- 2 The most famous polemic promoting criticism above positivism is J. Kerman's *Musicology* (London, 1985) (*Contemplating music* is the American title).
- 3 See Susan McClary, 'The blasphemy of talking politics during Bach year', *Music and society: the politics of composition, performance and reception*, ed. R. Leppert and S. McClary (Cambridge, 1987), pp. 13–62. McClary's approach, showing Bach as a proto-enlightened commentator on the contingency of worldly hierarchies, has been modified by Michael Marissen, in his study *The social and religious designs of J. S. Bach's Brandenburg Concertos* (Princeton, 1995), who shows that Bach's critique reflects an orthodox Lutheran standpoint.

Thomas (New York and London, 1994), pp. 67–83. Philip Brett's article in the same volume, 'Musicality, essentialism, and the closet', pp. 9–26, is a rare example of a direct attack on Bach and his achievement, particularly with regard to his influence and reception as a teacher. Brett makes it clear that he sees Bach as an abstracting meddler, appropriating for instance the 'simple, defenseless tunes' of the chorale repertory. It seems to me that Brett's opinion can easily be dismantled even from his own viewpoint: chorales, as one of the most potently ideological and successfully politicising musical repertoires of all time, can hardly be associated with the simple, pure and defenceless; unison singing (the traditional manner of performance) is nothing if not patriarchal and monolithic; Bach's harmonisations, by the musical conventions of their own age, are supremely – even excessively – expressive, hardly abstract; and, surely, far from being patriarchal, they 'feminise' a patriarchal tradition, festooning with 'embarrassing' ornament the iron rule of unison song. Yet what is valuable about Brett's approach is the fact that the target of his attack is the *reception* of Bach, the way Bach has been appropriated as an instrument of repressive musical thinking over the last two centuries or so.

- 4 The 'Hungarian' origin of the Bach family has often been disputed by those who argue that Veit was returning home to Thuringia after a period in 'Ungarn', but it is attested in at least two documents that predate the Genealogy. One of these is a letter dated 24 April 1728 from Johann Nicolaus Bach (1699–1753) to his pupil Nikolaus Alexis Príleský (see H.-J. Schulze, "Die Bachen stammen aus Ungarn her". Ein unbekannter Brief Johann Nikolaus Bachs aus dem Jahre 1728', *Bjb* 75 (1989), pp. 213–20); the other is the entry on J. S. Bach in the *Musicalisches Lexicon* (Leipzig, 1732), p. 64, by Bach's kinsman J. G. Walther. For the most recent research on the origins of the Wechmar line, according to which Veit Bach arrived in Wechmar with his son Hans in the 1590s, see Knut Kreuch, *Die Urväterheimat der Musikerfamilie Bach* (Wechmar, 1994).
- 5 J. N. Forkel, *Über Johann Sebastian Bachs Leben, Kunst und Kunstwerke* (Leipzig, 1802; English trans., London, 1820), p. 5.
- 6 *Nun ist alles überwunden*, an 'aria' for SATB and organ, has been attributed to either Johann Christoph or Heinrich Bach (1615–92); see A. Basso, *Frau Musika: la vita e le opere di J. S. Bach*, 2 vols. (Turin, 1979–83), vol. I, p. 278. Basso lists ninety-four extant works by members of the Bach family before J. S. on pp. 278–82 of his book.
- 7 Bach copied parts for *Der Gerechte, ob er gleich* by Johann Christoph Bach (one of the works in the *Alt-Bachisches Archiv* in 1743–6); see Y. Kobayashi, *Die Notenschrift Johann Sebastian Bachs. Dokumentation ihrer Entwicklung* (Kassel, 1989) (NBA, IX/2), p. 212. - 8 Basso, *Frau Musika*, vol. I, p. 714.
- 9 J. S. Bach's father, Ambrosius (1645–95), was a twin with Johann Christoph (1645–93); another Johann Christoph (1642–1703) and his wife Maria Elisabetha *née* Wedemann produced twins in 1685; J. S. Bach's own twins were born (and died) in 1713; and among later generations twins were born to Johann Bernhard (1700–43) and his wife Johanna Dorothea *née* vom Hofe in 1732.
- 10 Ambrosius's unfortunate younger sister Dorothee Maria (1652–79) was born deformed and imbecile.
- 11 The tendency towards intermarriage among the Bachs reached its closest point of consanguinity in 1817, when Ernst Carl Christian Bach (1785–1859) married his first cousin Sophie Charlotte (1781–1868), daughter of

- Augustinus Tobias Bernhard Bach (1740–89); see Basso, *Frau Musika*, vol. I, pp. 737 and 739.
- 12 The Genealogy mistakenly gives 1704 as the date of Bach's Arnstadt appointment.

