

OCEAN EXPLORER MAPS

Designed to complement the cruise experience

- Featuring a variety of accurate, entertaining, and often unexpected information
- Fully illustrated with colour photographs
- Specially written biographical notes on early explorers and other notables

Our first title, **Antarctic Explorer**, broke new ground in showing most of the likely landing places encountered on Antarctic cruises. Previously, passengers would have had to buy several navigational charts to get this information.

Building on this success, we published **Spitsbergen Explorer** in 2001. And now, in 2002, we are publishing two stunning new maps. **Alaska Explorer**, featuring the Inside Passage, is followed by **South American Explorer**, which covers the 'southern cone' of Argentina, Chile, and Uruguay. Other titles are in preparation.

"An excellent series... attractive and very informative." - Nick Millea, Map Librarian, Bodleian Library, Oxford, UK.
