## The Story of the *Odyssey* Stephen V. Tracy

Stephen Tracy offers a vivid, fast-paced narrative that serves as a reading guide to Homer's monumental epic. He not only provides translations of key passages and traces the evolution of major themes in the *Odyssey*, but also helps new readers to understand the artistry of one of the best tales ever told. Aimed at advanced readers as well, Tracy's work stresses an appreciation of how Homer has ordered his narrative, covering such topics as character interaction, family relationships, elements of poetic language, and the symbolic treatment of death, rebirth, growth, and knowledge.

**"Students especially should be able to draw a great deal of knowledge and literary understanding from [the book]."**

## Man in the Middle Voice Name and Narration in the *Odyssey* John Peradotto

John Peradotto concentrates on textual practices of naming and narrating in the *Odyssey* from a perspective that blends traditional philological with semiotic and narratological techniques. With terms drawn from Bakhtin's concept of "dialogism," the *Odyssey's* two voices are characterized as "centripetal" and "centrifugal." As he examines the more audible, "centrifugal" voice, Peradotto shows how the poet's sense of power over his material, represented in Odysseus' ability to narrate a fictitious world, creates a "character" of infinite variety.

## The Aesthetics of the Greek Banquet Images of Wine and Ritual François Lissarrague Translated by Andrew Szegedy-Maszak

In deepening our understanding of the symposium in ancient Greece, not only does this work offer an anthropological view of ancient Greece, but it explores a precise iconographic system as well. In so doing it will encourage and enrich further reflection on the role of the image in culture.

**"Lissarrague's is a genuinely original and exciting study. Using the new techniques of interpreting the iconography of vase painting, which he along with his colleagues in Paris has pioneered, Lissarrague introduces us to the rich, imaginative, and often witty art of the Athenian banquet and does so with verve and erudition in elegant, lucid prose."**

# Lucretius on Death and Anxiety

Poetry and Philosophy in *De Rerum Natura*

*Charles Segal*

In a fresh interpretation of Lucretius's *On the Nature of Things*, Charles Segal reveals this great poetical account of Epicurean philosophy as an important and profound document for the history of Western attitudes toward death. He shows that this poem, aimed at promoting spiritual tranquillity, confronts two anxieties about death not addressed in Epicurus's abstract treatment—the fear of the process of dying and the fear of nothingness. Lucretius, Segal argues, deals more specifically with the body in dying because he draws on the Roman concern with corporeality as well as on the rich traditions of epic and tragic poetry on mortality.

# Diodorus Siculus and the First Century

*Kenneth S. Sacks*

Living in Rome during the last years of the Republic, Diodorus of Sicily produced the most expansive history of the ancient world that has survived from antiquity—the *Bibliothēke*. Whereas Diodorus himself has been commonly seen as a “mere copyist” of earlier historical traditions, Kenneth Sacks explores the complexity of his work to reveal a historian with a distinct point of view. Viewed as a unified work reflecting the intellectual and political beliefs of the late Hellenistic period, the *Bibliothēke* will become an important source for interpreting first-century moral, political, and intellectual values.

**“This is a truly pioneering study that should become a standard reference and the starting point for future research.”**

# The Historical Method of Herodotus

Donald Lateiner

Herodotus' status as historian has traditionally been challenged by later practitioners and critics. In this study Donald Lateiner argues that Herodotus' strategies for recording the startling rise of the Persian empire and its no less startling repulse show an energetic and sophisticated control over a vast range of information, and a complex understanding of historical dynamics.