2 Bach and the domestic politics of Electoral Saxony

- 1 This essay is based upon the articles by the author cited in the bibliography. In addition, it presents some previously unpublished research on Bach's income, based particularly on the Leipzig City Archives, and on the relationship between the territorial history of the Electorate of Saxony and the city history of Leipzig; this was supported by a fellowship from the Volkswagen-Stiftung during 1989–90.

4 Bach’s metaphysics of music

- 1 See H. H. Cox, ed., *The Calov Bible of J. S. Bach* (Ann Arbor, 1985), p. 419: ‘NB Bey einer andächtigen Musig [sic] ist allezeit gott mit seiner Gnaden-Gegenwart.’

- 5 The so-called Neumeister model for cantatas in Bach’s own environment, with its absorption of da capo arias and recitatives, is merely the latest flowering of this process.

- 9 See R. Dammann, *Der Musikbegriff im deutschen Barock* (Cologne, 1967; revised 1984), pp. 62–5.
- 10 This latter point might be one way in which the new ‘expressive’ music of the Italian Baroque explicitly fulfilled Luther’s intention that music should promote well-being and banish the Devil (a line of thought that can be traced right back to Pythagorean times; see J. Butt, *Music education and the art of performance in the German Baroque* (Cambridge, 1994), pp. 12–13).
- 11 Irwin, *Neither voice nor heart alone*, pp. 21–2, 31–3, shows that Frick was extreme in arguing that scorn and ignorance of music were just cause of divine punishment and the abuse of music was tantamount to blasphemy.
- 12 *Ibid.*, pp. 40 and 199.
- 13 This is echoed in the writings of the Orthodox music theorist A. Werckmeister, e.g. in his annotations to Steffani’s *Send-Schreiben* (1699); published by J. L. Albrecht (Mühlhausen, 1760), p. 31. A concern for the spiritual disposition of the musicians is also expressed by the Pietists.

- 25 Irwin, *Neither voice nor heart alone*, pp. 130–4, claims that sacred and secular music are not placed on an equal level theologically before the writings of the Breslau theologian Gottfried Scheibel (*Zufällige Gedancken von der Kirchenmusic* (Frankfurt and Leipzig, 1721)). Stiller, *J. S. Bach and liturgical life*, thus somewhat oversimplifies the issue with his general attitude that the sacred and secular are not separated in Orthodox Lutheranism (see e.g. p. 210).
- 26 As Irwin notes, *Neither voice nor heart alone*, p. 142, this practice hardly distinguishes Bach from his contemporaries. While it is certainly indicative of a religious disposition it does not single Bach out for particular piety.

- 34 See Butt, *Music education*, pp. 30–3; see also Chapter 2 above, for the political situation in Leipzig. That Bach saw his position within the church as a sacred duty is suggested by his highlighting of a passage concerning 'justifiable anger', in his copy of Calov's Bible commentary (see Cox, *The Calov Bible*, p. 445, facsimile 218). Anger is justified 'for the sake of your office and for God's sake', which is not to be confused with anger for one's own sake, as proscribed by Christ in his sermon on the mount.
- 35 E.g. the cancelled Passion of 1739, *Dok II*, pp. 338–9; *BR*, pp. 162–3. For references to the sorry state of the choir during the last years of Bach's life, see C. Fröde, 'Zu einer Kritik des Thomanerchores von 1749', *Bjb* 70 (1984), pp. 53–8.
- 36 Irwin, *Neither voice nor heart alone*, p. 143, goes even further, in suggesting that the call for a 'well-appointed' church music refers not to liturgical order, but merely to artistic excellence. I suspect, rather, that Bach saw liturgical order and artistic excellence as two sides of the same coin.

- 59 Marpurg proceeds to use blatantly gendered imagery to describe his notion of music history: the timeless contrapuntal basis of music is the stable *manly* element, something which the modern composer should assimilate in order to ‘set himself against the spreading rubbish of womanish song’. In other words, the dictates of fashion and taste are to be seen as unstable, ephemeral and feminine, while the solid foundation of music is masculine.

