

## Theses on Irish history completed in Irish universities, 2010

The following list gives particulars of theses on Irish historical subjects, or on subjects having a distinct bearing on Irish history, for which research was carried out in the history departments of Irish universities and for which higher degrees were awarded in 2010. The information has been supplied by the departments and some attempt has been made to check it for accuracy and completeness.

The list is in chronological order and gives the following particulars: the title of the thesis; the name of the student concerned; the degree obtained and the college or university at which it was awarded; the name of the supervisor.

Any corrigenda or addenda would be welcome, as would information from other departments (such as geography, law, political science, languages, sociology) in which theses of Irish historical interest have been produced.

PETER GRAY  
*Queen's University Belfast*

- Transmission and transformation of iconography and exegetical themes from late antiquity in insular art. By Susan Cremin. Ph.D./U.C.C. (Dr Jennifer O'Reilly)
