MOHAMMAD-SAÏD DARVICHE is Associate Professor of Political Science at the University of Montpellier. He is currently working on a project comparing modes of policy decision making in government processes (Who governs?) in the health policy sector since the financial crisis in France, Germany, the UK, and the USA. The starting point for this work is the hypothesis that competition within the state between “custodians of policy” and “austerians” is the driving force for contemporary policy innovation. He has coauthored with William Genieys, Catherine Hoeffler, and Jean Joana, “Des ‘long timers’ au sommet de l’Etat américain. Les secteurs de la Défense et de la Santé (1988-2010),” *Gouvernement et action publique*, vol. 2 no. 1 (2013): 10–38.
