KENSINGTON 6520 (2 lines).

Telegraphic Address:
"VICKERFYTA-KNIGHTS, LONDON."

Kaiser (log.): How is it that at such a height on so cold a morning the lubricants do not freeze?
 GEN. HOPFNER: The British have discovered the secret which we have been seeking for months.—Vide "Daily Mail," see above.

A British Firm Beats the Germans.

The Secret

THE HANNOVER-PRAGUE.
 After the two fatalities had demanded from the machine it was loaded with dynamite bombs in preparation for a fight. The now famous German flying officer Hoffbauer took the seat which the Kaiser had vacated and two other officers also boarded the plane. With a service of the two engines was started and the bird the aeroplane rose in the air. It climbed rapidly to about 10,000 ft., and the Kaiser turned to General Hopfner, saying:
 How is it that at such a height, and on so cold a morning, the lubricants do not freeze?
 The British have discovered the secret which we have been seeking for months," replied the general. "It is the great difficulty is now overcome."

Extract from "Life in Essen," Eye Witness's Account, "Daily Mail," April 8th, 1918.

WAKEFIELD

Castrol

MOTOR OIL

"R" (RACING)

was the lubricant used.

Castrol "R" possesses the lowest cold test of any known Aero Engine Oil.

UNIVERSAL DRAFTING MACHINES.

When time presses, the Universal Drafting Machine proves its greatest worth. It is a remarkable aid to clearness of thought, accuracy and rapidity of expression. It considerably increases the efficiency of a draftsman owing to its accuracy and easy sensitive motion.

All our draftsmen use them; we could not afford to have our drawings made by the old method.

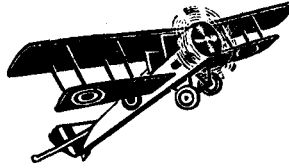

May we send YOU particulars?

POINT FOUR.
RELIABLE SERVICE.

As a result of the methods and care exercised during manufacture B.S.A. High-Speed Twist Drills possess both strength and durability. Their reliability under all conditions eliminates the possibility of delays, and renders them particularly valuable where important work is being carried out. Where increased efficiency and output are desired B.S.A. Twist Drills will prove of the greatest assistance, as they operate accurately and rapidly. From every point of view, B.S.A. Twist Drills give satisfaction.

Aeroplane Models

THE Silver Model of an Aeroplane illustrated shows how technical knowledge and skilled workmanship are allied in the models produced by the Goldsmiths and Silversmiths Company.

Infinite care is taken to ensure every detail being accurate and of proper proportions, and to reproduce an exact replica of the original.

Models can be prepared from the original or from a photograph. Estimates and designs will be submitted free upon application.

The Goldsmiths and Silversmiths Company have no other establishments in Regent Street, Oxford Street, or anywhere else in London, and no branches in the Provinces or Abroad.

A detailed black and white illustration for an advertisement. At the top center, a small logo features a winged figure with the words 'REG', 'TRADE', and 'MARK' around it. Below this, a biplane with a large propeller is shown flying through a sky filled with stylized clouds. The central part of the illustration is a white rectangular area containing the text: 'Austin' in a large, flowing script; 'AIRCRAFT AND AIRCRAFT ENGINES' in bold, block letters; and 'THE AUSTIN MOTOR CO. LTD BIRMINGHAM' in smaller block letters. The bottom portion of the illustration depicts a stone-walled town or village with a church spire, set against a background of rolling hills. The entire scene is enclosed in a decorative border with small 'X' marks at the corners. In the bottom right corner of the illustration, the text 'ZENNOX W. CORNWALL.' is visible.

“SCEPTRE” supersedes “SUPER”

ANNOUNCEMENT

When we adopted the name of the Super Aviation Co., Ltd., we had no idea it was likely to clash with another Company's name, but it having been suggested some confusion has arisen by reason of the adoption of the word “Super,” and having no desire that this should be the result, we immediately offered to change our name on the matter being brought to our notice.

We therefore publish this announcement to acquaint our many customers that in future this business will be known as THE SCEPTRE AVIATION CO., LTD., and feel sure you will realise that though changed in name—the nature of the organisation remains the same—The Sceptre Aviation Co., Ltd., is as keenly anxious as ever to give you satisfactory service and to preserve your valued good-will.

SIR JOSEPH JONAS, COLVER & Co., LTD.,

Manufacturers of Steel of every description, including
HIGH GRADE NICKEL STEEL and FORGINGS
for Naval and General Marine Purposes.

Special Heat Treated Alloy and other Steels for Aircraft and
Automobile Purposes.

IMPORTANT SPECIALITIES:

- S. S. G.** A SPECIAL NICKEL CHROME GEAR STEEL.
FOR AIR OR OIL HARDENING. When treated this steel has exceedingly tough
properties and is specially suitable for Gear Wheels, Connecting Rods, etc.
- S. G. W.** A NICKEL CHROME STEEL in 4 GRADES.
Eminently suitable and strongly recommended for Gears, Crankshafts, and other highly
stressed parts, and having exceptional machining qualities. Combines unusually heavy
shock-resisting and wearing properties with silent running.
- G. P. S.** A HIGH GRADE ALLOY CASE HARDENING STEEL
for severely strained parts, such as Gear Wheels, Gudgeon Pins, etc.

Continental Steel Works and Novo Steel Works, Sheffield.

COLD MILD STEEL PUNCHINGS.

THE multiplicity of special contracts entrusted to us by various Government Departments during the period of the War, has necessitated the laying down of a large number of presses for punchings of many varied descriptions, with the result that the Company now has at its command the most up-to-date plant in the Country for this class of work.

Inquiries are invited from Manufacturers of Motor, Aero and other Engineering Fitments, and quotations will be given for prompt delivery for large or small punchings in bulk quantities.

These cold punchings are infinitely superior to hot stampings. Wear and tear of machine tools reduced to a minimum.

*Broken Glass
is the
Shrapnel of Accidents*

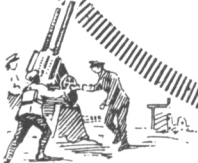

In nine accidents out of ten, somebody is injured by flying splinters of glass—the shrapnel of collisions and of fires, the enemy of the flyer and the motorist, the ever-present danger in a thousand walks of life. Yet glass *must* be used—so let it be TRIPLEX, because Triplex cannot possibly break up into fragments. There is no impact—no force known to man that can prevent Triplex “hanging together somehow.” That is its great outstanding quality, that and the clearness of 100 per cent. visibility. In every phase of war and peace Triplex has proved its value by saving life and preventing wounds and mutilation. Let every inch of glass be:—

TRIPLEX⁶ UNSPLINTERABLE SAFETY GLASS
