IMMEDIATE DELIVERY.

CROP SCIENCE

Crop breeders, plant geneticists and physiologists, and workers in related areas will find *Crop Science* a source of valuable articles in the more technical aspects of agronomy. This new, bimonthly journal alternates with *Agronomy Journal*, and carries reports of research in the genetics, physiology, ecology, breeding and management of field crops, turf-grasses, pastures and ranges, and in seed technology. It is published by the Crop Science Society of America.

\$12.00 per year in U.S. and Canada.

\$13.00 per year elsewhere.

Other Cambridge Journals

ANNALS OF APPLIED BIOLOGY

Includes original papers and book reviews on the application of biology to agriculture, forestry, horticulture, and other subjects. Published quarterly. Annual subscription £5 per volume. Single parts 30s.

BRITISH JOURNAL OF NUTRITION

AND

PROCEEDINGS OF THE NUTRITION SOCIETY

The *Journal* contains accounts of original work in all branches of nutrition, including medical and agricultural. The *Proceedings* reports discussions on several topics of interest to nutrition scientists. Combined subscription rate is £7 for 4 parts of the *Journal*, and two parts of the *Proceedings*. Single parts of either 35s.

JOURNAL OF DAIRY RESEARCH

Publishes the results of original research in dairy science and cognate subjects. The *Journal* is issued three times a year. Annual subscription 60s. Single parts 25s.

Copies of these and other Cambridge Journals may be ordered through your Bookseller or direct from the Cambridge University Press, Bentley House, 200 Euston Road, London, N.W. 1.

Banana (bănă'nă): f. Port and Sp.: derived from native name *banana* in Congo. *Musa* species (family *Musaceae*). 1. A plant cultivated in tropical countries; grows to a height of 20 feet. 2. The fruit grow in clusters of finger-like berries, containing highly nutritious pulp. 3. Subject to nematode infestation of the roots causing 'toppling' of the plant, retarded growth and poor yield. 4. Protection against nematodes: Nemagon injected in soil round roots, during or after planting, without risk of damage to the plant. 5. Nemagon is one of the range of Shell pesticides that makes complete crop protection possible (see also aldrin, dieldrin, endrin, Phosdrin and D-D). **Nemagon** *Trade Mark*

A MODERN MILL FOR GRINDING GRAIN

The Casella grain mill is an efficient machine for grinding grain for quick accurate analysis and moisture determination. Because it shears, as it powders, the Casella mill reduces grain to an even powder without a vitiating temperature rise, and in the case of high moisture content, without forming a clogging paste. Cleaning between sampling is a quick and easy process.