- 1 For a summary of studies making connections between Leibniz and Bach, see A. Luppi, *Lo specchio dell’armonia universale: estetica e musica in Leibniz* (Milan, 1989), pp. 158–68. Among the writings not reviewed by Luppi is E. E. For copying meant literally writing music, which meant in turn for such a musical talent as Bach a constant stimulus to the critical imagination and fantasy.’

Williams suggests that it may originally have been composed as a violin piece by 'one of the talented organists of the J. L. Krebs/J. C. Kittel generation around 1750' (p. 335). Alternatively, it has been proposed that the work originated with J. P. Kellner, a Thuringian organist and cantor with close ties to Bach; see D. - 13 The sporadic transmission of the early works testifies to Bach's own lack of interest in them. The higher level of technical competence and the increased sophistication of his later compositions rendered many of the earlier attempts obsolete. See Wolff, 'The identity of the "Fratro Dilettissimo"', p. 150; and F. Blume, 'J. S. Bach's youth', *MQ* 54 (1968), pp. 29–30.
- 14 Occasionally, even works for which autographs survive have been rejected on stylistic grounds. For instance, the two organ settings of the chorale 'Wie schön leuchtet der Morgenstern' (BWV 739 and 764) were excluded from the NBA volume of the singly transmitted organ chorales (H. Klotz, ed., *NBA* IV/3). In 'Bach's earliest autograph', *MQ* 71 (1985), pp. 235–63, Russell Stinson argues convincingly that these two pieces are indeed authentic Bach, and reports that they are scheduled to appear in a supplementary volume of the NBA (p. 237, nn. 7 and 9). - 21 George Stauffer, the *Pastorale*’s most vigorous advocate, suggests that it may have been composed in 1723–6, a period when Bach penned a number of pastoral-derived movements in his cantatas; ‘Bach’s *Pastorale* in F: a closer look at a maligned work’, *OY* 14 (1983), pp. 44–60, especially p. 59. Russell Stinson points out that the *galant* style of the third movement might indicate that it dates from as late as the 1730s; *The Bach manuscripts of Johann Peter Kellner and his circle: a case study in reception history* (Durham, N.C. and London, 1990), pp. 111–14.

- 23 A short but substantial discussion of two of them is found in Stinson, *The Bach manuscripts*, pp. 123–5, where it is argued that two compositions in a Berlin miscellany (Staatsbibliothek zu Berlin-Preussischer Kulturbesitz, shelf mark P 804), the Suite in B♭ major (BWV 821) and the Prelude and Fugue in A minor (BWV 895), are both authentic early Bach works. For an exemplary discussion and inventory of P 804, an important source that includes a number of compositions by the young Bach, see R. Stinson, ‘“Ein Sammelband aus Johann Peter Kellners Besitz”: Neue Forschungen zur Berliner Bach-Handschrift P 804’, *Bjb* 78 (1992), pp. 45–64.
- 24 The Bach compositions were published in Johann Sebastian Bach, *Orgelchoräle der Neumeister-Sammlung / Organ chorales from the Neumeister collection*, ed. C. Wolff (New Haven and Kassel, 1985). A facsimile of the entire manuscript appeared as C. Wolff, ed., *The Neumeister collection of chorale preludes from the Bach circle (Yale University manuscript LM 4708)* (New Haven, 1986). The extensive introduction to the facsimile is reprinted in Wolff, ‘The Neumeister collection of chorale preludes from the Bach circle’, *Bach: essays on his life and music* (Cambridge, Mass., 1991), pp. 107–27.

Dürr, 'Kein Meister fällt vom Himmel: Zu Johann Sebastian Bachs Orgelchorälen der Neumeister-Sammlung', *Musica* 40 (1986), pp. 309–12.
- 25 The compiler and probable scribe of the manuscript was Johann Gottfried Neumeister (1756–1840), a schoolteacher and organist who had studied music with one of Bach's colleagues in the Society of the Musical Sciences (Correspondierende Societät der musicalischen Wissenschaften), the composer and theorist Georg Andreas Sorge; see Wolff, *The Neumeister collection*, pp. 108–11.

