

THE THREE INHIBITEERS

ON GUARD AGAINST INFECTION

HIBICLENS/HIBITANE/HIBISTAT: the incomparable infection control team throughout the hospital. The active ingredient in all three—chlorhexidine gluconate—has been proved superior to other skin cleansers. Chlorhexidine gluconate has a more effective bacterial kill rate than hexachlorophene. It is more persistent than povidone-iodine. It is safer than either antimicrobial agent. What's more, chlorhexidine gluconate is cosmetically elegant

and gentle to the skin, even with repeated use.

Whether skin cleansing involves handwashing, surgical scrubbing, preoperative total body bathing, wound cleansing (HIBICLENS), preoperative patient skin preparation (HIBICLENS or HIBITANE Tincture), preparing patient skin for an injection (HIBITANE Tincture), or instant hand degerming (HIBISTAT), there's nothing better for inhibiting infection than the HIBI-team.
