

INCLUDING SUPPLEMENTARY PAPERS

JANUARY 1974

THE  
***aeronautical***  
JOURNAL

THE ROYAL AERONAUTICAL SOCIETY

***NOW AVAILABLE—***  
**an Easy Binder for your copies of**  
**THE AERONAUTICAL JOURNAL**

Many members have told us they would welcome a quick and easy way to bind and protect the twelve issues of THE AERONAUTICAL JOURNAL they receive each year.

We have introduced a new binder for this purpose, strongly constructed of stiff board, covered externally with blue plastic and with a black satin PVC lining. The curved spine is attractively gold blocked with THE AERONAUTICAL JOURNAL as title and the crest of the Society, and self-adhesive numerals are being supplied in sets of three to cover 1972, 1973 and 1974. Copies of the Journal are secured in the binder on the plastic tape fittings provided. This is a splendid way to keep your Journals in perfect condition.

Write now to the Accounts Department, The Royal Aeronautical Society, 4 Hamilton Place, London W1V 0BQ, enclosing a cheque or postal order for £1.25 to secure your first binder.

Permanent binding of THE AERONAUTICAL JOURNAL is still available on quotation from The Society—see page 6 of this issue.

VOLUME 78  
NUMBER 757  
JANUARY 1974

## ENGINEERING SCIENCES DATA UNIT LTD.

We now have a number of vacancies as a result of the continuing expansion of our work, and are seeking engineers who have at least two years experience in the fields of

**AERODYNAMICS**

**FATIGUE FLUID HEAT TRANSFER**

**FLUID MECHANICS MECHANISMS**

**STRESS ANALYSIS**

The successful applicants, who are likely to be aged between 25 and 35, will be employed on the evaluation and correlation of experimental and theoretical data and their presentation in a form suitable for direct application in design offices of leading companies throughout the world.

Please write in the first instance, giving full details of your qualifications and experience, to

**Dr. A. J. Barrett, ESDU Ltd., 251-259 Regent Street, London W1R 7AD.**

For those who would like further details of the nature of the work and our range of activity, our Annual Report is freely available on request.

## CRANFIELD INSTITUTE OF TECHNOLOGY

College of Aeronautics

**BRITISH GAS CORPORATION RESEARCH  
SCHOLARSHIP**

### "The Response of Flames to Unsteady Disturbances"

The scholarship, which provides a maintenance allowance £50 greater than the value of SRC Studentships, is to enable a graduate with a 1st or upper 2nd-class Honours degree to carry out theoretical research on unsteady flames, and to submit his work for the degree of PhD. The successful applicant will most likely have graduated in Applied Mathematics or an appropriate branch of Engineering, but candidates with degrees in other disciplines will be considered. Some experience beyond a first degree can be an advantage, and makes a candidate eligible for an additional grant of up to £200 pa. Dependents allowances will be paid at SRC rates.

Application forms and further details may be obtained from Professor J. F. Clarke, Aerodynamics Division, College of Aeronautics, Cranfield Institute of Technology, Bedford MK43 0AL.

## UNIVERSITY OF SOUTHAMPTON DEPARTMENT OF AERONAUTICS AND ASTRONAUTICS

**RESEARCH ASSISTANT/STUDENT**

Applications are invited for the post of Research Assistant/Student for work on the dynamic stability of axisymmetric bodies at high Mach numbers. The work involves the development of a new type of aerodynamic facility and the exploitation of existing equipment for the measurement of dynamic stability derivatives.

Applicants should possess a good honours degree, or the equivalent, in a subject relevant to this research. The salary will depend on qualifications and experience and, in the case of a Research Assistant, will not exceed £1750 per annum. The successful applicant will be expected to register for a higher degree.

Applications, including the names and addresses of two referees, should be addressed to The Deputy Secretary's Section, The University, Southampton SO9 5NH as soon as possible. Please quote reference number AJ182/R.