- 29 Most notably, Günter Hartmann has insisted that BWV 1096 ('Christe, der du bist Tag und Licht' or 'Wir danken dir, Herr Jesu Christ'), a fragment of which was in a lost manuscript compiled by Johann Gottfried Walther, is by Pachelbel. See G. Hartmann, 'Authentischer Bach-Elbel. Marginalie zu einem der angeblichen Bach-Choräle der Neumeister-Sammlung', *NZM* 147 (1986), no. 4, pp. 4–6. Wolff, however, believes that the fragmentary version is a corruption (*The Neumeister collection*, p. 118).

- 32 These include the borrowing of elements from the North German chorale fantasy (e.g. frequent changes of metre, the migration of the cantus firmus from one voice to another and the placement of the cantus firmus in an interior voice) and a distinctive harmonic formula used for the final cadence of a movement (the diminished seventh chord as a substitute for the dominant, leading to the tonic). He notes that the style of the Neumeister chorales involves 'the union of conventional vocal and organistic formal means' and therefore urges that the vocal music of the older members of the Bach family (e.g. the motets and cantatas of J. M. and J. C. Bach) also be explored as a source of influence (p. 170).

- 36 Although their manuscript transmission is far from impeccable, the authenticity of these chorale partitas has never been seriously questioned. - 55 At present, the standard study of Bach's organ compositions, including the early works, is Williams, *Organ music* (see n. 36); for the keyboard works without obbligato pedal, it is Schulenberg, *Keyboard music* (see n. 22). Both books frequently point out ways in which Bach's youthful music is indebted to works by earlier composers. The best survey of Bach's organ chorales is May's article (see n. 35). Finally, Dürr's volume on the early cantatas (see n. 4) contains much useful information, especially about the manuscript transmission of this repertory. But the style-critical portions, which were originally written around 1950 and were reprinted virtually unaltered in the 1977 edition, are badly out of date.

- 62 Boyd, who believes that Bach must have known something of the library’s contents, notes that by 1696 the collection contained some 1,100 manuscripts by approximately 175 different composers and a large number of prints. Included were ‘Latin polyphony by Lassus, Monteverdi, Carissimi, Rovetta and others, and sacred works by the greatest German masters of the seventeenth century: Buxtehude, Hammerschmidt, Kerll, Scheidt, Schein, Schütz, Tunder etc.’, as well as works by two of Bach’s relatives (his great-uncle, Heinrich, and his uncle, Johann Christoph) and Georg Böhm, organist at the Johanniskirche in Lüneburg. - 10 The *Leipziger Kirchen-Staat* (1710) indicates that from time to time there was concerted music 'after the sermon' immediately before the *Verba Institutionis* (see W. Herbst, ed., *Evangelischer Gottesdienst. Quellen zur seiner Geschichte* (Göttingen, 1992), p. 147). This should not be misinterpreted as meaning that the second part of a two-part cantata was sung at this juncture: the reference is clearly to a concerted setting of the Sanctus.

- 16 Two other works are given the designation ‘Oratorio’ following the example of the Christmas Oratorio: *Oratorium Festo Paschatos*, the Easter Oratorio (BWV 249), originally written in 1725 as a cantata for Easter Day but not titled *Oratorium* until sometime around 1738; and *Oratorium Festo Ascensionis Christi*, the Ascension Oratorio (BWV 11), which includes a number of parodied movements, first performed on 19 May 1735.

- 23 That the melody had primary passion associations is evident from Bach’s use of its opening melodic line, repeated six times, in the basso continuo of the opening movement of Cantata 127, written for *Estomihi*, the Sunday before Lent, which was celebrated at that time as a kind of Passion Sunday. Significantly this first movement of Cantata 127 was later used in the *Passionspasticcio*, incorporating the music of Telemann and others, as the opening movement of the second part, following Part I which had ended with the same ‘Passion Chorale’ melody; see J. W. Grubbs, ‘Ein Passions-Pasticcio des 18. Jahrhunderts’, *BjB* 51 (1965), pp. 10–42, especially pp. 25–6. On the connections between *Estomihi* cantatas and Good Friday performances of passion music, see L. Steiger and R. Steiger, *Sehet! Wir gehn hinauf gen Jerusalem. Johann Sebastian Bachs Kantaten auf den Sonntag Estomihi* (Göttingen, 1992), *passim*, especially pp. 136–41.
- 24 Such connections between Incarnation and Atonement may support the hypothesis of von Holst (see note 22 above), since Bach may have deliberately chosen to parody the *turbae* choruses from the Mark Passion in the *Christmas Oratorio* as much for theological as musical reasons.

