Erratum

We regret to inform the readers that there have been two errors in recently printed issues of *Prehospital and Disaster Medicine*. The corrections are as follows:

1. The author of the abstract in Woody J, Larkin G: Psychological impact of terrorism. *Prehosp Disast Med* 2004;19(S1):s8 was incorrectly written as Jim Woody. Dr. Woody's given name is Jay. We apologize for this error.
2. On page 355 of Volume 18, Number 4 (October–December 2003), the reported mean time interval between first and final pain score assessment was incorrectly reported. The correct information is as follows:

The mean value of the time differences between T_0 and T_{end} was 23.1 ± 11.8 minutes.

Please note that this error does not affect the reliability or validity of any of the other results reported in this paper. It also should be noted that the confidence intervals (CI) reported in this paper apply to the mean, rather than the median scores. Although the mean score is reported, the CI for the mean follows the median score.
