplinary design approaches and solutions operating in a distributed design environment. For more information please visit our website.