- 43 Rifkin's conclusion is based on Bach's known technique of composing cantatas sequentially, in order of the movements. Chafe, while accepting 1727 as the year of the first performance of the Matthew Passion, thinks it unlikely that Bach would have composed such a complex work in a strict linear progression; see Chafe, 'J. In addition to the parodied movements from BWV 198, the first movement of Cantata 54 was also re-worked for the passion. More recently, various editors have suggested that movements from BWV 7, 120a, 204, 234, as well as the bass aria ‘Himmel reiße’, composed for the second version of the John Passion in 1725 but later excluded, may also have been parodied in the Mark Passion.

But if Hofmann's recent reconstruction of the chronology of Bach's cantatas in Weimar (BWV 233a appears to have originated in Weimar) is correct, Bach did not have occasion to compose an *Estomihi* cantata at the Weimar court; see K. - 74 Rifkin (review in *Notes* 44 (June 1988), p. 789) had already come to this conclusion before the existence of the Agricola manuscript was known.
- 75 The movement made a strong and lasting impact on Agricola. At the end of his life the former student of Bach made reference to it, in a posthumously published book review: 'From recent times . . . there is a setting of the words *Credo in unum Deum*, from a great Mass by the blessed J. S. Bach, with eight obbligato parts, namely, 5 vocal parts, two violins, and Generalbass . . .'; *Allgemeine deutsche Bibliothek* (Berlin) 25/1 (1775), p. 108; *Dok* III, p. 294.

- 79 Eric Chafe has proposed a different, ‘audible’ structure; see E. T. Chafe, ‘The St John Passion: theology and musical structure’, *Bach studies*, ed. D. O. Franklin (Cambridge, 1989), pp. 75–112, p. 92, note 37. He suggests that Bach adopted an asymmetrical tripartite structure – following Luther’s expositions of the Creed in his catechisms – by creating a 2 + 4 + 3 grouping of movements. While Chafe is perceptive in drawing attention to the influence of Luther’s catechetical exposition of the Creed, this influence was more likely to have been on the original ground-plan rather than the later modification. If the original eight movements were patterned after Luther’s expositions of the Creed, in a 2 + 3 + 3 structure, the ‘Crucifixus’ and ‘Confiteor’ form the central movements of the second and third articles of the Creed. Perhaps it was just this asymmetry that caused Bach to modify the structure of the *Symbolum Nicenum*. Thus by creating the new ‘Et incarnatus est’ movement, the overall structure became Trinitarian ($9 = 3 \times 3$), and the centrepiece of the second article of the Creed remained the ‘Crucifixus’, which now became the centre of gravity of the entire *Symbolum Nicenum*. Although Chafe argues persuasively that his solution is ‘dynamic’ in contrast to the ‘more abstract’ symmetrical structure, such chiastic relationships nevertheless appear to have been an important element in Bach’s compositional process.
- 80 Ratswahl (lit. ‘council election’) cantatas were written to celebrate changes of the town council. Bach probably used this cantata as his model, though it is theoretically possible for him to have used the earlier manifestations of the music in BWV 120a and BWV 120b, of which the former is incomplete and the latter is lost.
- 81 See Grimm, *Das ‘Neu Leipziger Gesangbuch’*, pp. 97–8.
- 82 The ‘Sanctus’ and ‘Agnus Dei’ both have a threefold content.
- 83 The same music was used again for the first movement for another congratulatory cantata for August of Saxony: *Preise dein Glücke, gesegnetes Sachsen* (BWV 215), performed on 5 October 1734.

Baxter, ‘Universality in Bach’s B Minor Mass: a portrait of Bach in his final years’, *BACH* 24/2 (1993), pp. 3–25, especially pp. 17–19. It is on this kind of evidence that Dürr argues against the tendency to see parodies everywhere in Bach’s later works; see A. Dürr, *Johann Sebastian Bach. Seine Handschrift. Abbild seines Schaffens* (Wiesbaden, 1984), pp. 46–8, 72, and ‘Schriftcharakter und Werkchronologie bei Johann Sebastian Bach’, *Bericht über die Wissenschaftliche Konferenz zum V. 8 The instrumental music

- 1 On the history of this term, see E. Reimer’s article ‘Kammermusik’ in *Handwörterbuch der musikalischen Terminologie* (1971).
- 2 Dok II, p. 93; *BR*, p. 89.
- 3 See the entry on ‘Chamber music’ in *The new Harvard dictionary of music*, ed. D. M. Randel (Cambridge, Mass., 1986), p. 146.
- 4 On the history of this term, see M. Staehelin’s article ‘Orchester’ in *Handwörterbuch der musikalischen Terminologie* (1981).
- 5 Quoted by H. Becker in his article, ‘Orchester’, in *MGG*, vol. X, col. 173.
- 6 As with all other areas of Bach’s creative activities, this repertory has no clearly defined boundaries: there is a whole series of works whose authenticity is not universally acknowledged. In order not to extend the discussion unduly, we shall accept the findings reflected in the most recent list of Bach’s works, namely, the German edition of Christoph Wolff’s *New Grove* article (C. Wolff et al., *Die Bach-Familie* (Stuttgart and Weimar, 1993)). The trio sonata from *The Musical Offering* BWV 1079 is also included in the present table since it belongs here generically, even though all lists and editions of Bach’s works place it in the context of the original edition of 1747.
- 7 The question of the reconstruction of lost works on the basis of transcriptions has been discussed in various contexts in writings on Bach; see, for example, U. Siegele, *Kompositionsweise und Bearbeitungstechnik in der Instrumentalmusik J. S. Bachs* (dissertation, University of Tübingen, 1957); published as *Tübinger Beiträge zur Musikwissenschaft*, vol. III (Stuttgart, 1975); W. Fischer, *NBA* VII/7 KB; W. Breig, ‘Bachs Violinkonzert d-moll. Studien zu seiner Gestalt und seiner Entstehungsgeschichte’, *BJb* 62 (1976), pp. 7–34; and W. Breig, ‘Zur Gestalt von Johann Sebastian Bachs Konzert für Oboe d’amore’, *Tibia* 18 (1993), pp. 431–48.
- 8 Under this criterion, the first Brandenburg Concerto, too, would come under the heading of ‘orchestral music’.
- 9 *BC*, I/1 (Leipzig, 1985), p. 13. The volumes dealing with the instrumental music have yet to appear.
- 10 The pieces in question are the Polacca from the first Brandenburg Concerto and the Air from the Orchestral Suite BWV 1068; but see below for a discussion of the forces used in the latter.

- 15 Of these, the authenticity of BWV 1031 has often been called into question.
- 16 See Hans Eppstein's study 'Zur Problematik von J. S. Bachs Sonate für Violine und Cembalo G-dur (BWV 1019)', *AfMw* 21 (1964), pp. 217–42.
- 17 The movements concerned are BWV 1014/1, 1016/1, 1016/3, 1018/1, 1018/3 and 1019/2. That it is also possible to speak of independent functions of the obbligato keyboard in other cases, too, has been amply demonstrated by Eppstein, *Studien über J. S. Bachs Sonaten*, pp. 33–44.

- 21 The fact that these concertos have been excluded from the present discussion should not be taken to imply a belittlement of the creative effort that led to their later versions for harpsichord (see Chapter 10 below). Their exclusion is simply intended to avoid distorting the statistics.
- 22 BC lists the movement under A 193; it is discussed at greater length by Ralph Leavis in his article 'Zur Authentizität von Bachs Violinkonzert d-moll', *BjB* 65 (1979), pp. 25–7.
- 23 The classification 'BWV 1059' represents the hypothetical oboe concerto that Bach must have had in front of him when he began his transcription, only to break off again after nine bars; this hypothetical model can be reconstructed from the first and fifth movements of Cantata 35 and the first movement of Cantata 156; see J. Rifkin, 'Ein langsamer Konzertsatz Johann Sebastian Bachs', *BjB* 64 (1978), pp. 140–7, and W. Breig, 'Bachs Cembalokonzert-Fragment in d-Moll (BWV 1059)', *BjB* 65 (1979), pp. 29–36.
- 24 K. Heller, *Antonio Vivaldi* (Leipzig, 1991), p. 358.
- 25 Exceptions to the basic three-movement type are the first and third Brandenburg Concertos; in its first version as the Sinfonia BWV 1046a, no. 1 was originally in three movements (ending with a multisectioinal dance movement); in its Brandenburg version, a further movement was inserted after the second movement. In no. 3, the middle movement has been reduced to a mere cadence. For a recent study of ritornello form, see M. Boyd, *Bach: the Brandenburg Concertos* (Cambridge, 1993), pp. 45–58.

- 26 Doubts have recently been thrown on the oft-repeated assertion that the *Sinfonia* BWV 1046 belongs with the hunting cantata BWV 208; see M. Marissen, ‘On linking Bach’s F-Major *Sinfonia* and his Hunt Cantata’, *BACH* 23/2 (1992), pp. 31–46.

Bach initially wrote of his father’s ‘teacher Böhm’, then crossed out these words and substituted ‘the Lüneburg organist Böhm’ (see *BR*, p. 278); this might suggest that the son distorted the record somewhat, in order to portray his father as a self-taught

10 Composition as arrangement and adaptation

- 1 This subject was first treated by Ulrich Siegеле in his 1957 Tübingen dissertation, *Kompositionsweise und Bearbeitungstechnik in der Instrumentalmusik Johann Sebastian Bachs*, Tübinger Beiträge zur Musikwissenschaft, vol. III (Stuttgart, 1975). More recently it has been approached from the standpoint of the adapted works by Kirsten Beisswenger, *Johann Sebastian Bachs Notenbibliothek*, Catalogus musicus, vol. XIII (Kassel, 1992).

- 2 See the essay by Robin Leaver, Chapter 7 in the present volume.
- 3 The third section ‘c’ of each sonata is something of a special case. Reincken divided each into two parts, in the first of which the first violin is used as a melody instrument, while in the second part – an exact repetition of the first – the first violin is replaced by the gamba. Bach omitted these repeats.

Scheide*, ed. P. Brainard and R. Beisswenger dates the copy of sonatas BWV 965 and 966 to the third stage of Walther’s scribal activities, a period which lasted from 1714 (or possibly earlier) to 1717. The copy may be later, therefore, than Christoph Wolff assumes in his essay ‘Johann Adam Reinken und Johann Sebastian Bach. Zum Kontext des Bachschen Frühwerks’, *BJb* 71 (1985), pp. 99–118, especially p. 111; English trans., ‘Bach and Johann Adam Reinken: a context for the early works’, *Bach: essays on his life and music* (Cambridge, Mass., 1991), pp. 56–71.

- 16 In the version adapted by Bach, the concerto has survived only in manuscript form; a version with a different middle movement (RV 208a) was printed as the penultimate piece in Vivaldi's Op. 7 (no. 11, i.e. Part II, no. 5). On Bach's transcription, see L. F. Tagliavini, 'Bach's transcription of Vivaldi's "Grosso Mogul" concerto', *J. S. Bach as Organist*, ed. G. B. Stauffer and E. May (Bloomington, 1986), pp. 240–55.

- 26 Bach had already adopted this procedure in several of his concertos for more than one harpsichord.
- 27 See W. Breig, 'Bachs Cembalokonzert-Fragment in d-moll (BWV 1059)', *BJb* 65 (1979), pp. 29–36.
- 28 On Bach's source, see W. Breig, 'Bachs Violinkonzert d-moll. Studien zu seiner Gestalt und seiner Entstehungsgeschichte', *BJb* 62 (1976), pp. 7–34. (I no longer hold the belief, expressed there, that the original form of this work was

- not by Bach; the assumption that it is an early work should be sufficient to explain its unusual form.)
- 29 The fact that such claims can be advanced in spite of the loss of the source is due to the fact that Bach had already used the original concerto – evidently with less striking changes – in movements of two of his sacred cantatas, BWV 169 and 49.

11 Bachian invention and its mechanisms

- 1 I have treated this issue further in ‘Music analysis and the historical imperative’, *Revista de Musicología: Actas del XV Congreso de la SIM*, vol. XVI, no. 1 (1993), pp. 407–19. See also my *Bach and the patterns of invention* (Cambridge, Mass., 1996), which develops many of the arguments contained in the present essay in greater detail.
- 2 See Johann Sebastian Bach, *Drei Sonaten für Viola da Gamba und Cembalo*, BWV 1027–1029, ed. L. Dreyfus (Frankfurt and Leipzig: Peters, 1985). Other recent critical editions include that found in *NBA VI/4*, ed. H. Eppstein (1989), and another edition by Lucy Robinson issued by Faber, 1987. Cantata 78 can be found in *NBA I/21*.
- 3 For a summary of historical doubts that must be shed on most numerological analyses of Bach, see R. Tatlow, *Bach and the riddle of the number alphabet* (Cambridge, 1991).
- 4 See also R. L. Marshall, *The music of Johann Sebastian Bach: the sources, the style, the significance* (New York, 1989), pp. 76–9, for another reading of this movement. The rhythmic gesture that Marshall identifies as evoking the sarabande (p. 78) is actually a clear reference to the French chaconne, since the phrases of the sarabande – despite the important weight accorded to some second beats – do not begin on the second crotchet, nor do they permit successive bars with consistent second-beat accents.
- 5 For ease of numbering I ignore the resolution of the ‘period’ on each ninth bar, since chaconnes conventionally begin after an uncounted downbeat and are ‘measured’ from the second crotchet.

12 Bach as teacher and model

- 1 The register of the alumni was itself not always accurate, since, for example, dates of birth were sometimes declared later than was the truth, to give the impression of greater promise when candidates enrolled. In any event, inaccuracies were very common in such lists of the time. The author is very grateful to Hans-Joachim Schulze of the Leipzig Bach-Archiv for this insight.
- 2 For example, Johann Bernhard Bach of Ohrdruf (1700–43) reportedly lodged and studied with Johan Sebastian successively in Weimar and Köthen; in

Leipzig, it looks as though Bernhard's younger brother, Johann Heinrich Bach (1707–83), did the same, while serving as an alumnus of the Thomasschule (and possibly before and/or after, too). See C. Wolff, *The new Grove Bach family* (London and Basingstoke, 1983), pp. 9, 13.

- 3 See C. Wolff, *Bach: essays on his life and music* (Cambridge, Mass., 1991), p. 401.
- 4 *BR*, 264–5; *Dok III*, p. 476. Gerber made only one extensive journey later in life, his son tells us. This was to revisit 'his beloved Bach' in 1737.
- 5 *BR*, p. 264; *Dok III*, p. 476. Gerber therefore commenced his learning from Bach by studying his music in performance as a pattern (as C. G. Meissner and others are presumed to have done); but whereas Meissner is not reported to have received direct teaching from Bach, Gerber requested it, after some hesitation, and pursued his studies for some time.
- 6 By 'Inventions' the Lexicographer may have signified both the *Inventiones* in 2 parts and the *Sinfoniae* in 3. The habit of referring to both of these collections by the one title seems to have started around 1790; there is even a reference to 'Inventions' in three parts in Forkel's biography, twelve years later (1802).

- 9 Gerber's copies are examined by Alfred Dürr in *Bjb* 64 (1978), pp. 7–18 (English summary, p. 251). There is further invaluable information in the NBA commentaries to relevant keyboard works: to *The Well-tempered Clavier*, Book I (vol. V/6, 1, ed. A. Dürr, pp. 51–3, 147–9, 194–7); the English Suites (vol. V/7, ed. A. Dürr, pp. 21–4, 85–98); and the French Suites (*Bjb* 64 (1978) and *NBA* V/8, ed. A. Dürr, pp. 38–41, 57, 72–84). The three distinct sets of copies which constitute Heinrich Nicolaus Gerber's text of *The Well-tempered Clavier* include one which is partly in a different, anonymous, hand, and is therefore of inexact date. Dürr has also shown that H. N. Gerber's study of continuo realisation started earlier than his son's *Lexicon* article implied (see *Bjb* 64(1978)), which seems better to correspond with C. P. E. Bach's evidence in the *Versuch*. The commentary to *NBA* V/3 (music text ed. G. von Dadelsen) has not yet been issued.

References to the possibility that Carl Friedrich Abel studied with Bach around 1740 lead to the interesting conjecture that Agricola's copies of Bach's sonatas for viola da gamba and harpsichord BWV 1027–9 were made so that the two might play them together. There is no direct report of Agricola's having studied formally with Bach, however.

- 2 The term ‘horizon of expectation’ comes from German phenomenology and hermeneutics and is particularly important in the German school of reception theory (led by such figures as Hans Robert Jauss). It refers to the cultural and personal conditions (‘situatedness’) of any historical object, meaning or mode of understanding. What one can expect (or even conceive of) is conditioned by one’s situation and consequent perspective, just as a horizon is defined by the viewer’s position.
- 3 In the sense of Liszt’s ‘Après une lecture’, a poem that expresses in musical notes how Liszt understood Victor Hugo’s readings of Dante in ‘Les voix
